A Spectacular Enhancement to the Skill System Mythic Skills introduces a system of skill exploits that take the basic tasks your skills allow you to perform and dial them up to amazing levels. In addition, every skill in the Pathfinder Roleplaying Game Core Rulebook also gets brand-new skill exploits, as well as greater exploits that only the most skilled masters would even attempt. This book contains rules for using these enhanced skills with mythic characters but also provides an alternative system for use in non-mythic Pathfinder campaigns! This system allows your characters to focus on their skills as a key part of their character construction and to invest more of their character's abilities in their character itself, rather than the character's gear or magical tools. You can use these rules generally with mythic characters, allowing them to attempt all manner of skill-based exploits, or you can limit the ability to pull off these amazing skill stunts to those mythic characters that have really invested in making their skills a key part of their character's identity. The mythic rules offer an opportunity to magnify what makes a character special, and the skills they choose to hone as part of their background narrative and throughout the course of the campaign should be just as important in defining them as their marvelous magic and fabulous feats. With Mythic Skills in your hands, your skills will be just as spectacular!"

Today the need for a holistic approach to marketing information is greater than ever. Fortunately, parallel to this need the marketing professionals have rich data sources at hand. Besides the consumer information coming from usage and attitude studies, ad hoc researches, tracking studies, consumer panel research, etc., retail audit plays a very important role. It is easily the number one information source of manufacturer performance, pricing and distribution in the FMCG (Fast Moving Consumer Goods) world. Still, the methodology of retail audit analysis is not well-known and understood to the details, even among the marketers at the client side using the data on a daily basis. The purpose of this book is to give practical guidelines to retail audit analysis, mainly from the manufacturer point of view. It also intends to raise the attention of marketers on how useful this tool can be, with sufficient creativity to ask the right questions it can answer. The book is written in a practical, real-life business style. The concise messages are aided by easy-to-follow charts, visualizing the vast variety of potential findings retail data can provide. The book also aims to summarize the market logic and dynamics that can be explored via retail audit. This is why the author purposefully created charts well explaining - among many other (brand) marketing tactics and strategies -, the ex-pocket pricing tactics, the impact of psychological price points or how a concentrated brand portfolio looks like.

Envious of her best friends lavish lifestyle, a young woman wonders how different her life would be if she had an opportunity to change her past.

In today's marketplace, it's not enough to have a great product or service. You also have to know how to connect with your customers. You have to ask yourself: What is the impact of our company or organization? What common ground do we share with our customers? Is our company more concerned about enhancing its own value rather than enhancing the value of the people we serve? How can we actually show people what we can do for them, rather than just relying on our advertising and marketing to tell them? What is standing in the way of people responding to us? How is doing business with us and using our product or service so much better than using a competitor's? What things do we need to be doing right now so we can keep providing the same quality in the future? This book will give you the tools to answer these and many other questions to move your business beyond your products or services.

Today's dynamic and uncertain environment has contributed to the changing nature of markets. In order for companies to keep up, they will need to embark on new wave marketing to ride the wave of opportunities provided by the changes in the environment, such as the digital revolution. This is critical all over the world, but none more so than in Asia. Asia is not only the world's biggest market, but also the fastest growing. It is therefore essential for marketers to understand the dynamics of Asian companies and what they have to offer to the wider world. This book analyzes competitive companies from 18 Asian countries that have successfully practiced new wave marketing and in so doing, provide invaluable lessons that others may find useful.

Comprehensive case studies are used not only to describe how some of Asia's best companies compete, but also to analyze the concepts of new wave marketing their actions are based on. This book is unique in its depth and breadth of cases, from companies in the ASEAN region to North-east Asia, including Mongolia and SAARC. The authors of this book, Professor Philip Kotler, arguably the Father of Modern Marketing, Hermawan Kartajaya from Indonesia, and Hooi Den Huan from Singapore, are all experts in their field and have previously produced other bestsellers. This book, with its focus on real life examples of competitive Asian companies in the age of digitalization, complements the principles and theoretical frameworks of new wave marketing that are detailed in its sister book, Marketing for Competitiveness. Together, these books provide a comprehensive picture of the changing Asian marketing landscape.

Programmatic advertising is the most exciting thing that happened in marketing in a long time- perhaps since the advent of mass advertising itself. This book offers the first comprehensive introduction to the world of programmatic advertising. If you are new to this revolutionary technology, it will help you get quickly up to speed. The book is intentionally relatively short and dense, so it can be read over a weekend - and then kept on your desk for reference. Here's a quick overview: Chapter one outlines the basic technologies enabling programmatic advertising - such as cookies, pixels, banner ads, or ad exchanges. Chapter two introduces the programmatic ecosystem and its various players, including publishers, advertisers, SSPs, DSPs, DMPs, agency trading desks, and the most important industry bodies. Chapter three is dedicated to programmatic ad trading, with special attention given to the real-time bidding (RTB) auction, role of the Deal ID, and publisher prioritization including header bidding. Chapter four is all about data and ad targeting. Retargeting and various prospecting tactics are covered, including contextual targeting, behavioral targeting, and look-a-like modeling. Chapter five expands the scope of this book into mobile. Mobile cookies, cross-device identification solutions, or location data are covered here. Chapter six offers an overview of the current issues discussed across the digital ad industry - including fraud, viewability, attribution, ad blocking, or privacy. Chapter seven is about new formats available programmatically, such as rich media, video, or native. It also covers new programmatic channels including TV, audio or print."

I helped make your advisor's Sales Hype Do you need your advisor to succeed with investments? Do you think your advisor's strategy can beat a market index fund? Do you know how many sales your advisor must make to keep their job? What is your actual total return with all costs included? Why do many Wall Street firm owners use index funds? Most wealthy people can answer these questions. Can you? Today, the information to answer these questions is easily available but only savvy shoppers have used it to succeed. They realize that the retail financial industry is extremely profitable because the sales hype works even better than it used to work. We have learned how to manipulate behavior better. Our margins are 29%. The \$1.3 Trillion per year revenues come from YOU. I used to work for a few firms. I helped create some of the hype that our sales people used to separate you from your money or your potential future earnings. A plain market index fund beat 92-95% of the returns of our "professional" managers so we steer you away from them. However, we still get most investors to pay even for poor results. It is marketing, sales and misleading hype! Why should you give up your advisor? You may be giving up 63% of your total potential value. It is easy to do better on your own. Do you really think an expert at selling knows anything about what will happen to a security or the market in the next hour, week or year? Before I show you how to invest for your success, I think it is time you understood the marketing and sales HYPE. Most retail investors hate losing--more than they love winning. Most think Wall Street is a casino where some win but they forget that only the house wins long term. Isn't it time you learn how Warren Buffett avoids the Sales Hype and invests for success.
