Complete with sample papers, this book provides everything you need for the written parts of the MRCPsych and comparable hi

The first two editions of Forensic Pathology have been highly touted as the definitive, go-to text reference on forensic pathology and this latest edition is no exception. DiMaio's Forensic Pathology, Third Edition is fully updated to include the many advancements that have occurred in the field over the last 20 years since the last edition was published. Joining Dr. Vincent DiMaio is practicing forensic pathologist Dr. Kimberley Molina who brings her expertise to the latest edition of this all-time best-selling work. Historical chapters have been reviewed and updated, and the natural disease and toxicology chapters have been streamlined, so as to expand on the new improvements in the field. New content includes discussions on chronic traumatic encephalopathy, sudden unexplained infant deaths, deaths in the elderly and blast injuries – among other topics. Chapters incorporate changes to death investigation, forensic DNA typing and other relevant fields relative to forensic pathology and determination of death. In addition, the third edition includes an entirely new – and long-sought-after – chapter summarizing Dr. DiMaio's world-renowned expertise on gunshot wounds. Key Features Includes over 400 full-color images illustrating key concepts Boasts new chapters on gunshot wounds, mass fatality incidents and the application of forensic science principles to forensic pathology practice Provides updated and expanded coverage of medicolegal death investigation, postmortem changes, time of death, deaths in custody, deaths in the elderly and drug-related deaths Presents new research and advanced techniques, ranging from chronic traumatic encephalopathy to new and emerging drugs DiMaio's Forensic Pathology, Third Edition maintains its concise, easy-to-read format with completely updated references and over 400 full-color demonstrative photographs and photomicrographs to illustrate concepts – making it appealing not only to forensic pathologists, but also law enforcement personnel and attorneys. This highly anticipated work continues Dr. DiMaio's long legacy of producing invaluable educational and professional resources.

Written specifically for those candidates about to sit for the FRCR part II examination, the format will also be of use to other trainee radiologists who are not specialists in this field. It contains a number of multiple choice questions covering all aspects of nuclear medicine with particular emphasis on the more common techniques, ie bone, renal and lung scanning. Extensive use is made of review articles, and important articles in the major nuclear medicine journals and references are provided.

New York City has the largest medical examiner's office in the United States, and the Brooklyn division is the busiest of the five boroughs. Charles A. Catanese received his Forensic Pathology fellowship training in New York, and then worked full time as a Medical Examiner in the Brooklyn office for more than 10 years. He has personally performed more than 4000 autopsies, including over 400 homicides. Dr. Catanese has worked through several disasters, including TWA Flight 800, AA Flight 587, and more than nine months on the World Trade Center fatalities. He is currently the Chief Medical Examiner of Orange County, New York. Drawing on his wealth of knowledge and experience in solving some of the most difficult cases a forensic examiner could encounter, he assembles hundreds of images from his own work experience to present the Color Atlas of Forensic Medicine and Pathology. Featuring twice the number of images as any other forensic pathology atlas, the book is filled with high-resolution photos that demonstrate postmortem changes of the human body and the different types of patterns produced in deaths caused by: Natural causes Diagnostic or therapeutic procedures Substance abuse Poisoning Child abuse Firearms Blunt instruments Sharp instruments Burns Asphyxia This easy-to-read atlas, created for medical and non-medical personnel, covers basic and advanced forensic concepts that relate to all manners of deaths. The carefully worded, unambiguous text describing each photo and the side-by-side comparisons of similar, yet different, pathologies make this remarkable atlas a powerful teaching tool for all those who must confront and solve the mystery of human demise. A fully searchable DVD version is also available.

There has been a marked change in examination strategy over the last five years; EMQs (extended matching questions) are popular with tutors and students alike as they present a more realistic view of a student's ability to apply his or her knowledge in a clinical situation. The new edition of MCQs in Physiology has been subject to a complete overhaul to become MCQs and EMQs in Physiology. This reflects the current methods of examination techniques and will provide the student with a complete revision resource book. Packed with MCQs and EMQs along with clear and simple explanations of each answer, this book covers all the main physiological systems. The questions stretch from basic to applied and interpretative and are written with the modern integrated syllabus firmly in mind. Presented alongside other core revision books such as EMQs in Clinical Medicine this book will soon be seen as a must-have for any medic's shelf.

The radiological abnormalities associated with suspected child abuse can be extremely subtle. If missed, a baby or child may be returned to an environment where episodes of abuse may escalate. Similarly, a wrongful diagnosis can lead to an infant being removed from loving carers. This atlas will be of particular use to radiologists (both in training and at consultant level), and also to other doctors who may be

first in line to encounter suspected abuse, including paediatricians, accident and emergency doctors, orthopaedic surgeons and pathologists. It uses numerous radiographs from Professor Hall's collection amassed over three decades, including many examples of the sorts of difficult cases and normal variants that are found in day to day practice. It offers assistance with the initial interpretation of what are often difficult and subtle findings in the emotionally charged environment that frequently exists when child abuse is suspected.

This work features a Foreword by David Taylor, Vice Dean, Leicester Medical School. "This book is the first to assist students with a new format of testing knowledge and clinical skills, i.e., the extended matching question. I am delighted my colleagues here in Leicester, where undergraduate education is given the very highest priority, have found the time and energy to write this book. This book comprehensively tests a whole range of obstetrics and gynaecology and I congratulate them for it." - David Taylor, in the Foreword. This revision aid in Obstetrics and Gynaecology is based on the Extended Matching Question format (EMQ). It contains over 200 patient vignettes arranged in topic areas covering a broad range of themes and degrees of difficulty. It provides test EMQs and detailed answers at the completion of each section. "EMQs in Obstetrics and Gynaecology" is an indispensable study and revision aid for undergraduate medical students preparing for in-course assessment in obstetrics and gynaecology as well as final exams. It also provides a vital review for specialist trainees in obstetrics and gynaecology preparing to take postgraduate exams.

The book takes each element of the FRCA exam and provides tips and techniques on how to approach the different types of questions, and includes worked examples with answers, so that you can undertake your revision accordingly. It will help you to target your revision so you can cover the breadth of topics in the FRCA syllabus and ensure that you structure your revision in an efficient way, as well as helping you to approach the exam and convey your knowledge through writing or speech correctly. Taking many common problems candidates face when preparing for this exam, the book covers motivation, effective studying, managing nerves, and scheduling time to study amongst other commitments.

Self assess yourself before actual exam. Practice with 200 MCQs of Forensic Medicine and compare your answers with the one given in answer book with explanation. Enhance your NEET PG score.

So what's so special about doctors and their families? Many doctors feel that they are expected to give too much of their time to a medical career to the detriment of their family and their personal lives. This book is a practical guide to provide support and ideas on how to cope with stresses directly suffered or passed on from a relative or spouse. Written in a clear and practical style using information collated from family members describing their feelings about having a doctor in the family it provides unique and vital information on how to minimise the effects of having a medical career on the family. Essential reading for doctors and their families.

This book is an invaluable tool for studying and reviewing key concepts in forensic pathology. Written in a question-and-answer format, this accessible guide tests readers' knowledge of manner of death, patterns of injury, lab data interpretation, postmortem radiography and imaging, and much more. Over 300 questions, more than half with visual examples, cover both common and more unusual examples of forensic pathology seen in practice. A great resource for preparing for examinations including the American Board of Pathology examination. It provides answers with explanatory rationales for both correct and incorrect answers.
