

## Meganiese Tegnologie Handboek

"World of Letters retrieves an important but largely forgotten history of readers, reading practices and cultural debates in early apartheid South Africa. Corinne Sandwith pursues this history in the ephemeral spaces of oppositional newspapers, literary magazines, debating societies and theatre groups. What emerges from the diverse fragments is a rich tradition of public debate in South Africa on literature and culture. What also surfaces are a host of readers and critics - such as A.C. Jordan, Dora Taylor, Jack Cope and Ben Kies - whose lively cultural interventions form a significant part of South Africa's literary-cultural and socio-political heritage. Offering a combination of historical narrative, critical analysis and biography, this elegantly written book recovers these neglected reading and debating communities in order to bring them into the present and to reclaim their constitutive role in both the literary archive and the public sphere." -- Back page.

In this remarkable book, Carl Verheyen teaches his philosophy and techniques for improvising. Rather than hashing out scales, Carl teaches how to play lines with strong melodic content. By approaching melodies through intervals and chord qualities, infinite lines can be generated. Carl stresses the importance of collecting lines that can be used in improvised settings. These lines and examples will provide outstanding material for any guitarist yearning for melodic ideas and inspiration. Presented in standard notation and tab.

This edited book brings together an international cast of contributors to examine how academic literacy is learned and mastered in different tertiary education settings around the world. Bringing to the fore the value of qualitative enquiry through ethnographic methods, the authors illustrate in-depth descriptions of genre knowledge and academic literacy development in first and second language writing. All of the data presented in the chapters are original, as well as innovative in the field in terms of content and scope, and thought-provoking regarding theoretical, methodological and educational approaches. The contributions are also representative of both novice and advanced academic writing experiences, providing further insights into different stages of academic literacy development throughout the career-span of a researcher. Set against the backdrop of internationalisation trends in Higher Education and the pressure on multilingual academics to publish their research outcomes in English, this volume will be of use to academics and practitioners interested in the fields of Languages for Academic Purposes, Applied Linguistics, Literacy Skills, Genre Analysis and Acquisition and Language Education.
