Fight Club: A Novel Chuck Palahniuk,2005-10-17 The first rule about fight club is you don't talk about fight club. Chuck Palahniuk showed himself to be his generation's most visionary satirist in this, his first book. *Fight Club's* estranged narrator leaves his lackluster job when he comes under the thrall of Tyler Durden, an enigmatic young man who holds secret after-hours boxing matches in the basements of bars. There, two men fight as long as they have to. This is a gloriously original work that exposes the darkness at the core of our modern world.

Weathering Christoph F. E. Holzhey,Arnd Wedemeyer,2020-10-06 Weathering is atmospheric, geological, temporal, transformative. It implies exposure to the elements and processes of wearing down, disintegration, or accrued patina. Weathering can also denote the ways in which subjects and objects resist and pass through storms and adversity. This volume contemplates weathering across many fields and disciplines; its contributions examine various surfaces, environments, scales, temporalities, and vulnerabilities. What does it mean to weather or withstand? Who or what is able to pass through safely? What is lost or gained in the process?

Participation Claire Bishop,2006 Participation in art has become a prevalent and contested phenomenon since the 1990s. Artists have increasingly sought to create situations and events that invite spectators to become active participants, in dialogue both with their context and with each other. This reader charts a historical lineage and theoretical framework for this tendency, presented through the writings of artists, curators and philosophers from the late 1950s to the present-- Publisher's description.

Recapture the purest sense of creativity by colouring in the most beautiful figurative designs - flowers, birds, butterflies - provided by a leading textile designer. By adding the key ingredient of colour you add your own spark of creativity to great designs. The design team, who work closely with Tate Modern in London, provide 24 postcards with six different designs to choose from. You can experiment with the colour combinations, using crayons, pencils, felt/fibre tip pens, and even paint on these uncoated postcards. A brief introduction gives some tips on using colours and suggests colour combinations to use on the specific designs, but you are encouraged to let your own creativity get to work! Great fun for all those looking for a burst of creative expression and useful for designers of all types who want to experiment with colour. The cards can be kept together in the book or detached, framed or posted to a friend.

High-Rise: A Novel J. G. Ballard, 2012-03-05 Harsh and ingenious! High Rise is an intense and vivid bestiary, which lingers unsettlingly in the mind. —Martin Amis, *New Statesman* When a class war erupts inside a luxurious apartment block, modern elevators become violent battlegrounds and cocktail parties degenerate into marauding attacks on “enemy” floors. In this visionary tale, human society slips into violent reverse as once-peaceful residents, driven by primal urges, re-create a world ruled by the laws of the jungle.

Projected Cities Stephen Barber, 2002 The books that comprise the Locations series address the links between film and society. In *Cinema and Urban Space* Stephen Barber explores the use of urban images in film from early to contemporary cinema.

Henri Lefebvre Chris Butler, 2012-10-12 While certain aspects of Henri Lefebvre’s writings have been examined extensively within the disciplines of geography, social theory, urban planning and cultural studies, there has been no comprehensive consideration of his work within legal studies. *Henri Lefebvre: Spatial Politics, Everyday Life and the Right to the City* provides the first serious analysis of the relevance and importance of this significant thinker for the study of law and state power. Introducing Lefebvre to a legal audience, this book identifies the central themes that run through his work, including his unorthodox, humanist approach to Marxist theory, his sociological and methodological contributions to the study of everyday life and his theory of the production of space. These elements of Lefebvre’s thought are explored through detailed investigations of the relationships between law, legal form and processes of abstraction; the spatial dimensions of neoliberal configurations of state power; the political and aesthetic aspects of the administrative ordering of everyday life; and the ‘right to the city’ as the basis for asserting new forms of spatial citizenship. Chris Butler argues that Lefebvre’s theoretical categories suggest a way for critical legal scholars to conceptualise law and state power as continually shaped by political struggles over the inhabitation of space. This book is a vital resource for students and researchers in law, sociology, geography and politics, and all readers interested in the application of Lefebvre’s social theory to specific legal and political contexts.

The Camorra Tom Behan, 2005-08-18 The Camorra of Naples has risen to a level of strength that rivals the Sicilian mafia.

This book traces its origins from the mid 19th century to its present dominance of the Campania region.

The Dictator's Seduction Lauren H. Derby, 2009-07-17 The dictatorship of Rafael Trujillo, who ruled the Dominican Republic from 1930 until his assassination in 1961, was one of the longest and bloodiest in Latin American history. *The Dictator's Seduction* is a cultural history of the Trujillo regime as it was experienced in the capital city of Santo Domingo. Focusing on everyday forms of state domination, Lauren Derby describes how the regime infiltrated civil society by fashioning a “vernacular politics” based on popular idioms of masculinity and fantasies of race and class mobility. Derby argues that the most pernicious aspect of the dictatorship was how it appropriated quotidian practices such as gossip and gift exchange, leaving almost no place for Dominicans to hide or resist. Drawing on previously untapped documents in the Trujillo National Archives and interviews with Dominicans who recall life under the dictator, Derby emphasizes the role that public ritual played in Trujillo's exercise of power. His regime included the people in affairs of state on a massive scale as never before. Derby pays particular attention to how events and projects were received by the public as she analyzes parades and rallies, the rebuilding of Santo Domingo following a major hurricane, and the staging of a year-long celebration marking the twenty-fifth year of Trujillo's regime. She looks at representations of Trujillo, exploring how claims that he embodied the popular barrio antihero the tiguere (tiger) stoked a fantasy of upward mobility and how a rumor that he had a personal guardian angel suggested he was uniquely protected from his enemies. *The Dictator's Seduction* sheds new light on the cultural contrivances of autocratic power.

Borders across Healthcare Nina Sahraoui, 2020-06-11 Examining which actors determine undocumented migrants' access to healthcare on the ground, this volume looks at what happens in the daily interactions between administrative personnel, healthcare professionals and migrant patients in healthcare institutions across Europe. *Borders across Healthcare* explores contemporary moral economies of the healthcare-migration nexus. The volume documents the many ways in which borders come to disrupt healthcare settings and illuminates how judgements of a health-related deservingness become increasingly important, producing hierarchies that undermine a universal right to healthcare.

Environmental Governance in Latin America Fabio De Castro, Barbara Hogenboom, Michiel Baud, 2016-03-24 This book is open access under a CC-BY license. The multiple purposes of nature – livelihood for communities, revenues for states, commodities for companies, and biodiversity for conservationists – have turned environmental governance in Latin America into a highly contested arena. In such a resource-rich region, unequal power relations, conflicting priorities, and trade-offs among multiple goals have led to a myriad of contrasting initiatives that are reshaping social relations and rural territories. This edited collection addresses these tensions by unpacking environmental governance as a complex process of formulating and contesting values, procedures and practices shaping the access, control and use of natural resources. Contributors from various fields address the challenges, limitations, and possibilities for a more sustainable, equal, and fair development. In this

book, environmental governance is seen as an overarching concept defining the dynamic and multi-layered repertoire of society-nature interactions, where images of nature and discourses on the use of natural resources are mediated by contextual processes at multiple scales.
