as well as increased information on the applications of DSM-IV diagnoses are covered.

This guide covers psychological first aid which involves humane, supportive and practical help to fellow human beings suffering serious crisis events. It is written for people in a position to help others who have experienced an extremely distressing event.

The 3rd edition Youth MHFA Manual (2013) was written to accompany the 14-hr Youth MHFA Course.

Caregivers and teachers need to know what to do when a child is injured or becomes suddenly ill. Most injuries that require first aid care are not life-threatening. However, first aid can sometimes mean the difference between life and death. This course is designed to give caregivers and teachers the education they need to effectively care for children.

This manual is designed to orient helpers to offer psychological first aid (PFA) to people following a serious crisis event. PFA involves humane, supportive and practical assistance for people who are distressed, in ways that respect their dignity, culture and abilities. The instructions and materials in this manual are for a half-day orientation (4 hours excluding breaks) to prepare helpers to support people recently affected by very stressful events. If you have more time available for the orientation, extra activities and slides are included in text boxes to deliver a full day orientation (five and a half hours excluding breaks). Where possible, one should organize full day orientations to allow for deeper learning. It is important to adapt the orientation and materials to the local culture, language and context, and to the likely kinds of crisis situations in which your participants would be helping. This facilitator's manual is to be used together with Psychological First Aid: Guide for Field Workers.

The First Aid Manual is the UK's only fully authorised first aid guide, endorsed by St John Ambulance, St Andrew's First Aid and the British Red Cross and packed with step-by-step first aid advice. Used as the official training manual for the UK's leading first aid organisations' courses, the bestselling First Aid Manual covers all aspects of first aid, from emergency first aid and first aid for babies and children, to the latest guidelines on resuscitation, helping a drowning casualty, and snake bites. Find out how to treat over 100 different conditions from splinters and sprained ankles to strokes and unresponsiveness and how to use essential equipment including a defibrillator. Step-by-step photography, all shot in-situ to reflect real-life issues, shows you what to do in any situation. The ideal first aid book for you and your family, keep the First Aid Manual handy; it could be a life-saver. (Previous edition ISBN 9781409342007)

The 2nd edition Standard MHFA Manual (2010) was written to accompany the 12hr Standard MHFA Course.

Focuses on understanding cultural and psychosocial contexts to promote optimal healing for disaster survivors This is the first book for mental health professionals working with survivors of mass trauma to focus on the psychosocial and culture contexts in which these disasters occur. It underscores the importance of understanding these environments in order to provide maximally effective mental health interventions for trauma survivors and their communities. Global in scope, the text addresses the foundations of understanding and responding to the mental health needs of individuals and groups healing from traumas created by a wide range of natural and human-made critical events, including acts of terrorism, armed conflict, genocide, and mass violence by individual perpetrators. Designed for professional training in disaster mental health, and meeting CACREP standards, the text promotes the knowledge and skills needed to work with the psychosocial aspects of individual and group adaptation and adjustment to mass traumatic experience. Reflecting state-

of-the-art knowledge, the book offers detailed guidelines in assessment and brief interventions related to survivors' posttraumatic stress symptoms and complex trauma associated with being at the epicenter of extraordinary stressful and traumatic events. In addition, this book also covers critical issues of self-care for the professional. Illustrated with first-person accounts of disaster survivors and case scenarios, this book emphasizes how counselors and other mental health professionals can foster resilience and wellness in individuals and communities affected by all types of disasters. Key Features: Considers disaster and mass trauma response from a culturally and globally relevant perspective—the first book of its kind Addresses CACREP's clinical standards and content areas related to disaster mental health response Covers many types of disasters and categories of survivors Includes updated information on PTSD, complex trauma, and self-care Addresses cultivating resiliency in individual and group survivors along with social justice issues

Mental Health First Aid Manual MENTAL HEALTH FIRST AID MANUAL Second Edition Mental Health First Aid Manual From the theme resorts of Dubai to the jungles of Papua New Guinea, a disturbing but hilarious tour of the exotic east—and of the tour itself Sick of producing the bromides of the professional travel writer, Lawrence Osborne decided to explore the psychological underpinnings of tourism itself. He took a six-month journey across the so-called Asian Highway—a swathe of Southeast Asia that, since the Victorian era, has seduced generations of tourists with its manufactured dreams of the exotic Orient. And like many a lost soul on this same route, he ended up in the harrowing forests of Papua, searching for a people who have never seen a tourist. What, Osborne asks, are millions of affluent itinerants looking for in these endless resorts, hotels, cosmetic-surgery packages, spas, spiritual retreats, sex clubs, and "back to nature" trips? What does tourism, the world's single largest business, have to sell? A travelogue into that heart of darkness known as the Western mind, *The Naked Tourist* is the most mordant and ambitious work to date from the author of *The Accidental Connoisseur*, praised by *The New York Times Book Review* as "smart, generous, perceptive, funny, sensible."

Community-Based Psychological First Aid: A Practical Guide to Helping Individuals and Communities during Difficult Times presents a practical method for helping those in need in difficult times. No advanced training in psychology is needed to use it. Injuries from disasters, terrorist events, and civil unrest are not just physical. These events also cause psychological trauma that can do lasting damage. Psychological First Aid (PFA) draws on human resilience and aims to reduce stress systems and help those affected recover. It is not professional psychotherapy, and those providing this kind of aid do not need a degree to help. Gerard Jacobs has developed this community-based method of delivering PFA over 20 years and has taught it in over 30 countries. Along with the easy-to-follow method, Jacobs includes examples of how this works in action in different situations, and presents scenarios to practice. Unique in its approach of community

engagement to train community members to help each other, this guide is an excellent resource for local emergency managers to engage in whole community emergency management. Presents a proven method for helping to alleviate the mental health effects of disasters, terrorist attacks, civil unrest, and other community stressors Offers a community-based model developed and taught by an international expert for over 20 years, requiring no advanced training or education in psychology to use Provides techniques that are adaptable to individual communities or cultures Outlines practices for self-care while helping others to prevent burnout Includes case studies, scenarios, and key terms to help facilitate community training

Few arguments in biomedical experimentation have stirred such heated debate in recent years as those raised by animal research. In this comprehensive analysis of the social, political, and ethical conflicts surrounding the use of animals in scientific experiments, Barbara Orlans judges both ends of the spectrum in this debate -- unconditional approval or rejection of animal experimentation -- to be untenable. Instead of arguing for either view, she thoughtfully explores the ground between the extremes, and convincingly makes the case for public policy reforms that serve to improve the welfare of laboratory animals without jeopardizing scientific endeavor. This book presents controversial issues in a balanced manner based on careful historical analysis and original research. Different mechanisms of oversight for animal experiments are compared and those that have worked well are identified. This compelling work will be of interest to biomedical scientists, ethicists, animal welfare advocates and other readers concerned with this critical issue.

ABORIGINAL AND TORRES STRAIT ISLANDER Mental Health First Aid Manual

Prescriptive and unique, Emotional First Aid is essential reading for anyone looking to become more resilient, build self-esteem, and let go of the hurts and hang-ups that are holding them back. We all sustain emotional wounds. Failure, guilt, rejection, and loss are as much a part of life as the occasional scraped elbow. But while we typically bandage a cut or ice a sprained ankle, our first aid kit for emotional injuries is not just understocked—it's nonexistent. Fortunately, there is such a thing as mental first aid for battered emotions. Drawing on the latest scientific research and using real-life examples,

practicing psychologist Guy Winch, Ph.D. offers specific step-by-step treatments that are fast, simple, and effective.

Established for fifteen years as the standard work in the field, Melvin Lewis's *Child and Adolescent Psychiatry: A Comprehensive Textbook* is now in its Fourth Edition. Under the editorial direction of Andrés Martin and Fred R. Volkmar—two of Dr. Lewis's colleagues at the world-renowned Yale Child Study Center—this classic text emphasizes the relationship between basic science and clinical research and integrates scientific principles with the realities of drug interactions. This edition has been reorganized into a more compact, clinically relevant book and completely updated, with two-thirds new contributing authors. The new structure incorporates economics, diversity, and a heavy focus on evidence-based practice. Numerous new chapters include genetics, research methodology and statistics, and the continuum of care and location-specific interventions. A companion Website provides instant access to the complete, fully searchable text.

Psychological first aid, or PFA, is designed to mitigate the effects of acute stress and trauma and assist those in crisis to cope effectively with adversity. PFA is designed to be applied in emergencies, including disasters and terrorist attacks. In this essential guide, George S. Everly, Jr., developer of the Johns Hopkins RAPID PFA method, and Jeffrey M. Lating, his collaborator in its implementation, describe the principles and practices underpinning this psychological model in an easy-to-follow, prescriptive, and practical manner. They explain the history of PFA and persuasively demonstrate its powerful versatility. Mental health practitioners can apply PFA in all settings. It can also be used as a public-health tool to address mental health needs following critical incidents and as a means for building community resilience. Aimed at mental health practitioners, all first responders, and global health disaster teams such as Médecins Sans Frontières and the World Health Organization, *The Johns Hopkins Guide to Psychological First Aid* is the first book to thoroughly explain RAPID PFA. RAPID, a unique theoretically grounded and evidence-based PFA method, follows a set of easily understood principles. In each chapter, Everly and Lating provide a step-by-step approach and include a key point summary to emphasize essential elements. A unifying case exemplifies each phase of the RAPID PFA model in an ongoing dialogue that presents ideal PFA responses, examples of common mistakes, and various outcomes. In addition to

their counseling experience in Kuwait after the Gulf War and in New York City after the September 11 attacks, the authors have traveled nationally and internationally to teach the RAPID PFA method in numerous public health, fire, police, military, and faith-based settings. Beneficial to those with little or no previous mental health training, this book is an essential tool for people who want to learn, to practice, or to retain their ability to use psychological first aid effectively.
