Would Jesus baptize children by pouring or sprinkling? Would Jesus enter a Catholic church with all those images that violate the second commandment? Would Jesus embrace some of the pope's titles, including that of Pontifex Maximus conferred by Sol Invictus, the sun god? Would Jesus join the pope for Sunday worship instead of Saturday worship? Top-ranking positions and triumphs, such as at the legendary twenty-four-hour endurance race in Le Mans or the Carrera Panamericana in Mexico, are not a long time in the coming and as early as 1952 secure a place for the Stuttgart-based make in the worldwide motor sports scene. The racing car achieved particular fame for its unusual gull-winged doors, which turn the production sports car 300 SL, introduced in 1954 and directly derived from the W 194, into one of the lasting icons in automobile history. The book provides exhaustive and authentic documentation of the technical development of the W 194 based on extensive research in the archives of Mercedes-Benz Classic: all of the races as well as the biography of each individual vehicle are presented with the aid of in part unpublished images and illustrations. It was the most brutal corporate restructuring in Wall Street history. The 2015 bankruptcy brawl for the storied casino giant, Caesars Entertainment, pitted brilliant and ruthless private equity legends against the world's most relentless hedge fund wizards. In the tradition of Barbarians at the Gate and The Big Short comes the riveting, multi-dimensional poker game between private equity firms and distressed debt hedge funds that played out from the Vegas Strip to Manhattan boardrooms to Chicago courthouses and even, for a moment, the halls of the United States Congress. On one side: Apollo Global Management and TPG Capital. On the other: the likes of Elliott Management, Oaktree Capital, and Appaloosa Management. The Caesars bankruptcy put a twist on the old-fashioned casino heist. Through a \$27 billion leveraged buyout and a dizzying string of financial engineering transactions, Apollo and TPG—in the midst of the post-Great Recession slump—had seemingly snatched every prime asset of the company from creditors, with the notable exception of Caesars Palace. But Caesars' hedge fund lenders and bondholders had scooped up the company's paper for nickels and dimes. And with their own armies of lawyers and bankers, they were ready to do everything necessary to take back what they believed was theirs—if they could just stop their own infighting. These modern financiers now dominate the scene in Corporate America as their fight-to-the-death mentality continues to shock workers,

politicians, and broader society—and even each other. In *The Caesars Palace Coup*, financial journalists Max Frumes and Sujeet Indap illuminate the brutal tactics of distressed debt mavens—vultures, as they are condemned—in the sale and purchase of even the biggest companies in the world with billions of dollars hanging in the balance.
