When a tornado watch is issued one Tuesday evening in June, twelve-year-old Dan Hatch and his best friend, Arthur, don't think much of it. After all, tornado warnings are a way of life during the summer in Grand Island, Nebraska. But soon enough, the wind begins to howl, and the lights and telephone stop working. Then the emergency siren starts to wail. Dan, his baby brother, and Arthur have only seconds to get to the basement before the monstrous twister is on top of them. Little do they know that even if they do survive the storm, their ordeal will have only just begun. . . .

This is, quite simply, the best and most popular puzzle book ever published in the Soviet Union. Since its first appearance in 1956 there have been eight editions as well as translations from the original Russian into Ukrainian, Estonian, Lettish, and Lithuanian. Almost a million copies of the Russian version alone have been sold. Part of the reason for the book's success is its marvelously varied assortment of brainteasers ranging from simple "catch" riddles to difficult problems (none, however, requiring advanced mathematics). Many of the puzzles will be new to Western readers, while some familiar problems have been clothed in new forms. Often the puzzles are presented in the form of charming stories that provide non-Russian readers with valuable insights into contemporary Russian life and customs. In addition, Martin Gardner, former editor of the Mathematical Games Department, Scientific American, has clarified and simplified the book to make it as easy as possible for an

Your job may be all about sales, but not your customers. Did you know that the average executive spends less than 5 percent of their time engaged in the buying of products and services? Therefore, sales professionals who focus solely on the moment of the sale have made a fatal miscalculation in understanding their customers. If you want to gain the winning edge for your sales performance, it's time to embrace the entire customer life cycle. Beyond the Sales Process provides readers with a proven methodology for driving success before, during, and after every sale. Featuring instructional case studies from companies such as Hilton Worldwide, Merck, and Siemens, this one-of-a-kind resource reveals 12 essential strategies for the sales person wanting to take their performance to a whole new level, including:

- Research your customer
- Build a vision with them for their own success
- Understand your customer's drivers, objectives, and challenges
- Create and realize value together
- Leverage your results to forge lasting--and mutually beneficial--relationships
- And more!

Who knew solving math problems could be this much fun? Do you get protests and whining every time your child has to do some math exercises? Do you hear, "I give up!" more often when they're doing math homework compared to their other school subjects? Do you want to make study time more exciting and something your child will actually look forward to? Many kids struggle with math, especially as they move on to more and more abstract concepts. It's harder to understand an idea when you can't visualize it and see how it applies to you. By making math concepts more relatable, children may find that math can actually be enjoyable and relevant. If you want to help your child become a math whiz, or even just to become more receptive to this unpopular subject, you don't need to look any further. With this collection of math riddles and brain teasers, carefully created by Cooper the Pooper, you won't get the same old math problems that only cover what's taught in school. You'll get unique problems that require your child to think beyond basic mathematical concepts and actually apply problem-solving and analytical skills. Plus, wouldn't your child be more inclined to answer questions from a dog? In *Math Riddles for Smart Kids*, you'll

Our mission: to make math a fun part of kids' everyday lives. We all know it's wonderful to read bedtime stories to kids, but what about doing math? Many generations of Americans are uncomfortable with math and numbers, and too often we hear the phrase, "I'm just not good at math!" For decades, this attitude has trickled down from parents to their kids,

and we now have a culture that finds math dry, intimidating, and just not cool. Bedtime Math wants to change all that. Inside this book, families will find fun, mischief-making math problems to tackle—math that isn't just kid-friendly, but actually kid-appealing. With over 100 math riddles on topics from jalapeños and submarines to roller coasters and flamingos, this book bursts with math that looks nothing like school. And with three different levels of challenge (wee ones, little kids, and big kids), there's something for everyone. We can make numbers fun, and change the world, one Bedtime Math puzzle at a time.
