Epi Info is a free computer program from the Centers for Disease Control and Prevention (CDC), downloaded 2 million times since 1998, and referred to in over 1 million web pages. It allows anyone with a computer to design a questionnaire, enter data, and do tabulation and statistical analysis. This book tells how to use Epi Info for rapid surveys and research studies and for constructing electronic medical records, public health surveillance systems, graphs, and maps. Sample programs can be downloaded from the web.

The pain-free approach to resetting the nervous system and releasing muscle spasms From Neuromuscular Therapist Gadi Kaufman comes the long awaited book about how to relieve back pain using the pain-free approach called Strain Counterstrain Technique. In Back Pain Relief in 90 Seconds, you will learn important information about lower back pain that you have not been told by the previous practitioners. For example, did you know that the majority of lower back pain does not actually originate in the lower back muscles themselves? In other words, when you feel lower back pain, the true source of that pain can often be traced to muscles and joints in the front of the body. Yes, that's right: those tired and overused muscles in the front of the body can radiate severe pain to the lower back. This lower back pain quickly becomes chronic due to a chain reaction that occurs which limits mobility, twists and torques the spine, rotates the pelvis, and compresses hip sockets on both sides of the body. At the center of this chain reaction is a painful muscle spasm, which means the muscle has essentially shut down and stopped contracting and releasing. If this muscle spasm is left untreated, your lower back pain can persist for years. But now you can do something about it. In Back Pain Relief in 90 Seconds, you will learn how to use the passive and pain-free Strain Counterstrain Technique to release persistent muscle spasms and relieve your lower back pain -- in the comfort of your own home, and with no more equipment than your sofa or a chair. This technique is extremely gentle and doesn't require spinal manipulations or uncomfortable maneuvers or deep tissue massage. You can relieve your pain without harsh medications, and without any additional pain during the process. Back Pain Relief in 90 Seconds is not another book of exercises and stretching. This technique will manipulate the autonomic nervous system and switch off the muscle spasm (which is being controlled by the nervous system). Relieving this pain is all about the nervous system. If you don't allow the nervous system to reset, then the spasm will not release. Muscles are dependent on the nervous system. As the author Gadi Kaufman famously says: "The nervous system is the boss! The muscles are the employees!" The step-by-step instructions and illustrations in Back Pain Relief in 90 Seconds focus on the specific muscles that are known contributors to lower back pain including: Psoas, Iliacus, Rectus Abdominus, Abdominal Obliques, Quadratus Lumborum, Piriformis, and more. With these 10 positional releases, you can begin to live again without lower back pain, which is something everyone deserves.

RISA-3D (Rapid Interactive Structural Analysis) is used for structural analysis and design. The tools in RISA-3D are primarily used in structural engineering and they help users to design structural models using both parametric 3D modeling and 2D drafting elements. The RISA-3D model comprise of a physical representation of a structure. The structural modeling in RISA-3D can be used for structural designing and analysis application. The Exploring RISA-3D 14.0 book explains the concepts and principles of RISA-3D through practical examples, tutorials, and exercises. This enables the users to harness the power of structural designing with RISA-3D for their specific use. In this book, the author emphasizes on physical modeling, structural desining, creating load cases, specifying boundary conditions, preparation of project report. This book covers the various stages involved in analyzing. This book is specially meant for professionals and students in structural engineering, civil engineering, and allied fields in the building industry. IF YOU KISS A FROG, HE JUST MIGHT TURN INTO A PRINCE. IF YOU KISS A TOAD, HE'LL JUST PEE ON YOUR HAND. This is the book emotionally abusive partners do NOT want you to read. It sounds so simple -- get out of a harsh relationship, remove the shrapnel, and move on. But some guys don't make that possible. Sometimes you get out of the relationship, like with a narcissist, but you can't recover because he doesn't give you a chance. He won't leave you alone long enough. Alexandra Nouri knows that personality-disordered people, psychopaths, sociopaths, and their ilk, in fact make leaving as difficult as possible. Getting out of a relationship with a narcissist is excruciating, but staying out of one takes the resolve of an Army. A narcissist is constantly pushing and pulling, devaluing you and everything about you, sucking you back in and making you believe the two of you have a chance, and basically pushing some very tender buttons, all in a big fat confusing and chaotic mess. When a relationship is ending, feeling hurt and angry is normal, but if you feel like you're losing your mind, like your very

survival is being threatened, then this book is written with you in mind. Those feelings mean he's messing with your head. And that's not cool. "Life," Aunt Alex says, "is uncertain, and mysterious. However, when it comes to life, you can count on three things. The sun will always rise in the East. If you hold up a cast iron frying pan and then let it go, it will not hover in the air and make a tweety sound. And if you go back to a guy with a personality disorder, he WILL hurt you again." Their breakups are all the same. Idealize, devalue, annihilate, string along, devalue, string along, annihilate, string along. The toad modus operandi gets very old and very boring, very fast. When he manipulates, deceives, and encroaches on your boundaries, that's not a power struggle. Or an argument. That's abuse. Aunt Alex's Army is the answer. The Army will brief you, train you, and give you your marching orders to a toad-free life. This is Aunt Alex's Army Manual, and here she musters the troops to lift up and empower the reader. You'll learn: * Who Toads Are * Who Kisses Them * Why Moving Forward Takes An Army * The Three Toad Truths * The Five Toad Motivators for Getting Into Relationships * What Toadspeak is, and Why It Drives People Crazy * What To Do About It * Your Psyche's Information Highway, and How to Pave New Roads to Health * The Five Army Maneuvers In Reality * Why It's Mandatory to Be All You Can Be There's nothing wrong with believing in epic love. There's just something wrong with expecting to get it from a narcissist. "You lost him because you're not good enough" is the #1 most toxic, worthless lie an ex sometimes hears from the toad, from other people, and even the gremlins inside her head. These are lies a toad wants you to believe -- that the reason you two aren't together right now in utter bliss is because you're not good enough. Not attractive enough, not interesting enough, not smart, happy, compatible, sexy, open, fun enough, doesn't matter: He wants you to believe the reason you two aren't working out is because of a serious shortcoming in YOU. Usually this is very vague, with hints and shrugging dissatisfaction. And he's really hoping this vagueness takes the focus off of the real causes of all the destruction: His absence of empathy. In the book Toads, and the Women Who Kiss Them Aunt Alex's Army Manual, Alexandra Nouri gives legions of examples of their confusing, bizarre ways, and straightens them out for you. She supports you in your new quiet disregard for BS, and helps you rise above the chaos and neurosis of his weird behavior. She translates the Toadspeak. She teaches you how to remove the shrapnel of his abuse so your broken heart can heal. A portion of the proceeds goes to the Futures Without Violence Fund. All of us are driven by habits. We get out of bed and start our morning routine without thinking about all the individual things we do to get ready for the day ahead. And so the day goes on driven by one set of habits after another. We cannot escape habits but we can choose our habits! Here is an easy to follow blueprint to help you discover what is important to you in your life. Then to work out what needs to be done to accomplish this and form habits that ensure you will get what is important to you. Pushing bad habits out of your life and replacing them with constructive habits can be done by following the easy plans laid out here. Simply by controlling the beginning and the end of the day, we can all have a great sense of achievement that comes from ending the day knowing we are closer to what we want than we were in the morning. It's time to form those good habits. It's time to take control of your life one step, one habit, at a time! "Most people have a few bad habits that don't always serve them or help them achieve and everyone knows how difficult it is to change. Ian has outlined a simple and effective way to replace bad habits with good success habits which will help those that follow it achieve their goals." Chris Williams - author of 'don't just dream it...do it, goal setting that really works for network marketers'

Sometimes there are challenges for lactation therapists that can't be completely resolved by current lactation practices--when the baby has reflux or torticollis, when mother and baby are injured or in pain, when the mother can't relax enough to sleep, when weeks of pumping erode the mother's energy to the point she wants to quit breastfeeding. In Complementary and Alternative Medicine in Breastfeeding Therapy, author Nikki Lee describes mother-baby situations that benefit from complementary and alternative therapy techniques in order to have a thriving baby and a happy mother, with an abundant milk supply and easy breastfeeding. In her experience complementary therapies, when used in conjunction with proven breastfeeding management, do no harm and usually help mother and baby. Therapies covered include: -Creating a healing environment -Skin-to-skin and massage -Acupuncture -Chiropractic -Craniosacral therapy -Remedial co-bathing -Homeopathy This book is not an instruction manual. It is an open door to the world of other ways of healing. Some or all of these therapies may be gentle and helpful additions to your lactation toolbox.

Formatting Briefs in Word explains how to create all the elements of a legal brief in Microsoft Word. Written by a lawyer for lawyers, paralegals and law students, readers will find this book invaluable for creating the best formatted briefs possible. While good formatting will not save a terrible brief, it will enhance a good one; and a good brief can be destroyed by poor formatting. Every page of this book is devoted towards solving the problems of formatting briefs. Topics include how to set up Word for legal writing; font selection; page layout; formatting using styles; creating tables of contents and authorities; and creating cover pages. Conformance with court rules is stressed throughout. This is an intermediate to advanced book on Word. The reader is expected to know already Word basics. This book takes the reader to a higher skill level.

General information, timing, maintenance, ignition, trim and tilt, remote control, fuel injection and other topics about outboards.

Lean User Testing A Pragmatic Step-by-Step Guide to User Tests If you believe in agile software development and delivering value to your customers and your company, reading this book is the right decision as it will greatly support your process to identify and create valuable, feasible and usable products. "We Know What We Need to Build" Who hasn't yet heard that dreaded, gut feeling-based notion in the past? To my experience, it is rarely valid, but more often an expression of an outdated thinking, that values output over outcome, that believes in requirement documents and micromanaging the product team. This book, however, is dedicated to completely different approach, that Steve Blank once wrapped up in his famous quote: There are No Facts Inside Your Building - Get Outside." And you should do so as early as possible in the process -it is the most important task of any product team. This book is therefore a deliberately short, focused, pragmatic manual for everyone, who designs, develops or markets software: Product manager, engineers and designers (UX/UI). It is based on hundreds of user interviews that I have run up to now and provides all you need to know to start your own user interview initiative in about two hours of your time. Save up to 90% of Typical User Interview Costs And there is more good news: The lean user testing approach will save up to 90% of the costs compared to outsourcing user interviews to a professional usability agency, but will return at least 80% of possible insights. Avoid Building Expensive Features Nobody Wants No more flying blind in the early stages: Test your hypotheses quickly and turn product discovery into your advantage over the competition. Learn how to avoid wasting money on software nobody wants and how to deliver value instead. Obsolete features aren't just expensive to build. They also need to be maintained and probably be removed at a later stage again, not to mention their opportunity costs: Imagine what you could have built instead. Gain More Runway for Your Startup Optimizing the cycle-time of your product hypotheses will focus available engineering and product management resources on valuable, usable and feasible features, thus extending your runway and improving your standing for the next funding round. Improve Communication with Stakeholders User tests greatly simplify the communication with stakeholders - the interviews, you will be running, are your product organization's first line of defense when it comes to turning down unreasonable feature requests. About the Author The author has worked for many years as a product manager and agile coach (Scrum, Lean Startup, Lean Change). During that time, he developed B2C as well as B2B software, mainly for startups, including a former Google subsidiary. He originally studied chemistry, business administration, and law. However, he has never worked in a laboratory. Instead, back in 1996, he released the first online shop software with SAP R/3 connectivity, only to learn that the early bird does not necessarily catch the worm. After his move to Berlin, Germany, he founded a marketplace for local service. In 2011, Entrepreneurs Club Berlin e.V. followed, as did Startup Camp Berlin- one of the largest German startup conferences today. His latest project, Age Of Product - Invent For Your Customers, focuses on the exchange of knowledge between product people, designers, and developers. It is about lessons learned and best practices on how to identify which product to build and how to build it in an efficient way. Age Of Product will host events and workshops in Berlin from autumn 2015 on and might also organize a new conference in the near future."

Jake is a mountain man in 1838 Colorado who finds he is dying from Cancer. He isn't given much time to live, and doc says it is going to be painful. He sends him off with some medicine to help cope with the pain. Instead of going home to die, Jake decides to set out on a last adventure to find the perfect secluded valley for his final resting place. His best friend, Joe Barnes, won't let him go alone, and he brings along a deaf mute girl named Beth. Along the way they save some children from hostile Indians, guide a wagon train to safety, spend time with old friends, and settle an old score with a past friend.

From LayFlat Sketchbooks, the Sports Training Notebook Series was created for the Coaching/Training Classroom, by request from high schools across the country. Each title features a diagram of the playing field, drawn to spec, with note taking pages for each diagram. Since the inception of this book line in 2010, hundreds of national high school and college sport classrooms have gained the benefit of moving players notes from the glass table top to the printed page for continued study. Automotive Relay Circuit Guide(Includes circuit explanations, how current flows and how to wire relays from the ground up.)By Mandy ConcepcionThis book is a comprehensive work on automotive relays and their circuit analysis. The book is also a companion to our Video-DVD series of the same title. Here, we analyze how automotive relays are connected with their peripheral components. Each section starts with the specifics of the components used in that circuit and then there's a deep analysis of how current flows on the circuit. The idea is to first explain and give the reader the particulars of each circuit, then go deeper and analyze why the circuit behaves the way it does, how to diagnose it and how to connect it in case the whole wiring is missing, obsolete or simply was never present to begin with. Table of Contents · How to wire relay as ON button – Explains how to connect an automotive relay to stay ON at all times. Useful for any device that stays ON and using a low current trigger switch. · Turn ON relay button diode – Details the use of a Diode as an ON circuit. The diode itself is the key to it all. · How to make a relay injector security circuit – This is a clever circuit for deactivating your vehicle's fuel injectors as a security measure. It's simple and concealed. · How to wire a relay starter kill-switch – Disabling the starter is fairly simple, but this circuit also employs other tactics to make it more effective. · How to do a single relay car alarm – Shows how to wire a relay as an easy to connect car alarm. It'll show you a cost effective way to secure your car. · How to connect a power relay – Gives you extensive input for connecting an automotive relay as a power unit or to drive almost any kind of device. · How to wire a cooling fan relay – Useful in retrofitting an older systems to work with electric cooling fans and to replace

an out of production fan with a universal unit.· How to connect a fuel pump relay – There are many instances where the fuel pump has gone bad and no replacement is available. Learn how this circuit works and how to wire the fuel pump.· How to do an alternator relay failure circuit – A very clever circuit used as a warning to the driver when an impending alternator issue is at hand.· How to wire relay power door lock – Power door locks have been around for many years. This section shows you how the circuit works, how to connect it, retrofitting to an older car and how to repair the systems in case of failure.· How to wire a power windows relay – Resistive rest at ground or any other wiring scheme is foreign to many people. Learn how it works right here in this article. · How to make a relay turn signal – Learn how to wire an entire high class turn signal system, found on luxury makes. Useful for retrofitting your own vehicle in case parts are no longer available.· How to wire an AC compressor clutch relay – A very reliable circuit is presented here to help you understand an AC systems as well as teaches you to retrofit older cars.· How to connect a headlight warning relay – Knowing when the headlights are down is essential. This circuit will show you how the circuit works and how to build it.· How to wire an ECM relay – The ECM relay meets all power requirements for the car computer. Learn how the circuit works and how to connect it. · How to wire AC blower motor relay – Get the details on connecting an AC blower motor and how to re-wire a new one if needed.· How to wire relay fog lights – Fog lights are necessary in many areas. Most vehicles have no fog-lights and this circuit is geared towards explaining how they work and install them.

Field Manual FM 3-09 Field Artillery Operations, provides tactics for field artillery operations and fire support in unified land operations. The principal audience for FM 3-09 is all commanders and staffs. Commanders and staffs of Army headquarters serving as joint task force or multinational headquarters should also refer to applicable joint or multinational doctrine concerning the range of military operations and relationships with joint or multinational forces. Trainers and educators throughout the Army will also use this manual. Commanders, staffs, and subordinates ensure their decisions and actions comply with applicable United States (U.S.), international, and, in some cases, host-nation laws and regulations. Commanders at all levels ensure their Soldiers operate in accordance with the law of war and established rules of engagement. See FM 27-10. FM 3-09 implements standardization agreements (STANAG) 2484 and 3680.

Children are naturally drawn to animals. Sooner or later your child may ask for a dog of their own. This book will help your child learn about the care and training that their Wirehaired Pointing Griffon needs, all the while they are learning with the fun activities in the book. They'll have fun with the fill in the missing vowels, word find puzzles, mazes, charts, making their own note cards & bookmarks, plus questions and answers. The book is a fun read as told from the Wirehaired Pointing Griffon's point of view.

SELOC Marine maintenance and repair manuals offer the most comprehensive, authoritative information available for outboard, inboard, stern-drive and diesel engines, as well as personal watercraft.
