Level: KS2 Subject: Maths Fun and engaging quizzes to test children's mental maths skills.

By foregrounding the voices and experiences of scholars from the Global South who have migrated to institutions in the Global North, this volume theorizes the "third space" as a unique, rich, and generative position in the Western academy. Global South Scholars in the Western Academy engages a range of critical methodologies to explore the challenges that Global South scholars have faced in establishing themselves in academic settings in the Global North. The text identifies the unique position that scholars have come to adopt "in-between" North and South and theorizes this positionality as a "third space", which is carved out by academics negotiating personal, professional, and cultural belonging. This liminal subject position, enriched by experiences of migration, racialization, poverty, and difference, is shown to drive knowledge-production and justice-orientated approaches in the academy. This book provides a new and overdue perspective on the experiences and contributions of Global South scholars in the academy. It will be of interest to academics, researchers, and scholars with an interest in critical theory, indigenous and multicultural education, the sociology of education, and higher education.

Level: KS2 Subject: Maths Fun and engaging quizzes to test children's maths skills.

Level: KS2 Subject: Maths An engaging problem solving and reasoning activity book to help boost your child's progress at every stage of their learning! The long-awaited memoir of a trailblazer and role model who is telling her story for the first time. Eileen Collins was an aviation pioneer her entire career, from her crowning achievements as the first woman to command an American space mission as well as the first to pilot the space shuttle to her early years as one of the Air Force's first female pilots. She was in the first class of women to earn pilot's wings at Vance Air Force Base and was their first female instructor pilot. She was only the second woman pilot admitted to the Air Force's elite Test Pilot Program at Edwards Air Force Base. NASA had such confidence in her skills as a leader and pilot that she was entrusted to command the first shuttle mission after the Columbia disaster, returning the US to spaceflight after a two-year hiatus. Since retiring from the Air Force and NASA, she has served on numerous corporate boards and is an inspirational speaker about space exploration and leadership. Eileen Collins is among the most recognized and admired women in the world, yet this is the first time she has told her story in a book. It is a story not only of achievement and overcoming obstacles but of profound personal transformation. The shy, quiet child of an alcoholic father and struggling single mother, who grew up in modest circumstances and was an unremarkable student, she had few prospects when she graduated from high school, but she changed her life to pursue her secret dream of becoming an astronaut. She shares her leadership and life lessons throughout the book with the aim of inspiring and passing on her legacy to a new generation.
