For over 25 years Rob Siegel has written a monthly column called "The Hack Mechanic" for the BMW Car Club of America's magazine Roundel. In *Memoirs of a Hack Mechanic*, Rob Siegel shares his secrets to buying, fixing, and driving cool cars without risking the kids' tuition money or destroying his marriage. And that's something to brag about considering the dozens of cars, including twenty-five BMW 2002s, that have passed through his garage over the past three decades. With a steady dose of irreverent humor, *Memoirs of a Hack Mechanic* blends car stories, DIY advice, and cautionary tales in a way that will resonate with the car-obsessed (and the people who love them).

It has been produced in partnership with ATT Training and is a companion to their online learning resources. Learning is made more enjoyable and effective as the topics in the book are supported with online activities, video footage, assessments and further reading. If you are using ATT Training materials then this is the ideal textbook for your course"--

"Architecture is a social art. If the practice of architecture is the art of what you can make happen, then I believe that you are only as good as your bullpenthe builders, the engineers, the artisans, the colleagues, the staffwho collaborate with you; those who become possessed by the same urge to build, by the same belief that we are working on something exceptional together." uses his family farm on the east coast of Nova Scotia for a special event. Among the stone ruins of a village almost four hundred years old, he assembles a community of architects, professors, and students for a design-build internship and educational initiative called Ghost Research Lab. The two-week project—one week of design and one week of construction—rests on the idea that architecture is not only about building but also about the landscape, its history, and the community. Based on the apprenticeship environment of ancient guilds, where architectural knowledge was transferred through direct experience, Ghost redefines the architect as a builder who cultivates and contributes to the quality of the native landscape. Published to celebrate the event's tenth anniversary, Ghost offers a thorough documentation of the past decade's design-build events including drawings, models, and final photographs of completed structures. Organized chronologically and interwoven with MacKay-Lyons's simple and accessible personal narratives, Ghost also features essays by some of the most eminent figures in architectural criticism, including Christine Macy, Brian Carter, Karl Habermann, Robert Ivy, Kenneth Frampton, Thomas Fisher, Juhani Pallasmaa, Peter Buchanan, and Robert McCarter. In an architectural climate full of trends and egos, Ghost is the rare manifesto that does not preach but rather inspires quietly with simple ideas that
