Harry's Magic Tables Stephanie Moraghan,2012-02-10 Rhymes x pictures = times tables made easy! Nine year old Harry Moraghan never found maths easy. Then he discovered he REALLY hated it when it came to learning multiplication tables So Harry's mum invented an ingenious way of remembering his tables by using rhymes and pictures. In two weeks Harry had all his multiplication tables down pat. Soon after, Harry's teacher gave the class a test. Harry finished it in five minutes and got every question right! News of Harry's Magic Tables spread like wildfire in his school. In no time, the book was shared with some lucky classmates, friends, cousins, and eventually complete strangers too! Now many happy children know their tables inside out - and so can you!

Best Multiplication Workbook Ever! Corey Green,2011-02-01 More than just a workbook, Best Multiplication Workbook EVER! is a comprehensive curriculum that makes learning multiplication easy, enjoyable and relevant to real-life

Teach Your Child the Multiplication Tables, Fast, Fun and Easy -- Teacher's Editio Eugenia Francis,2013-08-22 Teach Your Child the Multiplication Tables - Teacher's 2nd Edition Both the Student and Teacher's editions include the TeaChildMath(tm) teaching methodology. The ONLY difference between these editions is: an Answer Key with pages reduced to 1/4 size can be found at the back of the Teacher's edition. Like most third graders, my son found learning the multiplication tables through rote memorization a challenge. After an afternoon of tiresome drills, I knew there had to be a better way! I drew a grid for tables 1-10. Not surprisingly, Scott knew tables 1, 2, 5 and 10, the tables with easy patterns. Well, then, why not find patterns for the rest of the tables? Tables for EVEN numbers 2, 4, 6 and 8, we discovered, end in

some combination of 2-4-6-8-0 and are easy to learn. Tables for ODD numbers, we found, also have distinct patterns. Patterns made Scott smile. He could see the underlying structure and knew he got it right. The traditional method of learning one math fact at a time, such as $8 \times 6 = ?$, is not only difficult but highly inefficient. Rote memorization is passive and mechanical. Students typically find it boring. Why not learn one pattern for the entire table? Discovering patterns is active, creative and engaging. The essence of mathematics is patterns. Learning to recognize patterns at an early age develops analytical skills. Patterns greatly benefit children with special needs, such as those with ADD/ADHD, autism and dyslexia. They can better recall and visualize the table when they see a pattern. This is true for all children. Patterns aid recall. My workbook utilizes both left and right-brain strategies to teach multiplication. There are marked differences between children who are left-hemisphere dominant and those who are right dominant. Whereas the left-hemisphere dominant child can construct the whole from the parts, the right dominant prefers the big picture, seeing patterns and making connections. Special needs children are often right-brain dominant. Learning the multiplication tables is much easier when both hemispheres are engaged. It is the responsibility of parents and teachers to ensure children learn the multiplication tables. Without them, a child will not progress beyond third grade math. Fractions, decimals, percentages and algebra will be beyond a child's reach. In California, the number one reason students do not graduate from high school is failure to pass algebra. A leading cause is: failure to master the times tables! It is a national disgrace that fifteen-year olds in the U.S. rank near the bottom of industrialized nations in math skills. We must reverse this alarming trend. The time to intervene is in the third grade. Teachers, why not a more effective approach to the multiplication tables than the drill and kill of rote memorization? Why not bring the magic of math into the classroom? If all third graders were to genuinely like math, they would be more likely to succeed in school. Parents too must do their part. Parents have a huge influence over a third grader. By high school it may be too late. Mastery of the multiplication tables is essential to your child's future. My goal in writing this workbook is not only multiplication mastery for all children but to instill in them a love of numbers and fascination with math. Multiplication Workbook Reza Nazari, Somayeh Nazari, 2017-03-01 Let Your Smart Child Learn the Multiplication Tables in a Structured Manner! Multiplication is one of the most important operation that students learn in the first few grade levels at school. Learning the multiplication tables facilitates the learning of basic division facts, multidigit multiplication, long division, most fraction math, and factoring. Therefore, mastering Multiplication tables is among the most important things in a child's Math learning journey from 6 to 10 years old. It opens doors and brings out their full potential in many ways. But often children can need a helping hand when it comes to understanding the concept of multiplication itself. In this Multiplication Workbook, students can learn the multiplication tables in a structured manner. In the book, you will find a complete home-study program to help children practice the essential math skills. The book is in-depth and carries many great

features, including: * Lively layout and easy-to-follow explanations * Fun, interactive and concrete * Targeted, skill-building practice * About 100 ready-to-reproduce practice pages * Easy-to-follow directions and fun exercises Designed for after school study and self-study, this book is ideal for homeschoolers, special needs and gifted children alike. You can also use the worksheets during the summer to get your children ready for the upcoming school term. The engaging questions in this book provide students with the repeated practice they need to help them master the times table. Each page features several basic multiplication problems. This engaging format motivates students to improve their knowledge of Multiplication. What Are You Waiting For? Get this book now and help Your child ENJOY learning Math today!
