Tanzania has been independent in 2011 for 50 years. While most neighbouring states have gone through violent conflicts, Tanzania has managed to implement extensive reforms without armed political conflicts, Hence, Tanzania is an interesting case for Peace and Development research. This dissertation analyses the political development in Tanzania since the introduction of the multiparty system in 1992, with a focus on the challenges for the democratisation process in connection with the 2000 and 2005 elections. The question of to what extent Tanzania had moved towards a consolidation of democracy, is analysed by looking at nine different institutions of importance for democratisation grouped in four spheres: the state, the political, civil and economic society. Focus is on the development of the political society, and the role of the opposition in particular. The analysis is based on secondary and primary material collected between September 2000 to April 2010. The main conclusion is that even if the institutions of liberal democracy have gradually developed, in practice single-party rule has continued, manifested in the 2005 election when the CCM won 92% of seats. Despite impressive economic growth, poverty remains deep and has not been substantially reduced. On a theoretical level this brings the old debate between liberal and substantive democracy back to the fore. Neither the economic nor the political reforms have brought about a transformation of the political and economic system resulting in the poor majority gaining substantially more political influence and improved economic conditions. Hence, it is argued that the interface between the economic, political and administrative reforms has not been sufficiently considered in the liberal

democratic tradition. Liberal democracy is necessary for a democratic development, but not sufficient for democracy to be consolidated. For that a substantive democratic development is necessary.

Now a Netflix Film, Starring and Directed by Chiwetel Ejiofor of 12 Years a Slave William Kamkwamba was born in Malawi, a country where magic ruled and modern science was mystery. It was also a land withered by drought and hunger. But William had read about windmills, and he dreamed of building one that would bring to his small village a set of luxuries that only 2 percent of Malawians could enjoy: electricity and running water. His neighbors called him misala—crazy—but William refused to let go of his dreams. With a small pile of once-forgotten science textbooks; some scrap metal, tractor parts, and bicycle halves; and an armory of curiosity and determination, he embarked on a daring plan to forge an unlikely contraption and small miracle that would change the lives around him. The Boy Who Harnessed the Wind is a remarkable true story about human inventiveness and its power to overcome crippling adversity. It will inspire anyone who doubts the power of one individual's ability to change his community and better the lives of those around him.

Anatomy and Physiology are complementary fields of study especially for disciplines associated with biology. This book exclusively covers the topics related to anatomy and physiology of animals. It aims to shed light on the multidisciplinary facets of zoology by focusing on the structural, physiological and evolutionary advancements in animals which have been extensively covered in this book.

Students, researchers, experts and all associated with zoology, veterinary sciences and related fields will benefit alike from this book.

In recent years, international efforts to improve educational quality in sub-Saharan Africa have focused on promoting learner-centered pedagogy. However, it has not flourished for cultural, economic, and political reasons that often go unrecognized by development organizations and policymakers. This edited volume draws on a long-term collaboration between African and American educational researchers in addressing critical questions regarding how teachers in one African country—Tanzania—conceptualize learner-centered pedagogy and struggle to implement it under challenging material conditions. One chapter considers how international support for learner-centered pedagogy has influenced national policies. Subsequent chapters utilize qualitative data from classroom observations, interviews, and focus group discussions across six Tanzanian secondary schools to examine how such policies shape local practices of professional development, inclusion, gender, and classroom discourse. In addition, the

volume presents an analysis of the benefits and challenges of international research between Tanzanian and U.S. scholars, illuminating the complexity of collaboration as it simultaneously presents the outcome of joint research on teachers' beliefs and practices. The chapters conclude with questions for discussion that can be used in courses on international development, social policy, and teacher education. "This volume, written by a multi-national team of scholar-practitioners, makes an important contribution to our understanding of learner-centered teaching and collaborative educational research. Based on an intensive investigation in Tanzania of a professional development program and teachers' efforts to conceptualize and implement a globally-promoted pedagogical approach, the authors illustrate – and critically analyze – how these practices are enabled and constrained by cultural lenses, power relations, and material conditions. Importantly, they also examine reflexively how cultural, power, and resource issues shaped their struggle to engage in a collective praxis of qualitative inquiry. The tensions referenced in the title sparked valuable insights, which will be useful to educators, researchers, and policy makers." — Mark Ginsburg, FHI 360 and Teachers College, Columbia University.

It's not WHAT challenges you face in life but HOW you face them that determines how fast you reach your goals. Rhonda Vetere, seasoned C-Suite technology veteran, knows firsthand that there's no such thing as a perfect, struggle-free life. biggest financial crises of modern times, and she knows it's not WHAT challenges you face in life but HOW you face them that matters. Grit & Grind uses real-life stories of how Vetere and her team navigate the volatile tech industry and illustrates a simple 10-part practice for building bone-deep confidence in your own abilities--no matter what the challenge is. We all face obstacles as we wind our way through life. Whether you're seeking success at work, creating a lasting relationship, or just trying to get "unstuck" in some area of your life, the quickest way to get what you want is to dive into the mess and learn your way through it. Grit & Grind's 10-part practice provides the framework. You provide the willingness to dive in. No matter what challenges you face, no matter how messy things get, you CAN work your way through them, and things WILL be better on the other side. When you're not afraid of getting your hands dirty, and when you embrace the idea that grit and grind can be fun, nothing can stop you from achieving the life you desire.

This book covers research findings on the language and education situations in Tanzania and South Africa. It outlines the policies governing language of instruction for education in the two countries, and assesses the extent to which existing policies are being implemented. It presents the history of the development of language policies in the two countries and considers how they are actually working in practice at classroom level. The

contributors further consider the economic viabilities of language policies, and the necessity to rationalise languages and dialects for education purposes.

The secretory activity of plants is a manifestation of the fundamental property of all living organisms: the ability to exchange substances and energy with the environment. This book summarizes today's knowledge of all such secretory activities of higher plants. It equally considers the cellular aspects, intratissular and external secretion, gas excretion and the excretion of substances under extreme conditions as well as the biological effects of plant excreta.

The Government of Sierra Leone's new Medium-term National Development Plan (MTNDP) 2019–2023 has been founded on a strong political commitment to deliver development results that would improve the welfare of Sierra Leone's citizens. The plan charts a clear path towards 2023 en route to the goal of achieving middle-income status by 2039 through inclusive growth that is sustainable and leaves no one behind. For the next five years, the Free Quality School Education Programme is the government's flagship programme to provide a solid base to enhance human capital development and to facilitate the transformation of the economy.

hundreds, if not thousands, of African children. Her name is Gemma Sisia, and she runs a school in Tanzania called The School of St Jude. Gemma's idea is simple. Her school is for the very poorest kids, the ones whose families can't afford the clothes or books or even pencils to send their children to the supposedly "free" government schools. These are the children of illiterate parents, whose destiny is to remain trapped in a cycle of poor education, illiteracy and poverty. Her slogan is "fighting poverty through education". Gemma started St Jude's (named after the patron saint of hopeless causes) in 2002 with an 18-year-old volunteer teacher from Sydney, three kids and her own boundless energy. From those humble beginnings, the school now has over 850 students, and one of the best academic records in the country. There are plans for a second campus, and a long term aim of reproducing the hugely successful formula across Tanzania and East Africa. St Jude's is an astonishing success for kids who would otherwise have no hope and no future. This is a truly amazing story about how the determination of one person can help change the world.

The Oxford Handbook of Theology, Sexuality, and Gender presents an unrivalled overview of the theological study of sexuality and gender. These topics are not merely contentious and pervasive: they have escalated in importance within theology. Theologians increasingly agree that even the very doctrine of God cannot be contemplated without a prior grappling with each. Featuring 41 newly-commissioned essays, written by some of the foremost scholars in the discipline, this authoritative collection presents and develops the latest thinking in these areas. Divided into eight thematic sections, the Handbook explores: methodological approaches; contributions from neighbouring disciplines; sexuality and gender in the Bible, and in the Christian tradition; controversies within the churches, and within four of the non-Christian faiths; and key concepts and issues. The final, extended section considers theology in relation to married people and families; gay and lesbian people; bisexual people; intersex and transgender people; disabled people; and to friends. This volume is an essential reference for students and scholars, which will also stimulate further research.

documents the subjugation of women in great literature and art. Kate Millett's analysis targets four revered authors—D. H. Lawrence, Henry Miller, Norman Mailer, and Jean Genet—and builds a damning profile of literature's patriarchal myths and their extension into psychology, philosophy, and politics. Her eloquence and popular examples taught a generation to recognize inequities masquerading as nature and proved the value of feminist critique in all facets of life. This new edition features the scholar Catharine A. MacKinnon and the New Yorker correspondent Rebecca Mead on the importance of Millett's work to challenging the complacency that sidelines feminism.
