

Mcdougal Littell Resource Book Geometry Chapter 8

This book has been written so that all students can understand geometry. The course focuses on the key topics that provide a strong foundation in the essentials of geometry. Lesson concepts are presented in a clear, straightforward manner, supported by frequent worked-out examples. The page format makes it easy for students to follow the flow of a lesson, and the vocabulary and visual tips in the margins help students learn how to read the text and diagrams. Checkpoint questions within lessons give students a way to check their understanding as they go along. The exercises for each lesson provide many opportunities to practice and maintains skills, as well as to apply concepts to real-world problems.

- p. ii.

Contains a wide variety of blackline masters organized by lesson, included are support materials for teachers as well as practice activities, applications, and assessment resources.

Essentials of geometry -- Reasoning and proof -- Parallel and perpendicular lines -- Congruent triangles -- Relationships within triangles -- Similarity -- Right triangles and trigonometry -- Quadrilaterals -- Properties of transformations -- Properties of circles -- Measuring length and area -- Surface area and volume of solids.
