Intermediate 2 Maths Through Practice and Example Peter W. Westwood,2005 Following the success of Higher Maths Through Practice & Example, Peter Westwood has produced a similarly useful textbook for Intermediate 2 level. Based on classroom experience of what works - and what doesn't, years of teaching and examining experience contribute to a collection of worked examples for all areas of the syllabus - and a wealth of exercises to let students practise at all levels of

difficulty. It can be used as a classroom text, or homework/supported study source of extra exercises, or as a self-access study guide. Whichever way it is used, Intermediate 2 Maths through Practice & Example will aid chances of success at the highest level.

TeeJay Intermediate 2 Mathematics Tom Strang, James Geddes, James Cairns, 2006-05-12 This book was written as the second half of a course suitable for those pupils who would have sat either Intermediate 2 or Standard Grade Credit Maths at the end of their 4th (or in some cases 3rd) years at school. It also, along with Int-2-Credit book 1, provides an ideal book to use with pupils studying for the new CfE National 5 course being developed in schools. The second half of the book consists of a wealth of revision and support materials including specimen exam papers. Book IC1 followed the order of Intermediate 2, covering Mathematics 1 and Mathematics 2, but doing so to the depth of Credit. The first half of this book completes the Intermediate 2 course, covering the Mathematics 3 element of the work. It also has 4 home exercises (Practice make Perfect), as well as end of chapter summary exercises (Remember, Remember...) and non-calculator practice exercises. The second half of the book revises the work required to attempt either the Credit or the Intermediate 3 exam. It has:- - Basic (KU) mini-exercises covering all the topics. Questions similar to those in Paper 1 (non-calculator), gleaned from the last 5 or 6 years papers. - Questions of a Paper 2 type, again similar to those from the last 5 or 6 years papers. - A specimen Credit Paper (non-calculator and calculator). - A specimen Intermediate 2 Paper (non-calculator and calculator). As well as this, we have included 2 short chapters at the back, covering a couple of early Higher Maths topics, namely Recurrence Relations and Equations of Lines. These are optional, but could be used in S4, after completing the Credit / Intermediate 2 course, or in the summer term as pupils return having just sat their Maths exam.

Mathematics in Action Consortium for Consortium for Foundation Mathematics, 2019-03-15 NOTE: This loose-leaf, three-hole punched version of the textbook gives you the flexibility to take only what you need to class and add your own notes - all at an affordable price. For loose-leaf editions that include MyLab(tm) or Mastering(tm), several versions may exist for each title and registrations are not transferable. You may need a Course ID, provided by your instructor, to register for and use MyLab or Mastering products. For courses in Intermediate Algebra. Active learning for active minds The authors of the Mathematics in Action series believe that students learn mathematics best by actually doing the math within a realistic

context. If a student is taking this course, why teach them the same content in the same way that they've already seen-yet did not retain? Following this principle, the authors provide a series of guided-discovery activities that help students to construct, reflect upon, and apply mathematical concepts, deepening their conceptual understanding as they do so. The active style of learning develops critical-thinking skills and mathematical literacy, while keeping the concepts in the context of real applications. The 6th Edition includes updated examples and activities for maximum interest and relevance, along with new and enhanced digital resources in MyLab(tm) Math to support conceptual understanding for students, wherever and whenever they need it. Also available with MyLab Math By combining trusted author content with digital tools and a flexible platform, MyLab personalizes the learning experience and improves results for each student. Note: You are purchasing a standalone product; MyLab Math does not come packaged with this content.
