A master compilation of mystical exploration into the heart of the ancient Mesopotamian Mysteries, this complete practical companion to the Mardukite "Necronomicon Anunnaki Cycle" illuminates the revolutionary teachings and source materials of the Modern Sumerian-Babylonian-Anunnaki Tradition of the Mardukite Chamberlains (Ordo Nabu Maerdechai), edited by Joshua Free, the presiding Nabu of the organization since its inception. NECRONOMICON WORKBOOK is a highly innovative and accessible anthology of the complete "Year-3" research and development of the Mardukite Research Organization including three volumes ("Magan Magic", "Maqlu Magic" and "Beyond the Ishtar Gate", simultaneously released as the "Necronomicon Spellbook" trilogy series) in a single incredible compilation! In MAGAN MAGIC: THE ENUMA ELIS (Liber-E) amazing cuneiform tablet records of magick and creation are drawn together to reconstruct the most antiquated, powerful and legendary "magician's primer" ever known to the minds of men --formulated by the ancient Sumerians and Babylonians! MAQLU MAGIC (Liber-M) reveals an authentic "Necronomicon Spellbook" of advanced Mesopotamian Magick drawn from the sands of Babylonia forming a complete Anunnaki ('alien sky god') "grimoire" used by magicians and priests for thousands of years to combat in wizards' duels, reverse the effects of evil spells and curses, banish disease and nightmares, and conjure the protection and blessings of the gods! Finally, BEYOND THE ISHTAR GATE (Liber C) is concerned with the 'other side' of the tradition, parts that have been concealed and yet also what made the tradition famous - mainly, the connection to the "Other", that which we have been programmed to perceive as 'separate' from this reality. Edition Note: This anthology has been simultaneously released as "Mesopotamian Magic" edited by Joshua Free with Khem Juergen.

Il mistero della Magia affascina da sempre l'Umanità. The Sumerians, the pragmatic and gifted people who preceded the Semites in the land first known as Sumer and later as Babylonia, created what was probably the first high civilization in the history of man, spanning the fifth to the second millenniums B.C. This book is an unparalleled compendium of what is known about them. Professor Kramer communicates his enthusiasm for his subject as he outlines the history of the Sumerian civilization and describes their cities, religion, literature, education, scientific achievements, social structure, and psychology. Finally, he considers the legacy of Sumer to the ancient and modern world. "There are few scholars in the world qualified to write such a book, and certainly Kramer is one of them. . . . One of the most valuable features of this book is the quantity of texts and fragments which are published for the first time in a form available to the general reader. For the layman the book provides a readable and up-to-date introduction to a most fascinating culture. For the specialist it presents a synthesis with which he may not agree but from which he will nonetheless derive stimulation."—American Journal of Archaeology "An uncontested authority on the civilization of Sumer, Professor Kramer writes with grace and urbanity."—Library Journal

This book is not the usual herbal; not a homeopathic handbook, a cookbook or a gardener's consort; not even a compendium of history or lore, though these are its favourite pursuits. At heart, it is a tale of humanity's poignant relationship with nature. Told in short vignettes, profusely illustrated and sprinkled with personal asides, it touches broadly on the role of plants in legend, in religion, in medicine, commerce, crafts and tradition, in literature, language, politics, beauty, in the rise and fall of empires, in food and manners, in love, in murder, and in crushing social passions. It selects from the trove of history and science moments that amaze, or shock, or move us to disbelief, and asks us to explore the uncanny bond between us and our non-speaking partners in creation.

Originally published in 1939, this book contains an assessment of the historical evidence provided by ancient Babylonian cuneiform tablets. The text is accompanied by a number of photographs of the tablets, as well as of important archaeological sites and Babylonian artefacts. Chiera's enthusiasm for his subject is clear, as the text is accessibly written and contains many Babylonian legends and assesses their relationship to biblical texts. This book will be of value to anyone with an interest in Assyriology and the ancient Middle East.

Mesopotamian anti-witchcraft rituals and prescriptions prescribe ceremonies and treatments for dispelling witchcraft, destroying the witch, and protecting and curing the patient. The Corpus of Mesopotamian Anti-Witchcraft Rituals aims to present a reconstruction and critical editions of this body of texts.

In a world of rapid technological advancements, it can be easy to forget that writing is the original Information Technology, created to transcend the limitations of human memory and to defy time and space. The Writing Revolution picks apart the development of this communication tool to show how it has conquered the world. Explores how writing has liberated the world, making possible everything from complex bureaucracy, literature, and science, to instruction manuals and love letters Draws on an engaging range of examples, from the first cuneiform clay tablet, Egyptian hieroglyphs, and Japanese syllabaries, to the printing press and the text messaging Weaves together ideas from a number of fields, including history, cultural studies and archaeology, as well as linguistics and literature, to create an interdisciplinary volume Traces the origins of each of the world's major written traditions, along with their applications, adaptations, and cultural influences

An Oxford professor of archaeology explores the unique history of magic—the oldest and most neglected strand of human behavior and its resurgence today Three great strands of belief run through human history: Religion is the relationship with one god or many gods, masters of our lives and destinies. Science distances us from the world, turning us into observers and collectors of knowledge. And magic is direct human participation in the universe: we have influence on the world around us, and the world has influence on us. Over the last few centuries, magic has developed a bad reputation—thanks to the unsavory tactics of shady practitioners, and to a successful propaganda campaign on the part of religion and science, which denigrated magic as backward, irrational, and "primitive." In Magic, however, the Oxford professor of archaeology Chris Gosden restores magic to its essential place in the history of the world—revealing it to be an enduring element of human behavior that plays an important role for individuals and cultures. From the curses and charms of ancient Greek, Roman, and Jewish magic, to the shamanistic traditions of Eurasia, indigenous America, and Africa; from the alchemy of the Renaissance to the condemnation of magic in the colonial period and the mysteries of modern quantum physics—Gosden's startling, fun, and colorful history supplies a missing chapter of the story of our civilization. Drawing on decades of research around the world—touching on the first known horoscope, a statue ordered into exile, and the mystical power of tattoos—Gosden shows what magic can offer us today, and how we might use it to rethink our relationship with the world. Magic is an original, singular, and sweeping work of scholarship, and its revelations will leave a spell on the reader.

This book sets the notorious European witch trials in the widest and deepest possible perspective and traces the major historiographical developments of witchcraft

Celebrated for numerous developments in the areas of law, writing, religion, and mathematics, Mesopotamia has been immortalized as the cradle of civilization. Its fabled cities, including Babylon and Nineveh, spawned new cultures, traditions, and innovations in art and architecture, some of which can still be seen in present-day Iraq, Iran, Syria, and Turkey. Readers will be captivated by this ancient culture's rich history and breadth of accomplishment, as they marvel at images of the magnificent temples and artifacts left behind.

This work explores the interaction between magic and medicine in ancient Mesopotamia, as applied specifically to ghosts. Included is a discussion of sin and natural causes in Mesopotamian medicine. Additionally, it transliterates and translates 352 prescriptions designed to cure psychological and physical ailments thought to be caused by ghosts.

A dictionary records a language and a cultural world. This global history of lexicography is the first survey of all the dictionaries which humans have made, from the ancient civilizations of Mesopotamia, Egypt, China, India, and the Greco-Roman world, to the contemporary speech communities of every inhabited continent. Their makers included poets and soldiers, saints and courtiers, a scribe in an ancient Egyptian 'house of life' and a Vietnamese queen. Their physical forms include Tamil palm-leaf manuscripts and the dictionary apps which are supporting endangered Australian languages. Through engaging and accessible studies, a diverse team of leading scholars provide fascinating insight into the dictionaries of hundreds of languages, into the imaginative worlds of those who used or observed them, and into a dazzling variety of the literate cultures of humankind.

!DOCTYPE HTML PUBLIC "-//W3C//DTD HTML 4.0 Transitional//EN" html meta content="text/html; charset=ISO-8859-1" http-equiv="content-type" body An introductory guide for scholars and students of the ancient Near East and the history of medicine In this collection JoAnn Scurlock assembles and translates medical texts that provided instructions for ancient doctors and pharmacists. Scurlock unpacks the difficult, technical vocabulary that describes signs and symptoms as well as procedures and plants used in treatments. This fascinating material shines light on the development of medicine in the ancient Near East, yet these tablets were essentially inaccessible to anyone without an expertise in cuneiform. Scurlock's work fills this gap by providing a key resource for teaching and research. Features:

Accessible translations and transliterations for both specialists and non-specialists Texts include a range of historical periods and regions Therapeutic, pharmacological, and diagnostic texts

This study is the first to assemble the evidence for the existence of sorcerors in the ancient world; it also addresses the question of their identity and social origins. The resulting investigation takes us to the underside of Greek and Roman society, into a world of wandering holy men and women, conjurors and wonder-workers, and into the lives of prostitutes, procuresses, charioteers and theatrical performers.

This fascinating reconstruction of the careers of witches and sorcerors allows us to see into previously inaccessible areas of Greco-Roman life. Compelling for both its detail and clarity, and with an extraordinarily revealing breadth of evidence employed, it will be an essential resource for anyone studying ancient magic.

This book presents twenty chapters by experts in their fields, providing a thorough and interdisciplinary overview of the theory and practice of magic in the West. Its chronological scope extends from the Ancient Near East to twenty-first-century North America; its objects of analysis range from Persian curse tablets to US neo-paganism. For comparative purposes, the volume includes chapters on developments in the Jewish and Muslim worlds, evaluated not simply for what they contributed at various points to European notions of magic, but also as models of alternative development in ancient Mediterranean legacy. Similarly, the volume highlights the transformative and challenging encounters of Europeans with non-Europeans, regarding the practice of magic in both early modern colonization and more recent decolonization.

"This splendid work of scholarship . . . sums up with economy and power all that the written record so far deciphered has to tell about the ancient and complementary civilizations of Babylon and Assyria."—Edward B. Garside, New York Times Book Review Ancient Mesopotamia—the area now called Iraq—has received less attention than ancient Egypt and other long-extinct and more spectacular

civilizations. But numerous small clay tablets buried in the desert soil for thousands of years make it possible for us to know more about the people of ancient Mesopotamia than any other land in the early Near East. Professor Oppenheim, who studied these tablets for more than thirty years, used his intimate knowledge of long-dead languages to put together a distinctively personal picture of the Mesopotamians of some three thousand years ago. Following Oppenheim's death, Erica Reiner used the author's outline to complete the revisions he had begun. "To any serious student of Mesopotamian civilization, this is one of the most valuable books ever written."—Leonard Cottrell, Book Week "Leo Oppenheim has made a bold, brave, pioneering attempt to present a synthesis of the vast mass of philological and archaeological data that have accumulated over the past hundred years in the field of Assyriological research."—Samuel Noah Kramer, Archaeology A. Leo Oppenheim, one of the most distinguished Assyriologists of our time, was editor in charge of the Assyrian Dictionary of the Oriental Institute and John A. Wilson Professor of Oriental Studies at the University of Chicago.

In antiquity, the expertise of the Babylonians in matters of the heavens was legendary and the roots of both western astronomy and astrology are traceable in cuneiform tablets going back to the second and first millennia BC. The Heavenly Writing, first published in 2004, discusses the place of Babylonian celestial divination, horoscopy, and astronomy in Mesopotamian intellectual culture. Focusing chiefly on celestial divination and horoscopes, it traces the emergence of personal astrology from the tradition of celestial divination and the use of astronomical methods in horoscopes. It further takes up the historiographical and philosophical issue of the nature of these Mesopotamian 'celestial sciences' by examining elements traditionally of concern to the philosophy of science, without sacrificing the ancient methods, goals, and interests to a modern image of science. This book will be of particular interest to those concerned with the early history of science.

This volume is about the history, literature, ritual, and thought associated with ancient Mesopotamian witchcraft. With chapters on the changing forms and roles of witchcraft beliefs, the ritual function, form, and development of the Maqlû text (the most important ancient work on the subject), and the meaning of the Maqlû ceremony, as well as the ideology of the final version of the text. The volume significantly contributes to our understanding of the Maqlû text, and the reconstruction of the development of thought about witchcraft and magic in Mesopotamia.

Following the author's widely successful "Mardukite Year-3" series of works culminating an in-depth examination of Mesopotamian Magic, Sumerian Sorcery and the Dark Arts of Babylon, Joshua Free's "Beyond the Ishtar Gate" (Liber-C) completes the trilogy launched from "Magan Magic" (Liber-E) and "Maqlu Magic" (Liber-M); simultaneously released by the Mardukite Chamberlains as the "Necronomicon Spellbook" trilogy series. BEYOND THE ISHTAR GATE (also released as "Necronomicon Spellbook III") is concerned with the 'other side' of the tradition, parts that have been concealed and yet also what made the tradition famous - mainly, the connection to the "Other," that which we have been programmed to perceive as 'separate' from this reality. By whatever names it has been given, the part of this 'advanced', 'esoteric' or 'inner circle' work connected directly to the "Other," in whatever tradition it is realized from, is the highest part of the 'Great Work' - that which all the rest seemingly culminates into or points toward. It has been considered 'divine communication' by some and 'trafficking with the devil' to others - but regardless of the view taken, the knowledge and experience of these crossings is never held without some regard, for better or worse. "Liber-C" also contains the unpublished conclusion to Series-U and Series-V tablet cycles not found in the "Necronomicon Anunnaki Bible" anthology.

This volume in the highly respected Cambridge History of Science series is devoted to the history of science, medicine and mathematics of the Old World in antiquity. Organized by topic and culture, its essays by distinguished scholars offer the most comprehensive and up-to-date history of ancient science currently available. Together, they reveal the diversity of goals, contexts, and accomplishments in the study of nature in Mesopotamia, Egypt, Greece, Rome, China, and India. Intended to provide a balanced and inclusive treatment of the ancient world, contributors consider scientific, medical and mathematical learning in the cultures associated with the ancient world.

"In the Path of the Moon" offers a collection of essays concerning Babylonian celestial divination. It investigates various aspects of cuneiform celestial omens, horoscopes, and astronomy and their wide-ranging influences on later Hellenistic science and philosophy.

In his Book of Shadows, Gerald Gardner writes about the witch's Eightfold Way as a means of developing one's magickal abilities. In this contemporary take on the Eightfold Way, author, Witch, and High Priestess Lady Sable Aradia invites readers to explore the eight different components of evolution in witchcraft. Using exercises, meditations, and practical magick, any serious student of witchcraft will be able to master these eight paths and improve the effectiveness of their magickal work. From spells to sex rites to trance to flying ointments, Lady Sable has created a step-by-step guide to mastering the advanced arts of witchcraft.

Available to the public for the first time ever -- a comprehensive, practical, concise and economical guide to cuneiform writing, Sumerian language and its refined Akkadian use in Babylon, brought to the surface realm from the underground vaults of the world renown Mardukite Research Organization. "Secrets of Sumerian Language" is an amazing revelation of the deep esoteric origins of human language, writing and its historic contribution toward evolving human consciousness, the establishment of societal systems and alteration of reality perception. Immerse yourself holistically into the Mesopotamian paradigm to discover the arcane truth and profound beauty of the ancient Sumerian and Babylonian (Akkadian) cuneiform literary tradition -- one which changed the world! Drawing from and building upon the research and expertise of the leading related underground movement, driven by the prodigious and prolific writings of Joshua Free, "Secrets of Sumerian Language" reveals: * The origins of societal language and the psychological (and spiritual) impact cuneiform had toward the inception and control of human civilization via linguistic encoding. * What the most ancient Sumerian and Babylonian tablets writings on the planet have done to contribute to the birth and advancement of traditional archetypes in human culture, belief, politics, economics and world order. * How to analyze and interpret cuneiform logograms ("signs"), semantics and phonetics utilized for Sumerian and Babylonian (Akkadian) clay tablet writings to preserve their incredible legacy with obscure pictographs and ideographs. While other more expensive sources of cuneiform knowledge offer little more than a mere Sumerian Lexicon of vocabulary only (using the Roman Latin script you are reading now), "Secrets of Sumerian Language" actually simplifies the scribe's art of tablet transliteration and translation by providing: * Clear definitions to 1000's of words! * Over 500 illustrated 'easy-to-read' cuneiform signs! * Comparative cross reference tables for Sumerian, Akkadian (Babylonian) and English semantics! * ...and much more! "Secrets of Sumerian Language: The Archaic History & Development of Babylonian-Akkadian Writing (A Dictionary of Cuneiform Signs)" is the definitive and revolutionary approach to understanding these ancient Mesopotamian mysteries unlike anything you've ever seen before! [EDITION NOTE: "Secrets of Sumerian Language" is an official publication of the Mardukite Chamberlains, the final installment of the Year-4 cycle and carries the vault designation of 'Liber-I'.]

Raw Power. Real Magic. Primordial. Nearly Forgotten... The path of true Babylonian magic is a spiritual dedication to the Sumerian Anunnaki, a path once seemingly inaccessible--beyond our

reach and understanding. Rediscover the most ancient magical system on earth, secretly recorded on cuneiform tablets thousands of years ago in Mesopotamia... Here is the definitive modern collection of ancient magic including Anunnaki invocations, Mesopotamian gate rituals, Babylonian exorcisms, banishing rites and protective spells. Joshua Free, world renowned esoteric expert, Director of the modern "Mardukite Research Organization," and author of the underground bestselling "Mardukite Core" library--including "The Complete Anunnaki Bible" and "The Sumerian Legacy"--invites the Seeker on an amazing progressive esoteric journey, illuminating the most ancient and powerful magical tradition, now revealed with perfect clarity--including revised and rewritten materials from "Magan Magic--the Enuma Elis, " "The Complete Book of Marduk by Nabu, " "The Maqlu Ritual Book" and a special appendix: the original "Enochian Magic & the Kabbalah" discourse by Joshua Free. Originally published in four installments, this special Practical Babylonian Magic anthology collects some of the most concise and accessible contributions from the modern Mardukite Research Organization as developed underground for the past decade.

To date, the pathbreaking medical contributions of the early Mesopotamians have been only vaguely understood. Due to the combined problems of an extinct language, gaps in the archeological record, the complexities of pharmacy and medicine, and the dispersion of ancient tablets throughout the museums of the world, it has been nearly impossible to get a clear and comprehensive view of what medicine was really like in ancient Mesopotamia. The collaboration of medical expert Burton R. Andersen and cuneiformist JoAnn Scurlock makes it finally possible to survey this collected corpus and discern magic from experimental medicine in Ashur, Babylon, and Nineveh. Diagnoses in Assyrian and Babylonian Medicine is the first systematic study of all the available texts, which together reveal a level of medical knowledge not matched again until the nineteenth century A.D. Over the course of a millennium, these nations were able to develop tests, prepare drugs, and encourage public sanitation. Their careful observation and recording of data resulted in a description of symptoms so precise as to enable modern identification of numerous diseases and afflictions.

This is the first ever modern treatment of literary theory in Babylonian literature. The volume deals with all aspects of the discipline; modes of expression, tropes, commonplaces, etc, etc.

Presents the beliefs, cults, gods, and ritual practices that developed in Mediterranean region countries such as Egypt, Anatolia, Mesopotamia, Iran, Greece, and Rome from the the third millenium B.C. up to the fourth century A.D.

"Nearly four thousand years ago, kings in various ancient societies, especially in Mesopotamia (contemporary Iraq), faced a crisis of major proportions. Large portions of the population were horribly in debt, many being forced to sell themselves or their children into slavery to pay off their debts. The laws and customs seemed to support the commercial practices that allowed lenders to charge 20%-30% interest, and the law protected the lenders and gave no recourse for the indebted. Strict justice called for the creditors to receive what they were due. But another legal concept, the emerging idea of equity, seemed to call for a different result - the use of law as a vehicle to free people from economic oppression. Debt relief edicts were instituted - "clean-slate laws" as they were known - and are of obvious relevance today as well where crushing debt is a major issue underlying social inequality"--

When we encounter a text, whether ancient or modern, we typically start at the beginning and work our way toward the end. In Tracking the Master Scribe, Sara J. Milstein demonstrates that for biblical and Mesopotamian literature, this habit can yield misleading results. In the ancient Near East, "master scribes" - those who had the authority to produce and revise literature - regularly modified their texts in the course of transmission. One of the most effective techniques for change was to add something to the front - what Milstein calls "revision through introduction." This method allowed scribes to preserve their received material while simultaneously recasting it. As a result, numerous biblical and Mesopotamian texts manifest multiple and even competing viewpoints. Due to the primary position of these additions, such reworked texts are often read solely through the lens of their final contributions. This is true not only for biblical and cuneiform texts in their final forms, but also for Mesopotamian texts that are known from multiple versions: first impressions carry weight. Rather than "nail down every piece of the puzzle," Tracking the Master Scribe demonstrates what is to be gained when engaging questions of textual transmission with attention to how scribes actually worked. Working from the two earliest corpora that allow us to track large-scale change, the book provides broad overviews of

evidence available for revision through introduction, as well as a set of detailed case studies that offer fresh insight into well-known biblical and Mesopotamian literary texts. The result is the first comprehensive and comparative profile of this key scribal method: one that was not only ubiquitous in the ancient Near East but also epitomizes the attitudes of the master scribes toward the literature that they produced.

This volume, edited by Tzvi Zbusch and Karel van der Toorn, contains the papers delivered at the first international conference on Mesopotamian magic held under the auspices of the Netherlands Institute for Advanced Studies (NIAS) in June 1995. It is the first collective volume dedicated to the study of this topic. It aims at serving as a bench-mark and provides analytic and innovative but also synthetic and programmatic essays. Magical texts, forms, and traditions from the Mesopotamian cultural worlds of the third millennium BCE through the first millennium CE, in the Sumerian, Akkadian and Aramaic languages as well as in art, are examined.

Originally published in 1896, this text contains the cuneiform text of 60 clay tablets written between 669-625 BC. These tablets were inscribed with prayers and religious compositions of a devotional and magical character and there is little doubt that they were compiled from Babylonian sources.

[Mardukite Heritage Edition: A continued reissue of an otherwise cycled out-of-print edition kept available for review and posterity. This title has since been revised and expanded in 2013 as "Necronomicon: The Anunnaki Legacy Edition (Silver Edition)" by Joshua Free (see separate listing).]The word "complete" is thrown around too loosely in the modern literary age. So many interpretations of the "Necronomicon" and the "Anunnaki Legacy" alluded to in works from those like Zecharia Sitchin and the Ancient Aliens mythos have already come forth into the New Age Movement. The last several years has also been blessed by the amazing contributions from the modern present-day Mardukite community, that has focused self-honestly on the identity and natures of the Anunnaki Sky Gods who appeared in ancient times and at the heart of all the global traditions on the planet. Having recently finalized the core literary cycle for the modern revival, referred to often as the Mardukite Cycle or Anunnaki Necronomicon Cycle, the efforts made can now be referred to as nothing short of complete!!! A master compilation of mystical exploration into the heart of ancient mysteries, this presentation of the complete "Necronomicon Anunnaki Cycle" illuminates the revolutionary teachings and source materials of the Modern Sumerian-Babylonian-Anunnaki Tradition of the Mardukite Chamberlains (Ordo Nabu Maerdechai), edited by Joshua Free, the presiding Nabu of the organization since its inception. The material in the NECRONOMICON ANUNNAKI LEGACY EDITION is a highly innovative anthology of all seven-plus-one core volumes in a single incredible compilation! This work has been revolutionizing the modern occult and spiritual communities in unveiling the truth of such aspects as - Sumerian Anunnaki, Babylonian Religion, Mesopotamian Magick, Mystical Portals and Magical Gateways, Hermetic Occultism, Esoteric Druidism, "Simon" and Lovecraftian lore, and of course this contemporary idea of an Alien Illuminati. This massive and beautiful 820-page oversized tome contains - Necronomicon (Liber N), Liturgy & Lore (Liber L or LL), Gatekeeper's Grimoire (Liber G or GG), and Shadows (Liber 9); essentially the complete "Year 1" cycle found in the "Necronomicon Anunnaki Bible" (Fourth Edition) plus the complete "Year 2" companions now available in the "Gates of the Necronomicon" anthology - Sumerian Religion (Liber 50), Babylonian Myth & Magic (Liber 51) and Necronomicon Revelations (Liber R). Included as an appendix to this deluxe edition is the complete text of "Druids of the Deep" (Liber D) - all seven-plus-one core volumes in a single incredible compilation!
