In *Organizational Behavior: Solutions for Management*, Paul Sweeney and Dean McFarlin have identified 4 key management skills areas that act as building blocks for successful behavior in management. These skills are: self-insight/perceptual skills; ability to inspire/motivate/lead; ability to analyze situations; and personal flexibility/adaptability. The authors also feel strongly that successful management of organizational behavior rests on the problem-solving process; in fact, the 4 skills listed above enable managers to use this process to deal with the "people problems" they face more effectively. If nothing else, studying what organizational behavior has to offer as a field should help a person figure out his/her strengths and weaknesses.

"Organizational behavior is the study of individual and group dynamics within an organization setting (micro level of analysis), whereas, organization theory is the study of the organization as a whole (macro level of analysis). In other words, organizational behavior is the psychology of organizations and organizational theory is the sociology of organizations (Daft, 2004)"--

BEHAVIOR IN ORGANIZATIONS, 9/e, by Shani and Lau, is a paperback text that takes a hands-on, experiential approach (learning-by-doing or learning-in-

action) to organizational behavior. The majority of the exercises, role-playing simulations, and cases were developed in and for management training workshops. The cases themselves represent different industries and organizations around the globe with diverse size, product, service, and cultures. Instructors appreciate the multiple interactive teaching methods for each teaching module. Experiential methods provide a powerful stimulus for learning, growth, and change by helping participants focus on their own behaviors and reactions as data. The text begins with structured, less personal exercises that are readily recognized as relevant to human effectiveness in organizational settings. Personal growth and self-understanding activities are introduced later in the text, after students have had enough experience to become more comfortable and ready for them. The ninth edition of this book, like the previous editions, is designed to meet needs that other texts do not satisfy.

A first-of-its-kind, this book proposes a marketing plan for the police, using the conventional framework of marketing management. While there is considerable discussion and criticism of the way the police force functions in India, no comprehensive alternative model has been proposed to implement the New Police Management (NPM) approach in the force's operations. In fact, the necessity for overhauling the police system is strongly felt all over the world in the light of the recent international security lapses. The framework that this book suggests comprises current situation analysis, SWOT analysis, STP analysis and the 8 Ps. Policing:

Reinvention Strategies in a Marketing Framework combines marketing principles with the empirical knowledge of police operations to suggest improvements in the Indian police force. It uses the marketing motto of 'keeping the customer at the centre' as key to finding solutions to the issues that the police face in their everyday operations. In addition, it carries case studies related to police operations from across the world and suggests ways of adapting the strategies used in these to the Indian context. In doing so, the book offers valuable inputs for police academies, public administration, public policy, and state security commissions, as it not only analyses the current situation in the police force, but also draws a clear and practicable roadmap to revamp it.

The Fifth Edition of Organizational Behavior targets undergraduates and MBA programs and is the most current text on the market. Kreitner and Kinicki's approach to organizational behavior is based on the authors' belief that reading a comprehensive textbook is hard work, but that the process should be interesting (and sometimes fun). Thus, they consistently attempt to find a way to make complex ideas understandable through explanations, contemporary examples, and/or learning exercises. Wolves remain as a central theme because Kreitner and Kinicki see wolves as an instructive and inspiring metaphor for modern Organizational Behavior. Wolves are dedicated team players, great communicators, and adaptable. These are key success attributes in today's workplace. Kreitner and Kinicki is user driven; the authors have made extensive

improvements to the text, based on reviewer and adopter feedback, as well as their own experiences teaching from the text.

"Supervision is arranged with an emphasis on inquiry learning, which raises penetrating questions, shows you the key concepts in a clear and concise manner, and follows up that material with a wide variety of exercises, applications, and margin notes ..." --BOOK COVER.
