This modern approach is organized around learning objectives and matched with sound assessment tools aimed at enhancing students' analytical and critical thinking competencies. Students and faculty will find content that breaks down barriers between what goes on in the classroom and what is going on in our nation and broader world. By teaching the right questions to ask, Karlan and Morduch provide readers with a method for working through decisions they'll face in life and ultimately show that economics is the common thread that enables us to understand, analyze, and solve problems in our local communities and around the world.
