This book contains the full proceedings of the 2015 Academy of Marketing Science Annual Conference held in Denver, Colorado. Marketing has become ubiquitous: it doesn't matter who you are, where you are or what you are doing, you cannot escape it. In these times of instantaneous news, information and entertainment, everyone is exposed to messages from the moment they awake until the minute they drift off to sleep. America spends the most money in the world on advertising and other marketing communication. So, it could be said that marketing is America's pastime, as much so as the classics: baseball, hot dogs, and apple pie. Under the theme of "Celebrating America's Pastimes: Baseball, Hot Dogs, Apple Pie and Marketing", this volume discusses all of the good things that marketing can do. Showcasing research from academics, scholars and practitioners from around the world, this volume provides insight and strategies that will help marketers move forward and focus on the positive that marketing can provide to consumers, stakeholders and society. Founded in 1971, the Academy of Marketing Science is an international organization dedicated to promoting timely explorations of phenomena related to the science of marketing in theory, research, and practice. Among its services to members and the community at large, the Academy offers conferences, congresses and symposia that attract delegates from around the world. Presentations from these events are published in this Proceedings series, which offers a comprehensive archive of volumes reflecting the evolution of the field. Volumes deliver cutting-edge research and insights, complimenting the Academy's flagship journals, Journal of the Academy of Marketing Science (JAMS) and AMS Review. Volumes are edited by leading scholars and practitioners across a wide range of subject areas in marketing science. **MARKETING: THE CORE, 2/e** by Kerin, Berkowitz, Hartley, and Rudelius continues the tradition of cutting-edge content and student-friendliness set by Marketing 8/e, but in a shorter, more accessible package. The book offers flexible topical coverage with four distinct paths: a non-game theory path through microeconomics, a path emphasizing game theory, a path emphasizing policy issues, or a path focused on business. Addressing the immensely important topic of research credibility, Raymond Hubbard's groundbreaking work proposes that we must treat such information with a healthy dose of skepticism. This book argues that the dominant model of knowledge procurement subscribed to in these areas—the significant difference paradigm—is philosophically suspect, methodologically impaired, and statistically broken. Hubbard introduces a more accurate, alternative framework—the significant sameness paradigm—for developing scientific knowledge. The majority of the book comprises a head-to-head comparison of the "significant difference" versus "significant sameness" conceptions of science across philosophical, methodological, and statistical perspectives.
