This remarkable anthology introduces the short fiction of fourteen writers, major figures in the literary movements of three generations, who represent a range of class, ethnic, age, and political perspectives. It is filled with "unexpected gems", writes Scarlet Cheng in *Belles Lettres*, including Lin Hai-yin's story of a woman suffering under a feudal system that dominated Old China; Chiang Hsiao-yun's optimistic solutions to problems of the elderly in the rapidly changing Taiwan of the 1980; and in between, a dozen richly diverse stories of aristocrats, comrades, wices, concubines, children, mothers, sexuality, rape, female initiation, and the tensions between traditional and modern life. "This is not western feminism with an Asian accent", says *Bloomsbury Review*, "but a description of one culture's reality... The woman protagonists survive both despite and because of their

O'Reilly - an experienced, award winning teacher - has students tackle fascinating historical questions that put students in the shoes of a range of people from the past, from the rich and famous to ordinary citizens. Each lesson can be done either as an in-depth activity or as a "quick motivator." Detailed teacher pages give step-by-step instructions, list key vocabulary terms, offer troubleshooting tips, present ideas for post-activity discussions, and furnish lists of related sources. An international team of distinguished scholars have each contributed a chapter to produce an advanced, full length, physical geography of Africa. The first part provides an overview of both pan-Africa patterns in the physical environment and those attributes of African physical geography that are distinctive by considering the development of the main features through time. The authors also provide a synoptic review of Francophone and Anglophone literature on the subject, discuss the present state of knowledge, and set out the work and methods that have created it. This part is followed by a group of chapters that integrate such topics as geomorphology, biogeography, environmental change and hydrology within each of the major biomes - forest, savannah, desert, coast, wetland, mountain, Mediterranean and Rift Valley - found in the African continent. Finally there is a section in which various authors look at topical issues concerned with the impact of human activity on the environment. Conservation and development are considered in the light of issues such as soil erosion, desertification, and biodiversity and biodepletion. The authors have produced this integrated physical geography in honour of A.T. Grove as a durable reference work which gives a new perspective on the continent of Africa.
