Resurrecting Pompeii provides an in-depth study of a unique site from antiquity with information about a population who all died from the same known cause within a short period of time. Pompeii has been continuously excavated and studied since 1748. Early scholars working in Pompeii and other sites associated with the AD 79 eruption of Mount Vesuvius were seduced by the wealth of artefacts and wall paintings yielded by the site. This meant that the less visually attractive evidence, such as human skeletal remains, were largely ignored. Recognizing the important contribution of the human skeletal evidence to the archaeology of Pompeii, Resurrecting Pompeii remedies that misdemeanour, and provides students of archaeology and history with an essential resource in the study of this fascinating historical event. Music has been critical to national identity in Latin America, especially since the worldwide emphasis on nations and cultural identity that followed World War I. Unlike European countries with unified ethnic populations, Latin American nations claimed blended ethnicities—indigenous, Caucasian, African, and Asian—and the process of national stereotyping that began in the 1920s drew on themes of indigenous and African cultures. Composers and performers drew on the folklore and heritage of ethnic and immigrant groups in different nations to produce what became the music representative of different countries. Mexico became the nation of mariachi bands, Argentina the land of the tango, Brazil the country of Samba, and Cuba the island of Afro-Cuban rhythms, including the rhumba. The essays collected here offer a useful introduction to the twin themes of music and national identity and melodies and ethnic identification. The contributors examine a variety of countries where powerful historical movements were shaped intentionally by

Over the past century, luxury has been increasingly celebrated in the sense that it is no longer a privilege (or attitude) of the European elite or America's leisure class. It has become more ubiquitous and

now, practically everyone can experience luxury, even luxury in architecture. Focusing on various contexts within Western Europe, Latin America and the United States, this book traces the myths and application of luxury within architecture, interiors and designed landscapes. Spanning from antiquity to the modern era, it sets out six historical categories of luxury - Sybaritic, Lucullan, architectural excess, rustic, neoEuropean and modern - and relates these to the built and unbuilt environment, taking different cultural contexts and historical periods into consideration. It studies some of the ethical questions raised by the nature of luxury in architecture and discusses whether architectural luxury is an unqualified benefit or something which should only be present within strict limits. The author argues how the ideas of permissible and impermissible luxury have informed architecture and how these notions of ethical approval have changed from one context to another. Providing voluptuous settings for the nobles and the leisure class, luxury took the form of not only grand palaces, but also follies, country and suburban houses, private or public entertainment venues and ornate skyscrapers with fast lifts. The Architecture of Luxury proposes that in Western societies the growth of the leisure classes and their desire for various settings for pleasure resulted in a constantly increasing level of 'luxury' sought within everyday architecture.

A New York Review Books Original Hav is like no place on earth. Rumored to be the site of Troy, captured during the crusades and recaptured by Saladin, visited by Tolstoy, Hitler, Grace Kelly, and Princess Diana, this Mediterranean city-state is home to several architectural marvels and an annual rooftop race that is a feat of athleticism and insanity. As Jan Morris guides us through the corridors and quarters of Hav, we hear the mingling of Italian, Russian, and Arabic in its markets, delight in its famous snow raspberries, and meet the denizens of its casinos and cafés. When Morris published *Last Letters from Hav* in 1985, it was short-listed for the Booker Prize. Here it is joined by *Hav of the Myrmidons*, a sequel that brings the story up-to-date. Twenty-first-century Hav is nearly unrecognizable. Sanitized and monetized, it is ruled by a group of fanatics who have rewritten its history to reflect their own blinkered view of the past. Morris's only novel is dazzlingly sui-generis, part erudite travel memoir, part speculative fiction, part cautionary political tale. It transports the reader to an extraordinary place that never was, but could well be.
