This official Microsoft study guide helps the reader prepare for the skills measured by MCITP Exam 70-646. Readers can work at their own pace through a series of lessons and reviews that cover each exam objective. Real-world case scenarios and practice exercises are included.

According to MS, a server administrator is responsible for the operations and management of an infrastructure of Windows Server 2008 R2 servers in an enterprise environment. Exam 70-646: Windows Server 2008, Server Administrator covers these topics: Planning for Server Deployment Planning for Server Management Monitoring and Maintaining Servers Planning Application and Data Provisioning Planning for Business Continuity and High Availability The 693 exam deals specifically with virtualization. Topics covered include: Designing a Virtualization Strategy Designing the Physical and Virtual Infrastructure Designing a Highly Available Virtual Environment Designing a Deployment Strategy Designing a Management Strategy The two exams share many common elements so we recommend that you study for both together. We give you knowledge information relevant to the exam specifications. To be able to succeed in the real exams, you'll need to apply your earned knowledge to the question scenarios. Many of the exam questions are written to be less straight forward. They tend to be framed within the context of short scenarios. The exams are not too difficult. However, coverage is very comprehensive - a wide range of topics are presented in the official topic lists.
