This book contains archive quality photos and features a complete history of International Harvester Australia with important dates such as the first Australian tractor built, the 10,000th tractor build date and more than 200 photos from International Harvester Australia Archives. It also contains detailed descriptions of every tractor made at Geelong Works, complete with build numbers of tractors produced and monthly serial number listing for tractors made from 1960-1982. This book also features a full list of headers (combines) built at Geelong Works - both self-propelled and PTO driven, with build numbers. It also includes a comprehensive list of implements built at Geelong Works. A must have for every International Harvester enthusiast! America's favorite small farm tractor is retrieved from the shed and shined up for duty in this essential guide by tractor repair expert Rachel Gingell and long-time writer Kenneth Updike. The Farmall Cub Encyclopedia is a comprehensive manual for any self-starter, at-home historian, or backyard farmer. Providing step-by-step instruction for maintenance and repair from oil changes to charging system snags, as well as user tips and a buyer's checklist, the Farmall Cub Encyclopedia will give you the confidence and know-how to buy, repair, and use your very own Farmall Cub. With instructional photographs, vintage advertisements, and contemporary images, this illustrated companion is at home on both the workshop bench and the living room coffee table. The book also includes an in-depth history of all models and a vast list of implements to adapt your tractor to any need, making it both an introduction and an authoritative resource for the novice and experienced tractor owner alike.

As insightful and wise today as it was when originally published in 1954, Jacques Ellul's *The Technological Society* has become a classic in its field, laying the groundwork for all other studies of technology and society that have followed. Ellul offers a penetrating analysis of our technological civilization, showing how technology—which began innocuously enough as a servant of humankind—threatens to overthrow humanity itself in its ongoing creation of an environment that meets its own ends. No conversation about the dangers of technology and its unavoidable effects on society can begin without a careful reading of this book. "A magnificent book . . . He goes through one human activity after another and shows how it has been technicized, rendered efficient, and diminished in the process."—Harper's "One of the most important books of the second half of the twentieth-century. In it, Jacques Ellul convincingly demonstrates that technology, which we continue to conceptualize as the servant of man, will overthrow everything that prevents the internal logic of its development, including humanity itself—unless we take necessary steps to move human society out of the environment that 'technique' is creating to meet its own needs."—The Nation "A description of the way in which technology has become completely autonomous and is in the process of taking over the traditional values of every society without exception, subverting and suppressing these values to produce at last a monolithic world culture in which all non-technological difference and variety are mere appearance."—Los Angeles Free Press

NATIONAL BESTSELLER • WINNER OF THE PULITZER PRIZE • A searing, post-apocalyptic novel about a father and son's fight to survive, this "tale of survival and the miracle of goodness only adds to McCarthy's stature as a living master. It's gripping, frightening and, ultimately, beautiful" (San Francisco Chronicle). A father and his son walk alone through burned America. Nothing moves in the ravaged landscape save the ash on the wind. It is cold enough to crack stones, and when the snow falls it is gray. The sky is dark. Their destination is the coast, although they don't know what, if anything, awaits them there. They have nothing; just a pistol to defend themselves against the lawless bands that stalk the road, the clothes they are wearing, a cart of scavenged food—and each other. *The Road* is the profoundly moving story of a journey. It boldly imagines a future in which no hope remains, but in which the father and his son, "each the other's world entire," are sustained by love. Awesome in the totality of its vision, it is an unflinching meditation on the worst and the best that we are capable of: ultimate destructiveness, desperate tenacity, and the tenderness that keeps two people alive in the face of total devastation.

If you enjoyed Leffingwell's best-selling *The American Farm Tractor*, this stunning volume is an absolute must read! *International Harvester Tractors* beautifully chronicles the history of IH tractors, from the very first tractor through the IH ag division's merger with Case in 1985. In addition to hundreds of nostalgic Farmall and IH photographs Leffingwell serves up an unprecedented collection of rare and unusual machines. The machines Leffingwell found in his travels across the US will surprise and delight even the hard-core IH fan! Exceptionally well produced in classic Leffingwell style. Recommended.

The developmental history of the tractors built by the dominant agricultural manufacturer of the early 20th Century, International Harvester, is dramatically told in *The Farmall Dynasty*. The book traces the evolution of the Farmall tractor from the early Titans and Moguls through to modern times. The book includes well-researched accounts of the development of the original Farmall, the Letter Series, 4100, Cub, and other legendary IHC tractors, with first-hand accounts from factory engineers describing the challenges they faced.

This authorized history of International Harvester and Case-IH tractors includes data and photos of every model built from 1958 to 2013, as well as in-depth information about how these tractors were designed and constructed. The story traces the innovations and struggles of the final days of International Harvester, and then the exciting story of the creation of the Case-IH Magnum, an innovative machine that blends some of the great engineering done by International Harvester in their final days with thoughtful engineering additions and refinements from the newly blended team. With a mix of new photography of some of the most exceptional collectible models in existence along with hundreds of previously unpublished photographs from the IH and Case-IH archives, this thorough book is the most authoritative guide on red tractors ever published.

Popular Mechanics inspires, instructs and influences readers to help them master the modern world. Whether it's practical DIY home-improvement tips, gadgets and digital technology, information on the newest cars or the latest breakthroughs in science -- PM is the ultimate guide to our high-tech lifestyle.

In an examination of the disastrous fall of International Harvester Company, this book details the powerful forces that have undermined American industry and the dizzying succession of management blunders that are being repeated throughout American companies.

A supplemental textbook for middle and high school students, *Hoosiers and the American Story* provides intimate views of individuals and places in Indiana set within themes from American history. During the frontier days when Americans battled with and exiled native peoples from the East, Indiana was on the leading edge of America's westward expansion. As waves of immigrants swept across the Appalachians and eastern waterways, Indiana became established as both a crossroads and as a vital part of Middle America. Indiana's stories illuminate the history of American agriculture, wars, industrialization, ethnic conflicts, technological improvements, political battles, transportation networks, economic shifts, social welfare initiatives, and more. In so doing, they elucidate large national issues so that students can relate personally to the ideas and events that comprise American history. At the same time, the stories shed light on what it means to be a Hoosier, today and in the past.
