

Maternal Newborn Nursing Journal

AWHONN's Core Curriculum for Maternal-Newborn Nursing, 5th Edition provides the most up-to-date, accurate information available on today's maternal-newborn nursing practice. Its concise outline format covers concepts of reproduction, fetal development, normal pregnancy, intrapartum and postpartum periods, the normal newborn, complications in the mother and newborn, and ethical issues. With a fresh focus on patient safety and revised case studies, this clinical guide and certification prep tool features AWHONN-endorsed content for the practice of maternal-newborn nursing. AWHONN-endorsed content makes this the definitive resource in preparing for current practice and specialty nursing certification examinations. Coverage of the full scope of maternal-newborn nursing practice addresses topics, such as: families; ethics; legal issues; research, case management; genetics; and the transition to home and parenthood. Bulleted outline format allows for quick review and reference of key information on the management of pregnant women and their newborns through all stages of care. NEW! Focus on patient safety draws attention to developing competencies related to safe nursing practice. NEW! Content on medication safety, including high alert medications, emphasizes critical drug information that must be considered to provide safe patient care. UPDATED! Extensively revised case studies and review questions reflect the realities of practice and provide testing for certification examinations with realistic patient scenarios. EXPANDED! Updated content throughout gives you the most current practice guidelines to promote quality care.

This is an essential book for the shorter courses in maternity nursing, e.g., 4-8 weeks long or as a refresher for professionals. Features in this book include: Women's Health and Reproductive Issues; Conception and Development; Pregnancy--Normal and High Risk; Labor--Normal and High Risk; Birth--Normal and High Risk; Postpartum Care--Normal and High Risk; Newborn Care--Normal and High Risk. Nursing students and professionals.

Growing research shows that many children from immigrant and refugee families are not doing well in school, due in part to linguistic and cultural disadvantages. Teaching dual-language learners requires cultural sensitivity, an understanding of language acquisition, and intentional teaching strategies. Combining research and techniques, this resource helps early childhood educators support dual-language learners as they develop the skills necessary for school readiness and success.

An outline-format, inexpensive, paperback review book for undergraduate nursing students that can be used for course or subject review or NCLEX preparation. Contains NCLEX-style review questions in each chapter, a comprehensive exam, and additional questions on a back-of-book CD-ROM. This edition includes new NCLEX-style innovative item questions.

Maternal-Neonatal Nursing Made Incredibly Easy! Lippincott Williams & Wilkins

This highly respected book helps students develop the technical skills and broad understanding vital for effective practice while ensuring they never lose sight of the importance of compassion in their role as nurses. Presenting maternal-newborn and child health care not as two separate disciplines but as a continuum of knowledge, Maternal and Child Health Nursing, Seventh Edition views the experience of wellness and illness as family-centered events and pregnancy and childbirth as periods of wellness in a woman's life. Consistently linking theory with application to bring clinical concepts to life and using a nursing process framework to help students prepare for effective practice, this Seventh Edition adds new chapter-ending case studies, an expanded focus on culture and families, the latest QSEN content, and more. In addition, this edition is supported by PrepU's adaptive quizzing, DocuCare's educational electronic health record software, and a fully updated Study Guide.

It offers the perfect balance of maternal and child nursing care with the right depth and breadth of coverage for students in today's maternity/pediatric courses. A unique emphasis on optimizing outcomes, evidence-based practice, and research supports the goal of caring for women, families and children, not only in traditional hospital settings, but also wherever they live, work, study, or play. Clear, concise, and easy to follow, the content is organized around four major themes, holistic care, critical thinking, validating practice, and tools for care that help students to learn and apply the material.

Providing essential knowledge for today's maternal-newborn nursing practice, the new edition of this practical reference also contains new chapters on domestic violence and ethical decision-making. Normal pregnancies and deliveries appear in separate sections for ease of use.

From prenatal through postpartum care, Gloria Leifer's Maternity Nursing: An Introductory Text provides an essential foundation for promoting the health and wellness of mothers and newborns. This edition includes the latest advances and practice standards in maternity nursing care, highlighting Healthy People 2020 and the 2011 Joint Commission National Patient Safety Goals. Part of the popular LPN Threads series, this text addresses the knowledge, skills, and scope of practice appropriate for LPN/LVN and LPN/LVN-to-ADN ladder programs. Chronological organization of content follows a sequence from family issues, fetal development, pregnancy, labor, birth, and care of the newborn, to postpartum issues with special social, familial, and cultural considerations. Organization of concepts in each chapter by simple to complex and from health to illness makes it easier to locate and understand the material. Complete, concise coverage includes a table of physiologic and psychosocial changes throughout the pregnancy, unique content on CPR for the pregnant patient and infectious diseases acquired during pregnancy, a pictorial story of a vaginal birth, cultural considerations of pregnancy and maternal care, and nursing responses to loss, death, and grief. UNIQUE! A FREE Study Guide in the back of the book reinforces understanding with multiple-choice, fill-in-the-blank, scenario-based clinical situation questions, and online activities. Nursing Care Plans with critical thinking questions help in understanding how a care plan is developed, how to evaluate care of a patient, and how to apply your knowledge to clinical scenarios. Health Promotion boxes and content focus on family-centered care, health promotion, illness prevention, and women's health issues. Clinical Pathways use an interdisciplinary, collaborative-care approach in tracking interventions along a timeline from assessment to discharge and follow up. Online resources for further research and study are included at the end of each chapter. UNIQUE! LPN Threads make learning easier, featuring a 10th-grade reading level, key terms with phonetic pronunciations and text page references, chapter objectives, special features boxes, and

full-color art, photographs, and design.

Based on candid interviews with 35 nurses who were deployed for the wars in Iraq and Afghanistan, this is the first book to reveal the stresses and moral dilemmas they experienced as they transitioned back into everyday life. The nurses share their difficulties with family separation, clinical reassignments, post-traumatic stress disorder, the perceived stigma of seeking mental health counseling, and compassion fatigue. They describe how "doing nursing" in a war zone changed them personally and expanded their nursing skills, and how reintegration was more difficult than they had anticipated. In addition to serving as a personal account of the experiences, both individual and collective, of these military nurses, the book will serve researchers as a compelling example of qualitative, phenomenological, and descriptive research. Interviewees describe in vivid detail their homecoming, family adjustments, renegotiation of spousal and parenting roles, domestic and workplace challenges, and many other dilemmas posed by the reintegration process. They provide insights and thoughtful recommendations for changes to current military debriefing to improve the experiences of future wartime nurses. Encompassing all three branches of the military, the book also examines the differences between active duty services and reserve unit services, issues of substance abuse, the Veterans Administration, the burden of multiple deployments, and other common threads among nurses who served in Iraq and Afghanistan. **KEY FEATURES:** Provides vivid narrative accounts of nurses' reintegration experiences Delivers the first research study of nursing reintegration, which includes Army, Navy, and Air Force Nurse Corps officers following deployment in the Iraqi and Afghani Conflicts Demonstrates how a comprehensive qualitative nursing research study can be crafted into a highly accessible, compelling account Explores the personal and professional paths of 35 nurses returning from war Addresses the reintegration differences between active duty versus reserve status

The evaluation of reproductive, maternal, newborn, and child health (RMNCH) by the Disease Control Priorities, Third Edition (DCP3) focuses on maternal conditions, childhood illness, and malnutrition. Specifically, the chapters address acute illness and undernutrition in children, principally under age 5. It also covers maternal mortality, morbidity, stillbirth,

and influences to pregnancy and pre-pregnancy. Volume 3 focuses on developments since the publication of DCP2 and will also include the transition to older childhood, in particular, the overlap and commonality with the child development volume. The DCP3 evaluation of these conditions produced three key findings: 1. There is significant difficulty in measuring the burden of key conditions such as unintended pregnancy, unsafe abortion, nonsexually transmitted infections, infertility, and violence against women. 2. Investments in the continuum of care can have significant returns for improved and equitable access, health, poverty, and health systems. 3. There is a large difference in how RMNCH conditions affect different income groups; investments in RMNCH can lessen the disparity in terms of both health and financial risk.
