

## Matrimonio Medievale Le Silerchie

'A joy of a book - enriching, illuminating, eclectic and far from a conventional science read' Richard Webb, *New Scientist* Books of the Year 'Carlo Rovelli's imaginative rigour, his lively humour and his beautiful writing are inspiring' Erica Wagner One of the most inspiring thinkers of our age, the bestselling author of *Seven Brief Lessons on Physics* transforms the way we think about the world with his reflections on science, history and humanity In this collection of writings, the logbook of an intelligence always on the move, Carlo Rovelli follows his curiosity and invites us on a voyage through science, history, philosophy and politics. Written with his usual clarity and wit, these pieces range widely across time and space: from Newton's alchemy to Einstein's mistakes, from Nabokov's butterflies to Dante's cosmology, from travels in Africa to the consciousness of an octopus, from mind-altering psychedelic substances to the meaning of atheism. Charming, pithy and elegant, this book is the perfect gateway to the universe of one of the most influential scientists of our age.

"The Penguin History of Europe series... is one of contemporary publishing's great projects."--*New Statesman* It was an age of hope and possibility, of accomplishment and expansion. Europe's High Middle Ages spanned the Crusades, the building of Chartres Cathedral, Dante's *Inferno*, and Thomas Aquinas. Buoyant, confident, creative, the era seemed to be flowering into a true renaissance-until the disastrous fourteenth century rained catastrophe in the form of plagues, famine, and war. In Europe in the High Middle Ages, William Chester Jordan paints a vivid, teeming landscape that captures this lost age in all its glory and complexity. Here are the great popes who revived the power of the Church against the secular princes; the writers and thinkers who paved the way for the Renaissance; the warriors who stemmed the Islamic tide in Spain and surged into Palestine; and the humbler estates, those who found new hope and prosperity until the long night of the 1300s. From high to low, from dramatic events to social structures, Jordan's account brings to life this fascinating age. Part of the Penguin History of Europe series, edited by David Cannadine.

In this volume, Georges Duby studies the relationship between the Church and women in twelfth-century Europe. By that time, the Church had begun to see the evolving roles and expectations of women as serious matters, resulting in a wide range of clerical writings addressing "the woman question." Drawing on these writings, Duby describes how women were thought to embody particular sins, such as sorcery, disobedience, and licentiousness. He evaluates Eve's role in man's fall from grace in the Garden of Eden and analyzes the reasoning behind the view that women are unstable, curious, frivolous creatures. He also notes that these charges are leveled against women, even as praise is heaped upon them for the conventional virtues they exhibit in their roles as wives and mothers. As the final installment in Duby's three-volume study of French noblewomen of the twelfth century, *Eve and the Church* is the last work of this superb historian. It will be of interest to scholars of medieval history and women's history as well as to anyone interested in current debates about women and religion. Georges Duby (1919-1996) was a member of the Académie française and for many years held the distinguished chair in medieval history at the Collège de France. His books

include *The Three Orders*; *The Age of Cathedrals*; *The Knight, the Lady, and the Priest*; *Love and Marriage in the Middle Ages*; and *History Continues*, all published by the University of Chicago Press.

In this book, now available in paperback, he examines the history of France from the rise of the Capetians in the mid-tenth century to the execution of Joan of Arc in the mid-fifteenth. He takes the evolution of power and the emergence of the French state as his central themes, and guides the reader through complex - and, in many respects, still unfamiliar, yet fascinating terrain. He describes the growth of the castle and the village, the building blocks of the new Western European civilization of the second millennium AD.

Organic Computing has emerged as a challenging vision for future information processing systems. Its basis is the insight that we will increasingly be surrounded by and depend on large collections of autonomous systems, which are equipped with sensors and actuators, aware of their environment, communicating freely, and organising themselves in order to perform actions and services required by the users. These networks of intelligent systems surrounding us open fascinating application areas and at the same time bear the problem of their controllability. Hence, we have to construct such systems as robust, safe, flexible, and trustworthy as possible. In particular, a strong orientation towards human needs as opposed to a pure implementation of the technologically possible seems absolutely central. The technical systems, which can achieve these goals will have to exhibit life-like or "organic" properties. "Organic Computing Systems" adapt dynamically to their current environmental conditions. In order to cope with unexpected or undesired events they are self-organising, self-configuring, self-optimising, self-healing, self-protecting, self-explaining, and context-aware, while offering complementary interfaces for higher-level directives with respect to the desired behaviour. First steps towards adaptive and self-organising computer systems are being undertaken. Adaptivity, reconfigurability, emergence of new properties, and self-organisation are hot topics in a variety of research groups worldwide. This book summarises the results of a 6-year priority research program (SPP) of the German Research Foundation (DFG) addressing these fundamental challenges in the design of Organic Computing systems. It presents and discusses the theoretical foundations of Organic Computing, basic methods and tools, learning techniques used in this context, architectural patterns and many applications. The final outlook shows that in the mean-time Organic Computing ideas have spawned a variety of promising new projects.

Carole Hillenbrand's book offers a profound understanding of the history of Muslims and their faith, from the life of Muhammad to the religion practised by 1.6 billion people around the world today. Each of the eleven chapters explains a core aspect of the faith in historical perspective, allowing readers to gain a sensitive understanding of the essential tenets of the religion and of the many ways in which the present is shaped by the past. It is an ideal introductory text for courses in Middle Eastern studies, in religious studies, or on Islam and its history.

This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as

we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

The Association of Illustrators' annual has been showcasing the very best of contemporary British illustration for over 30 years. Standing apart from other annuals by virtue of its jury-selected content, the Images back catalogue provides an ideal overview of the wealth and variety of illustration being produced in the UK today. Images 32 showcases 400 works selected by an international panel of judges, which includes award winning design duo, Non-Format, Menno Kluin, (Art Director at Saatchi and Saatchi in New York) and design consultant and acclaimed writer and editor of illustration magazine, Varoom, Adrian Shaughnessy.

Although Mann is considered to be a deeply German writer, at the time that he began writing, Germany itself was fairly new to the world. When *Death in Venice* was published in 1912, a unified Germany had existed for a mere 41 years. Although Mann moved to Munich after high school, he was always aware of being North German and felt his more somber and serious artistic sense put him at odds with other artists in Munich. The connection between Germany and Italy in his work has clear political relevance, as the two countries unified their fragmented areas to become nations at similar points of time in history (King Victor Emmanuel began to rule over a unified Italy in 1861). Mann wrote in the context of a number of literary styles. At the turn of the century, Naturalism reigned, and Mann sought to differentiate himself from writers such as Zola and Ibsen who faithfully transcribed even the most minute concrete details of daily life. In contrast to naturalist writers, Mann's precision is psychological, rather than physical. Specifically, Mann was influenced by other European masters including Tolstoy, whose epic sweep he admired, and Flaubert, whose labor over each and every sentence he emulated. Mann was also deeply indebted to the philosophy of Nietzsche, whose skeptical mode of analysis he adopted. Nietzsche claimed to be a great authority on the subject of decadence, and Mann's works focus almost exclusively on this topic, along with degeneracy and the decline of greatness.

"Star Wars meets Harry Potter." -The Readings of an English Teacher IGIST follows the challenges and triumphs of Emi, a 14 year-old Earthling girl that dreams of getting into the renowned Intergalactic Institute of Science and Technology, or IGIST. The odds are stacked against her however. As humanity has spread across the galaxy they have grown to look

down on the Bygones left on the brain-drained backwater of planet Earth and have no interest in stopping the Plague that ravages the people left there. As Emi strives to become the first Earthling in 20 years to gain admittance to IGIST she meets an incredible cast of out-of-this-world characters: business tycoons from the asteroid belt, yak-men of the Warden Corps, snobby Martians, holographic deep-space Scouts, and of course her droid sidekick Sadee. Immerse yourself in the universe of IGIST, and find out if Emi has what it takes to save her home. IGIST: New Stars is the first book in the YA Science Fiction series that is growing into an international phenomenon. Beloved by readers and critics alike, this story not only thrills its audience with an incredible adventure, but inspires them to help build the future they want to see. "Truly a one-of-a-kind experience for science fiction fans and lovers of technology!" -Literature Approved Download the free IGIST app on iOS and Android to make the story an Immersive Novel: see the black-and-white illustrations in the book transform into colorful animations and discover hidden gems in Augmented Reality.

La famiglia, la parentela, la sessualità, la socialità ma soprattutto il matrimonio nel Medioevo sono i temi affrontati in questo saggio dallo storico francese Georges Duby. A partire dal dodicesimo secolo, in Francia, due concezioni di matrimonio radicalmente diverse, quella aristocratica e quella ecclesiastica, si scontrarono e si adattarono l'una all'altra per garantire e perpetrare l'ordine sociale e l'ordine divino. Studiando casi di matrimonio di re e membri dell'aristocrazia, seguendone gli sviluppi attraverso una fitta ed estesa rete di incesti, bigamie e divorzi e mettendo in risalto il ruolo della donna nella società, l'autore ricostruisce la realtà quotidiana dell'istituzione matrimoniale presso l'alta aristocrazia, l'élite laica che allora iniziava a uscire dalla oscurità. Fulcro della sua indagine le pratiche del matrimonio in quanto elementi costitutivi della storia sociale e culturale del Medioevo. Riproposto nella collana le Silerchie arricchito dalla nuova e preziosa introduzione di Ida Magli, «Matrimonio medievale» continua a essere quel riferimento per la ricerca interdisciplinare sulla famiglia, la morale, la legislazione e il costume che, agli inizi degli anni ottanta, inaugurò un nuovo metodo d'indagine ampliando e rinnovando l'orizzonte degli studi storici attraverso l'uso libero e spregiudicato di strumenti provenienti da esperienze scientifiche diverse, dall'antropologia alla sociologia e alla etnologia.

This is an engaging account of the lives of high-born women in the Middle Ages, by one of the foremost historians in Europe. Focusing on France in the twelfth century, Duby recreates the image of women that the men of high society made for themselves. Using written evidence from the period - official texts written by men, all intended for public consumption and reading aloud - he tells the story of six very different women. These women - fictional and real, religious and secular - range from famous historical figures such as Eleanor of Aquitaine and Heloise, through Mary Magdalen, whose cult grew throughout the twelfth century, to Soredamors and Fenice, the heroines of Cligaves, the

romance of Chr&eacutetien de Troyes. Duby sets all of these women within their historical context, using their personalities to explore the characteristics of female existence during this period. He discusses relations between the sexes, including marriage and different types of love, and shows how women were feared, mistrusted and, sometimes, admired by men. He vividly reconstructs the French nobility's system of values, examining the place assigned to women within this system. He argues that men's attitudes to women began to change in the twelfth century and that women began imperceptibly to extricate themselves from masculine power. This important book - the first of three volumes on women in the Middle Ages - will be of interest to a wide readership.

Poetry. Translated from the French by Lee Fahnestock. First published in 1942 and considered the keystone of Francis Ponge's work, *Le parti pris de choses* appears here in its entirety. It reveals his preoccupation with nature and its metaphoric transformation through the creative ambiguity of language. "My immediate reaction to Lee Fahnenstock's translation was: this must certainly be 'Ponge's voice in English'...[She] gives us his tones, rhythms, humor...[and] maneuvers his word play with respect and unostentatious discretion"--Barbara Wright, translator of Queneau, Pinget, Sarraute.

In this beautifully written book, George's Duby, one of France's greatest medieval historians, returns to one of the central themes of his work - the relationship between art and society.

These two fragments of novels, Ingeborg Bachmann's only untranslated works of fiction, were intended to follow the widely acclaimed *Malina* in a cycle to be entitled *Todesarten*, or *Ways of Dying*. Although Bachmann died before completing them, *The Book of Franza* and *Requiem for Fanny Goldmann* stand on their own, continuing Bachmann's tradition of using language to confront the disease plaguing human relationships. Through the tales of two women in postwar Austria, Bachmann explores the ways of dying inflicted upon the living from outside and from within, through history, politics, religion, family, gender relations, and the self. Bachmann's allegiance to the twin muses of memory and history, as well as her perception of fascism as not being limited to the context of the war but also existing within the intimate relations of everyday life between husbands and wives, brothers and sisters, psychiatrists and patients' are supremely evident in *The Book of Franza*. Here, Bachmann follows a woman who escapes from a sanatorium and, after years of silence, sends her brother a cryptic telegram. Rightly suspecting that she has fled her sadistic husband -- a renowned Austrian psychiatrist whose intimate relations have merged with his studies of concentration camps -- her brother finds her in their childhood home. Together they travel to Egypt, where Franza slowly begins to regain her bearings. But Franza's desire to cleanse herself by journeying into the heart of the desert's void ends in tragedy, as she becomes the victim of a horrible act of violence. Unlike Franza, who attempts to flee her past but fails, the heroine of

Requiem for Fanny Goldmann makes no attempt to escape her history. This novel tells of the demise of a Viennese actress who is manipulated by a younger, ambitious playwright to advance his career. Deception follows disloyalty; the final treachery comes when the playwright portrays her in a novel, which secures his fame and, in Fanny's eyes, robs her of her future. Caught in a perpetual stasis, Fanny suffers in total obscurity, as her present is stolen from her as well. Whether analyzing the place where the self begins and the power of history ends or the ways in which women are forced to be complicit in their mistreatment at the hands of men, Bachmann's critical approach to the human psyche is unparalleled. Mesmerizing and profound, *The Book of Franza* and *Requiem for Fanny Goldmann* constitute the final evidence that Ingeborg Bachmann is the most important female German-language writer of the postwar period. Tommaso, a lean and hungry ex-husband, wants to take Leah to bed, and she is willing enough if he finds the missing film: money is to be made."--BOOK JACKET.

This is a major study on the book of Deuteronomy by an acclaimed expert in the field. Paying particular attention to the legal passages in Deuteronomy, Professor RofT seeks to clarify the contents and unity of each section, its literary history, the origin of the single laws and their relation to other kindred laws in other documents of the Pentateuch. Bringing together different methods of biblical study - traditional Jewish interpretation, classical biblical criticism, form criticism, history of tradition and textual criticism - the author argues that the roots of Deuteronomy lie in monarchial Israel and Judah, that the literary climax belongs to the seventh century BCE, and that the final stages of the text are exilic and early post-exilic.

Presents the correspondence of Thomas and Heinrich Mann

A spirited history of the changes that transformed Europe during the 1,000-year span of the Middle Ages: "A dazzling race through a complex millennium."—Publishers Weekly The millennium between the breakup of the western Roman Empire and the Reformation was a long and hugely transformative period—one not easily chronicled within the scope of a few hundred pages. Yet distinguished historian Chris Wickham has taken up the challenge in this landmark book, and he succeeds in producing the most riveting account of medieval Europe in a generation. Tracking the entire sweep of the Middle Ages across Europe, Wickham focuses on important changes century by century, including such pivotal crises and moments as the fall of the western Roman Empire, Charlemagne's reforms, the feudal revolution, the challenge of heresy, the destruction of the Byzantine Empire, the rebuilding of late medieval states, and the appalling devastation of the Black Death. He provides illuminating vignettes that underscore how shifting social, economic, and political circumstances affected individual lives and international events—and offers both a new conception of Europe's medieval period and a provocative revision of exactly how and why the Middle Ages matter. "Far-ranging, fluent, and thoughtful—of considerable interest to students of history writ large, and not just of Europe."—Kirkus Reviews, (starred review) Includes maps and illustrations

Explores the economics of Europe in the early Middle Ages.
