

## Michelin Fleet Solutions From Selling Tires To Kilometers

Anbieter von Customer Solutions übernehmen neben der Bereitstellung von Investitionsgütern eine Reihe weiterer Leistungen, die mit einem Kundenproblem vor und während der Nutzung der Infrastruktur verbunden sind. Anstatt die Leistungen zu einem fixierten Preis zu verkaufen, verlagert der Anbieter die Erlöse in die Nutzungsphase und berechnet einen Preis pro Nutzungseinheit. Eduard Stoppel widmet sich der Untersuchung solcher nutzungsabhängiger Preissysteme auf industriellen Märkten. Das Ziel dabei ist es, ein Verständnis für das nutzungsabhängige Preissystem als Teil eines servicezentrierten Ansatzes herauszuarbeiten. Daraus werden die Wirkungsweise und die Konsequenzen dieses Preissystems abgeleitet. The Global Status Report on Road Safety 2018, launched by WHO in December 2018, highlights that the number of annual road traffic deaths has reached 1.35 million. Road traffic injuries are now the leading killer of people aged 5-29 years. The burden is disproportionately borne by pedestrians, cyclists and motorcyclists, in particular those living in developing countries. The report suggests that the price paid for mobility is too high, especially because proven measures exist. Drastic action is needed to put these measures in place to meet any future global target that might be set and save lives. The most comprehensive, global guide to business model design and innovation for academic and business audiences. Business Model Innovation Strategy: Transformational Concepts and Tools for Entrepreneurial Leaders is centered on a timely, mission-critical strategic issue that both founders of new firms and senior managers of incumbent firms globally need to address as they reimagine their firms in the post COVID-19 world. The book, which draws on over 20 years of the authors collaborative theoretical and rigorous empirical research, has a pragmatic orientation and is filled with examples and illustrations from around the world. This action-oriented book provides leaders with a rigorous and detailed guide to the design and implementation of innovative, and scalable business models for their companies. Faculty and students can use Business Model Innovation Strategy as a textbook in undergraduate, MBA, and EMBA degree courses as well as in executive courses of various designs and lengths. The content of the book has been tested in both degree and non-degree courses at some of the world's leading business schools and has helped students and firm leaders to develop ground-breaking business model innovations. This book will help you: Learn the basics of business model innovation ?including the latest developments in the field Learn how business model innovation presents new and profitable business opportunities in industries that were considered all but immune to attacks from newcomers Learn how to determine the viability of your current business model Explore new possibilities for value creation by redesigning your firm's business model Receive practical, step-by-step guidance on how to introduce business model innovation in your own company Become well-versed in an important area of business strategy and entrepreneurship Authors Amit and Zott anchored the book on their pioneering research and extensive scholarly and practitioner-oriented publications on the design, implementation, and performance implications of innovative business models. They are the most widely cited researchers in the field of business model innovation, and they teach at the top-ranked Wharton School of the University of Pennsylvania and the prestigious global business school IESE with campuses in

Barcelona, Madrid, Munich, New York, and São Paulo.

This book, from noted materials selection authority Mike Ashby, provides a structure and framework for analyzing sustainable development and the role of materials in it. The aim is to introduce ways of exploring sustainable development to readers in a way that avoids simplistic interpretations and approaches complexity in a systematic way. There is no completely "right" answer to questions of sustainable development – instead, there is a thoughtful, well-researched response that recognizes concerns of stakeholders, the conflicting priorities and the economic, legal and social aspects of a technology as well as its environmental legacy. The intent is not to offer solutions to sustainability challenges but rather to improve the quality of discussion and enable informed, balanced debate. Winner of a 2016 Most Promising New Textbook Award from the Textbook and Academic Authors Association Describes sustainable development in increasingly detailed progression, from a broad overview to specific tools and methods Six chapter length case studies on such topics as biopolymers, electric cars, bamboo, and lighting vividly illustrate the sustainable development process from a materials perspective Business and economic aspects are covered in chapters on corporate sustainability and the "circular materials economy" Support for course use includes online solutions manual and image bank

After two decades of reinvention, Japanese companies are re-emerging as major players in the new digital economy. They have responded to the rise of China and new global competition by moving upstream into critical deep-tech inputs and advanced materials and components. This new "aggregate niche strategy" has made Japan the technology anchor for many global supply chains. Although the end products do not carry a "Japan Inside" label, Japan plays a pivotal role in our everyday lives across many critical industries. This book is an in-depth exploration of current Japanese business strategies that make Japan the world's third-largest economy and an economic leader in Asia. To accomplish their reinvention, Japan's largest companies are building new processes of breakthrough innovation. Central to this book is how they are addressing the necessary changes in organizational design, internal management processes, employment, and corporate governance. Because Japan values social stability and economic equality, this reinvention is happening slowly and methodically, and has gone largely unnoticed by Western observers. Yet, Japan's more balanced model of "caring capitalism" is both competitive and transformative, and more socially responsible than the unbridled growth approach of the United States.

This updated and revised edition outlines strategies and models for how to use technology and knowledge to improve performance, create jobs and increase income. It shows what skills will be required to produce, sell and manage performance over time, and how manual jobs can contribute to reduce the consumption of non-renewable resources.

During the last thirty years, a wide range of product companies throughout the Western economies have considered moving into or setting up service businesses. Some have rejected the idea after careful consideration, some have wandered into competitive services without any real idea of what is involved and others have deliberately executed a carefully considered strategic manoeuvre. Included in this debate are some of the most famous business names in the western world: Unisys, Ericsson, Michelin, Nokia and HP. For IBM it was Lou Gerstener's 'big bet'; at GE it was one of former CEO

Jack Welch's 'four major strategies' and, at General Motors, the financial services arm was its most profitable business for many years. Yet very little has been published on this profound transition. As a result, myths and idiocies abound. Some routinely claim that the 'evolution from products through services to solutions' is inevitable. Others think that manufacturing is being outsourced to China and India while American or European teenagers face a career in hamburger stalls. The truth is much more fascinating. To succeed in a service business, most functions of a product company need to change. Operations, management, recruitment, finance, sales, new product development and marketing must all be adjusted. So the move into service therefore involves huge risk caused by disruptive and radical change. What has pushed realistic business people in such widely different industrial sectors to take so large a risk? Does their experience contain lessons or warnings for others? Is the trend likely to continue and affect other parts of the world as their economies develop? Will India, China or other developing economies need to learn how to export service once their manufacturing industries mature? Written by a successful businessman who has been at the heart of these changes in several companies and, with case studies from companies like IBM, Unilever, BT, Michelin, Ericsson and Nokia, this book explores the experience of those who have made the transition; and some who have resisted it. It covers in depth subjects such as: strategic focus, change management, service operations, branding a service business, service sales and service marketing. It is the first major work on this subject. "This book is a 'must read' for those considering the plunge into service growth and innovation. Even those companies that have already taken the plunge will gain fresh perspective" —Jim Spohrer, Director, IBM Almaden Research Centre, USA "Laurie Young details in very practical ways the reasons and methodologies for change ... I would recommend this book to every one of my customers." —Douglas Morse, Managing Principal for the Services Transformation and Innovation Group LLC "I am thrilled with the publication of this much needed book. In my work with businesses around the globe, I find that grappling with the challenge of transforming a company from products to services is a compelling priority for increasing numbers of firms." —Stephen W. Brown, PhD, Carson Chair, Professor and Executive Director, Center for Services Leadership, W. P. Carey School of Business, Arizona State University

This book provides benchmarking tools on sustainable manufacturing and aims to spur eco-innovation through better understanding of innovation mechanisms.

Some issues for 1972 for 1972-75 include section: The fleet specialist.

The concept of relationship marketing has been discussed among marketing academics and managers since the early 1980s. But instead of reaching its maturity stage, relationship marketing is nowadays encountering its next upsurge. Due to a confluence of trends driving the global business world—including the transition to service-based economies, faster product commoditization, intensified competition worldwide, growth among emerging markets, aging populations, advertising saturation, and (above all) the digital age—strong customer relationships are more than ever vital to company strategy and performance. *Relationship Marketing in the Digital Age* provides a comprehensive overview of the state-of-the-art of relationship marketing, offering

fruitful insights to marketing scholars and practitioners. In seven chapters, divided into two main sections on understanding (Part I) and effectively applying (Part II) relationship marketing, an introductory and a concluding chapter, readers learn how to successfully manage customer–seller relationships.

Do you want to know how a quintessentially British brand expands into the Chinese market, how organizations incorporate social media into their communication campaigns, or how a department store can channel its business online? What can you learn from these practices and how could it influence your career, whether in marketing or not? Marketing, 4th edition, will provide the skills vital to successfully engaging with marketing across all areas of society, from dealing with skeptical consumers, moving a business online, and deciding which pricing strategy to adopt, through to the ethical implications of marketing to children, and being aware of how to use social networking sites to a business advantage. In this edition, a broader range of integrated examples and market insights within each chapter demonstrate the relevance of theory to the practice, featuring companies such as Porsche, Facebook, and L'Oreal. The diversity of marketing on a global scale is showcased by examples that include advertising in the Middle East, Soberana marketing in Panama, and LEGO's expansion into emerging markets. Theory into practice boxes relate these examples back to the theoretical frameworks, models, and concepts outlined in the chapter, giving a fully integrated overview of not just what marketing theory looks like in practice, but how it can be used to promote a company's success. Video interviews with those in the industry offer a truly unique insight into the fascinating world of a marketing practitioner. For the fourth edition, the authors speak to a range of companies, from Withers Worldwide to Aston Martin, the City of London Police to Spotify, asking marketing professionals to talk you through how they dealt with a marketing problem facing their company. Review and discussion questions conclude each chapter, prompting readers to examine the themes discussed in more detail and encouraging them to engage critically with the theory. Links to seminal papers throughout each chapter also present the opportunity to take learning further. Employing their widely-praised writing style, the authors continue to encourage you to look beyond the classical marketing perspectives by contrasting these with the more modern services and societal schools of thought, while new author, Sara Rosengren, provides a fresh European perspective to the subject. The fourth edition of the best-selling Marketing, will pique your curiosity with a fascinating, contemporary, and motivational insight into this dynamic subject. The book is accompanied by an Online Resource Centre that features:

- For everyone: Practitioner Insight videos Library of video links Worksheets
- For students: Author Audio Podcasts Multiple choice questions Flashcard glossaries Employability guidance and marketing careers insights Internet activities Research insights Web links
- For lecturers: VLE content PowerPoint Slides Test bank Essay Questions Tutorial Activities Marketing Resource Bank Pointers on Answering Discussion questions Figures and Tables from the book Transcripts to

accompany the practitioner insight videos.

Rewrites the rules of commerce by pursuing outcomes rather than products; the seventh book in the Management on the Cutting Edge series comes from a definitive source--the MIT Sloan Management Review. Would you rather pay for healthcare or for better health? For school or education? For groceries or nutrition? A car or transportation? A theater performance or entertainment? In *The Ends Game*, Marco Bertini and Oded Koenigsberg describe how some firms are rewriting the rules of commerce: instead of selling the "means" (their products and services), they adopt innovative revenue models to pursue "ends" (actual outcomes). They show that paying by the pill, semester, food item, vehicle, or show does not necessarily reflect the value that customers actually derive from their purchases. Revenue models anchored on the ownership of products, they argue, are patently inferior.

Surprising rules for successful monetization Innovation is the most important driver of growth. Today, more than ever, companies need to innovate to survive. But successful innovation—measured in dollars and cents—is a very hard target to hit. Companies obsess over being creative and innovative and spend significant time and expense in designing and building products, yet struggle to monetize them: 72% of innovations fail to meet their financial targets—or fail entirely. Many companies have come to accept that a high failure rate, and the billions of dollars lost annually, is just the cost of doing business. *Monetizing Innovations* argues that this is tragic, wasteful, and wrong. Radically improving the odds that your innovation will succeed is just a matter of removing the guesswork. That happens when you put customer demand and willingness to pay in the driver seat—when you design the product around the price. It's a new paradigm, and that opens the door to true game change: You can stop hoping to monetize, and start knowing that you will. The authors at Simon Kucher know what they're talking about. As the world's premier pricing and monetization consulting services company, with 800 professionals in 30 cities around the globe, they have helped clients ranging from massive pharmaceuticals to fast-growing startups find success. In *Monetizing Innovation*, they distil the lessons of thirty years and over 10,000 projects into a practical, nine-step approach. Whether you are a CEO, executive leadership, or part of the team responsible for innovation and new product development, this book is for you, with special sections and checklist-driven summaries to make monetizing innovation part of your company's DNA. Illustrative case studies show how some of the world's best innovative companies like LinkedIn, Uber, Porsche, Optimizely, Draeger, Swarovski and big pharmaceutical companies have used principles outlined in this book. A direct challenge to the status quo "spray and pray" style of innovation, *Monetizing Innovation* presents a practical approach that can be adopted by any organization, in any industry. Most monetizing innovation failure point home. Now more than ever, companies must rethink the practices that have lost countless billions of dollars. *Monetizing Innovation* presents a new way forward, and a clear

promise: Go from hope to certainty.

This book mainly focuses on defining profit models, on how many main kinds of profit models there are, how profit models can change a company, and how to tailor a profit model to the needs of a certain company. In this context, profit models are classified as fixed-income, remaining-profit and profit-sharing, admission, toll, parking, fuel and sharing fees, profit sources, customer pricing, auction, combined pricing, etc. The logic behind all these profit models will be analyzed in detail and numerous micro-cases will be introduced. All of the micro-cases discussed are the best profit model practices used by outstanding enterprises, mainly from China and the USA (including HomeAway, Priceline, Tencent, Sina, Google, the Voice of China, CSPN and so on). These models will be complemented by a wealth of figures and additional tools to help readers better understand the principle of profit models. As such, the book not only explains “why” entrepreneurs preferred to apply a specific kind of profit model and not others, but also answers “how” they derived that model.

A radical new leadership strategy to transform business as we know it—from a dream team of INSEAD professors and mega-bestselling author Ram Charan

The business landscape is littered with the wreckage of companies that crashed and burned when an apocalypse came—in the shape of new competitive technologies, upstart entrants, demographic shifts, and new world orders. Who can feel safe in firestorm change? The authors of The Phoenix Encounter Method don't advise safety. In fact, their method of leadership thinking requires you to imagine burning your business to the ground—throwing yourself into a firestorm change—and turning the upheaval to your organization's advantage. It can then rise, phoenix-like, from the ashes, stronger and more powerful than ever. Written with a sense of urgency and purposefully radical provocation, The Phoenix Encounter Method represents the forward thinking of legendary business guru Ram Charan and professors from the senior global leadership program of INSEAD, one of the world's top graduate business schools. The resulting methodology, based on analysis of thousands of articles, studies, reports, and academic and business practice, was field tested in real-life Phoenix Encounters conducted with more than fifteen hundred senior executives—from startups and family businesses to legacy companies—representing a broad range of industry and sectors in both developed and developing economies. Whatever your sector or industry, if you're responsible for your organization's ability to use change as a transformative opportunity, you'll appreciate the dramatic impact The Phoenix Encounter Method will have on you, your leadership, and your organization.

This book highlights what it takes to be successful in identifying and executing environmental responsibility from an operational perspective. It provides cutting-edge research from globally recognized field experts. It is a useful resource for practitioners to explore why and how firms engage in environmentally responsible operations, but also a valuable resource for academics as an introductory

reference that provides direct exposure to key environmental operational problems faced by many firms today. This book can also be used as an introductory reading for students with varying educational backgrounds - from business school students interested in environmental issues to environmental scientists interested in obtaining a business perspective - as it provides a broad scope of key issues at the interface of operations management and environmental and social responsibility. *Environmentally Responsible Supply Chains* is structured in a modular fashion, with each chapter introducing and analyzing a specific timely topic, allowing readers to identify the chapters that relate to their interests. More specifically, the book distinguishes between two key drivers of environmental responsibility: Profit and Regulatory compliance. The book is divided into five sections. The first three sections of the book explore profit driven environmental responsibility, and provide examples as to where the motives for environmentally responsible business practices come from, where business opportunities are, and what operational perspectives are key to profitability. The last two sections of the book focus on regulation as a driver of environmental responsibility and identify motives, opportunities, or operational perspectives as to effective regulatory compliance. Ultimately the book introduces the reader to the fundamentals of sustainable operations and highlights the latest research on the topic.

*Strategic Sourcing Management* examines procurement and supply management in detail, covering the three dimensions of competitiveness, effectiveness and efficiency. Written by Olivier Bruel, Professor Emeritus HEC Paris, and a team of contributing experts from academia, consulting and industry, the book is organised into four parts: strategic decisions; operational management of procurement and related supply chain; management of human resources and dedicated information systems; management of performance and change. This book has been written with a comprehensive global and coherent approach but the chapters are self-standing, enabling the reader to dip into different sections according to need. *Strategic Sourcing Management* considers both tactical and strategic perspectives that link with a corporate strategy and it includes dedicated chapters on how to set up a Strategic Sourcing function. The text is enriched with clear graphics and solid examples of best practice. *Strategic Sourcing Management* is a robust text based on both research and experience, so an essential reference for practitioners and academics working in or studying procurement and supply management. It is suitable for anyone involved in procurement and supply management at a senior level but also for general management enabling them to understand the mechanisms of value creation through Strategic Sourcing.

Explores the homogenization of American culture and the impact of the fast food industry on modern-day health, economy, politics, popular culture, entertainment, and food production.

*XaaS: Everything-as-a-Service: The Lean and Agile Approach to Business Growth* takes the reader into the bold new world of pay-per-use for a product or service. From the perspective of the customer, the servitization model yields multiple benefits: the consumer can try out the product/service at a relatively low cost, the risk is mitigated, capital expenses can be converted into operating expenses, it is not needed to forecast

how often the product/service is used, and only parts of the product/service needed can be used. Similarly, a provider can benefit by having a larger market coverage, steadier stream of revenues, upgrades as and when needed, sharing of fixed assets across consumers, practicing of value-based pricing, and unbundling or bundling utility for consumers using appropriate pricing techniques. However, this 'nanoization' of products/services is tricky, and has to be designed carefully. This book provides a set of recipes to providers to adopt the XaaS model by changing the provider's mindset: dividing the product/service forces the provider to take a value-driven approach to his product/service, and consequently, eliminate all non-value added activities. The requirements of the XaaS model serve both as an objective to the innovation and internal processes of the provider, and as guide to understanding the customer's needs. The book also covers data acquisition, data analysis and synthesis, and data application needs of the XaaS model, with simple examples and case studies from the business world of firms that achieve these objectives successfully.

Tire Waste and Recycling takes a methodical approach to the recycling of tires, providing a detailed understanding on how to manage, process, and turn waste tires into valuable materials and industrial applications. Sections cover fundamental aspects such as tire use, composition, trends, legislation, the current global situation, the possibilities for moving towards a circular economy, lifecycle options, treatment methods, and opportunities for re-use, recycling and recovery. Subsequent sections of the book focus on specific technologies that enable the utilization of waste tires in the development of high value materials and advanced applications. Finally, the future of tire recycling is considered. This is an essential resource for scientists, R&D professionals, engineers and manufacturers working in the tire, rubber, waste, recycling, automotive and aerospace industries. In academia, the book will be of interest to researchers and advanced scientists across rubber science, polymer science, materials engineering, environmental science, chemistry and chemical engineering. Offers systematic coverage of tire recycling, covering composition, lifecycle, processing options, material developments and latest technologies Explains end-of-life-options in detail, considering approaches and methods for reduction, re-use, recycling and recovery Explores key application and product areas for recycled tire materials, from civil engineering, sports and leisure, to roads and transport, construction, automotive, and many more

NEW YORK TIMES BESTSELLER #1 WALL STREET JOURNAL BESTSELLER USA TODAY BESTSELLER BLUE OCEAN SHIFT is the essential follow up to Blue Ocean Strategy, the classic and 3.6 million copy global bestseller by world-renowned professors W. Chan Kim and Renee Mauborgne. Drawing on more than a decade of new work, Kim and Mauborgne show you how to move beyond competing, inspire your people's confidence, and seize new growth, guiding you step-by-step through how to take your organization from a red ocean crowded with competition to a blue ocean of uncontested market space. By combining the insights of human psychology with practical market-creating tools and real-world guidance, Kim and Mauborgne deliver the definitive guide to shift yourself, your team, or your organization to new heights of confidence, market creation, and growth. They show why nondisruptive creation is as important as disruption in seizing new growth. BLUE OCEAN SHIFT is packed with all-new research and examples of how leaders in diverse industries and organizations

made the shift and created new markets by applying the process and tools outlined in the book. Whether you are a cash-strapped startup or a large, established company, nonprofit or national government, you will learn how to move from red to blue oceans in a way that builds your people's confidence so that they own and drive the process. With battle-tested lessons learned from successes and failures in the field, BLUE OCEAN SHIFT is critical reading for leaders, managers, and entrepreneurs alike. You'll learn what works, what doesn't, and how to avoid the pitfalls along the way. This book will empower you to succeed as you embark on your own blue ocean journey. BLUE OCEAN SHIFT is indispensable for anyone committed to building a compelling future. Although research on business model innovation is flourishing internationally, many important questions on the 'how', 'what', and 'when' of this process remain largely unanswered, particularly in regard to the role of top management. This book answers some of those pressing questions by taking a deliberately managerial perspective. Based on new and original findings derived from a survey among firms from various industries, and several case studies (including DSM, NXP Semiconductors, Randstad, and TomTom), the authors provide new insights into how and when managers can change a firm's business model. They turn their attention particularly to one key question: is it better to replicate existing models or develop new ones? Business model renewal is regarded as being especially vital in highly competitive environments. Nonetheless, whatever the environment, high levels of both replication and renewal will be key for a firm to succeed. The book looks at four levers that can be used by managers to innovate their business model: management itself, organizational structure, technology, and co-creation with external parties. It discusses the individual effects of these levers on business model replication and renewal. It also analyses specific combinations that strengthen business model innovation, including those which are technology oriented, internally oriented, externally oriented, and those which combine all of the levers in an integrated way.

Improve your business performance through digital transformation Digital transformation has become commonplace across public and private sector organizations, and yet most struggle to achieve tangible results from it. Many make avoidable mistakes or fall into simple traps along the way. Written by a team of global digital transformation thought leaders, Hacking Digital provides practical advice and information that you need to successfully transform your organization. Hacking Digital is organized into six easy-to-follow sections: • Initiating Your Digital Transformation • Setting Up the Right Organizational Dynamics • Working with the Outside World • Creating Value in New Ways • Leading People and Organizations • Anchoring and Sustaining Performance How do you create a sense of urgency? How do you set up digital governance? How do you create successful digital offerings? How do you manage the relationship between digital transformation and IT? How do you scale digital initiatives? Hacking Digital answers these and many other questions you need to transform your organization and seize a competitive edge for years to come.

?Eine größer werdende Zahl von Industriegüterunternehmen bietet neben traditionellen Sachgütern auch verschiedenste industrielle Dienstleistungen an. Von dem Dienstleistungsangebot erhoffen sich die Unternehmen zusätzliche Umsätze und Gewinne, verbesserte Kundenbeziehungen und eine stärkere Differenzierung vom

Wettbewerb. Trotz der vielfältigen Vorteile zahlt sich eine verstärkte Dienstleistungsstrategie nicht für jedes Unternehmen aus. Eva Münkhoff untersucht die Auswirkungen des Angebots industrieller Dienstleistungen auf den Umsatz und die Profitabilität von 513 Unternehmen des deutschen Maschinenbaus. Die Anwendung der latenten Wachstumskurvenanalyse ermöglicht dabei die Berücksichtigung der Auswirkungen sowohl auf das Niveau als auch das Wachstum von Umsatz und Profitabilität. Die Ergebnisse der empirischen Analyse zeigen unterschiedliche Auswirkungen für produktorientierte Dienstleistungen (SSPs) und kundenorientierte Dienstleistungen (SSCs). Darüber hinaus unterscheiden sich die Auswirkungen industrieller Dienstleistungen in Abhängigkeit von der Unternehmensstruktur und den Kundenbeziehungen der Unternehmen. Auf Basis der Ergebnisse können Handlungsempfehlungen für den erfolgreichen Aufbau des Dienstleistungsgeschäfts abgeleitet werden.?

Innovez ! Tel est le nouvel impératif de toutes les entreprises, petites ou grandes, quel que soit le secteur d'activité. Or aujourd'hui, l'innovation ne se limite plus aux produits et aux technologies, elle est aussi stratégique, portant sur le business model. Mais comment créer ou réinventer son entreprise ? (Ré)inventez votre business model – Odyssée 3.14 offre une réponse originale à cette question. En s'appuyant sur les 3 piliers composant le business model, cette approche innovante propose d'explorer 14 directions pour inventer ou réinventer votre business model. Que vous soyez dirigeant ou créateur d'entreprise, manager ou encore étudiant, vous trouverez dans cet ouvrage une démarche d'innovation stimulante, depuis la génération des idées jusqu'à la mise en oeuvre concrète. Original dans son contenu, l'ouvrage l'est également dans sa forme : chaque direction est présentée sur une double page qui associe théorie et exemples concrets à des infographies, photos et graphiques. Alors, prêts pour l'aventure ? Odyssée 3.14 est née de plus de dix ans de recherche, de conseil et de formation dans le domaine de l'innovation et de la stratégie de la part des trois auteurs. 15 nouveaux cas réels d'invention ou de réinvention de Business Model viennent enrichir cette 2e édition : Hello Fresh, Ticket restaurant - Endered, EdemMcCallum, Zample, Lemonade, Jonhson & Jonhson Velcade responses, Nickel account, Tesla, Recycle bank, Uber, Anticafé, Desso, Salesforce.com, Xiaomi, Redbus. Le classement des cas (B to B, B to B to C, B to C) reste le même.

This book is a guide for professionals and industry experts. The sectoral approach is commendable. It would help understand how to achieve sustainability through CE principles.-Dr. Vijai Singhal Chief Environmental Engineer Rajasthan State Pollution Control Borad, Jaipur About the Book The book is a scholarly work on the maturing of Economies --- Closed, Open, Linear and now CIRCULAR. The author elaborates on how the new concept of Circular Economy could be a resource multiplier for countries especially for India where recycling rates are one-third to that of the global average. The book advances from the linear to Circular approach divulging how scarce resources could be put to optimum utilization, to restore our planet's harmony. Author has picked up several sectors, outlining how each could become sustainable through a loop-based approach. Several case-studies, infographics and diagrams make it easier for the reader to delve into the subject. An astute research work, the book is recommended for Circular Economy practitioners, Sustainability heads, industry experts, government bodies, policymakers, academia, research, people from

associated sectors, students, bilateral and multilateral organization that are working in sustainability. About The Author A post graduate environmentalist Shalini has been actively working in sustainability. She developed a Zero Waste program which helps entities to reduce their Carbon-Footprint. Her 'Project Zero' made headlines when it was awarded by the Uttarakhand State govt. An active social worker, she has several awards that add to her laurels. She has been recognized and awarded by Social Founder; London, Global Goodwill Ambassador; the US, ICUNR; India. She is currently chairing the International Council for Circular Economy.

The increasing importance of industrial services and rapid digitalization towards smart and remote services pose opportunities as well as challenges to the manufacturing sector. This book provides a holistic understanding of industrial service management and guides companies into building capabilities and management practices for smart and remote services. By combining insights from research and practice, it offers a unique perspective on the core and enabling activities of manufacturing companies for growth in the service business. In essence, the first part covers action-based research findings regarding service strategy, organizational design, service innovation, service sales, services operations, and customer relationship management together with insights into value networks. The second part introduces outstanding practices from leading manufacturing companies in industrial and smart services. The book concludes with a summary of key messages and recommendations to navigate the landscape of industrial and smart service management successfully.

„Digitale Transformationsexzellenz“ – Ein individuell adaptierbares Buch für KMU und B2B-Firmen Steffen Jäckle und Uwe Brüggemann erläutern in ihrem Buch „Digitale Transformationsexzellenz“, wie kleine und mittlere Unternehmen (KMU) sowie Firmen aus dem Business-to-Business-Bereich (B2B): a) die Herausforderungen der digitalen Transformation meistern. b) sich Wettbewerbsvorteile sichern. In ihrem Werk gehen die Autoren darauf ein, welche speziellen Gesetzmäßigkeiten, Risiken und Chancen für Unternehmen gelten, wenn es darum geht, die digitale Transformation erfolgreich zu bewerkstelligen. Mit Handlungsempfehlungen, Praxisbeispielen und Checklisten Das Buch „Digitale Transformationsexzellenz“ beschäftigt sich im Kern mit folgenden Inhalten: • Customer-Perspektive: Kundennutzen steigern • Company-Perspektive: Effizienz erhöhen und Wettbewerbsfähigkeit gewährleisten • Dominanz digitaler Technologien: die 22 Prototypen • Strategieentwicklung auf Basis der CCXM Anhand zahlreicher Praxisbeispiele werden strategische Optionen herausgearbeitet und individuell adaptierbare Handlungsoptionen sowie Checklisten für die Digitalisierung im Mittelstand abgeleitet.

Xaas: Everything-as-a-service - The Lean And Agile Approach To Business  
GrowthWorld Scientific

Examining the links between sustainable development, innovation strategy and the business model, this thought-provoking and timely book uses insightful case studies from mature and developing markets to demonstrate how sustainability needs to be at the core of every organization's strategy and innovation.

This book is aimed at companies, researchers, consultants, consumers, students and any interested public interested in the subject, the reflections and practices of the circular economy. As part of the draft law on the circular economy in France, the authors (researchers and experts) analyze the data and the reflections and base their

arguments on real examples in order to propose solutions and recommendations for a green economy. It gives an updated overview of the reflections and practices around the circular economy. The book is divided into three parts: - The company and its functions, innovative business models - The institutional, legislative and normative framework - Some sectors of activity with the prism of the circular economy

Living Innovation: Competing in the 21st Century Access Economy explores how the digital revolution has empowered customers, and how organizations have to innovate to gain a deeper understanding of user needs. Stepping away from the traditional mindset of products being the foremost concern of an organization, this book elaborates on how service value and the management of customer relationships are some of the new goals of an experience-driven economy. The ten chapters of this book provide insights and different perspectives into this new economy, including the consequences of the shift away from a product-based mindset, the role of the physical space as a stimulator of innovation and the keys to making service innovation a success.

Revised edition of the authors' Strategic planning for information systems, 2002. This book presents strategies and practices to allow everyday companies to cope with the fundamentally changing landscape of business models and to take advantage of the huge business opportunities arising from the advent of big data. It develops several case studies from companies in traditional industries like LEGO, Yamato and Mediq, but also examines small start-ups like Space Tango, which is partnering with major multinationals to develop new business models using big data. The book argues that businesses need to adapt and embark on their big data journey, helps them take the first step, and guides them along their way. It presents successful examples and deduces essential takeaway lessons from them, equipping executives to capitalize on big data and enabling them to make intelligent decisions in the big data transformation, giving their companies an essential competitive edge.

This book identifies and addresses the seven transformation journeys that are reshaping corporations today. It integrates and builds on the collective experience and learning of IMD's professors, who work directly with many organizations around the world and observe their transformation struggles at close range. By taking a holistic and interdisciplinary view of how organizations are transforming themselves, IMD's faculty accompany global executives - as individuals and as leaders of global corporations - on their transformation journeys.

This book addresses those involved in research or R&D. It introduces the principles of eco-innovation and the importance of the impact of their activity. This topic is considered in the context of natural and digital ecosystems powered by intelligent assistants (technology). Chapter 1 positions the innovation as a process and component of ecosystems including research, enterprises, technology (digital ecosystems) and environment. Sustainable success is a condition of survival and an expectation of those who invest in innovation. Chapter 2 describes the main elements to consider and gives some tips. Chapter 3 presents some selected initiatives at the national and European level and

provides a way of measuring success.

The Case Study method of teaching and learning, adopted by business schools and management centres globally, provides an important function in management education, but employing it effectively can often be a challenge. This book provides practical insights, tools and approaches for both case teaching and writing, drawing on perspectives from expert practitioners around the world. This book aims to critically examine different approaches to using case studies in group-based, participant-centred learning environments, exploring good practices for case teaching and learning. It provides guidance for case writers on various approaches to structuring case data, presentational formats, and the use of technology in the construction of different types of cases. It also demonstrates the use of the case method as a tool for assessment, supporting students' own development of cases to showcase good practice in organisations. The final section of this book showcases some of the resources available, providing links and reviews of additional material that can support future case teaching and writing practice, including publication. The Case Study Companion is designed for lecturers using cases within their teaching across all management disciplines, as well as those training for Professional Development and Management Education qualifications. It will also be useful for postgraduate, MBA and Executive Education students wanting to make the most of case studies in their learning and assessments.
