A comprehensive introduction to micro-economics in general, this book is set against a contemporary South African background. Straightforward language, practical examples and numerous graphs illustrate the theory in this textbook and make it especially accessible for distance learners.

Essentials of Microeconomics is an excellent introduction to microeconomics. It presents the basic tools of microeconomics clearly and concisely. The book presents a vigorous treatment of all relevant introductory microeconomic concepts. The book also emphasizes on modern economics — game theory and imperfect markets. Each chapter is self-contained and includes the required key mathematical skills at the start. This book is ideal not only for introductory microeconomics course, but its level of analysis also makes the book appropriate for introductory level economics taught at postgraduate level. With the emphasis on strategy, this text is also well suited for use in business economics course.

The juxtaposition of Kennedy and Reagan approaches to economic problems is particularly instructive in that they express the two major - and quite different - approaches of macroeconomic policy in the past three decades: the 1962 Kennedy Camelot which relied on traditional Keynesian economics, and the 1982 Reagan program which called for a supplyside solution to the country's economic difficulties. From today's vantage point it is useful to compare what these two different groups of economic advisors planned to do, what they did, and what the results were. James Tobin, who received the Nobel Prize in economics in 1981, is Sterling Professor of Economics at Yale. His Essays in Economics, collected in three volumes, are available from The MIT Press. Murray L. Weidenbaum is Director of the Center for the Study of American Business and Mallinckrodt Distinguished University Professor at Washington University.

use in developing a one-semester high school course on economics. The volume includes activity outlines, a model for assessment, and a list of resources to enhance instruction in economics. The handbook identifies methods to enrich instruction using the state-mandated economic component of the California high school curriculum. Chapter 1 reviews the basic components of microeconomics, macroeconomics, economic systems, and international trade as part of the course content. Chapter 2 describes issues-oriented activities to enliven economic concepts. Ten modules provide opportunities to encourage students to study economics through the application of basic concepts. Chapter 3 identifies the conceptual, semantic, and attitudinal hurdles that can interfere with a student's learning of economics. Chapter 4 illustrates a model for the assessment of student learning in a high school economics course. An appendix identifies 53 resources and addresses for further information to enhance high school economics instruction. (CK)

Responsible Innovation. For some, this expression is only an oxymoron or, worse, a means of masking with a sheet of virtue economic practices that would otherwise appear selfish and self-interested. For others, theorists and actors of innovation, this expression represents a formidable lever of action and a rich conceptual source from which to draw new ways of innovating. The articulation between different levels of norms – economic and ethical, to which we can add the legal dimension – is not new, and is the subject of an in-depth reflection, decades

old, around the idea of Corporate Social Responsibility (CSR). By taking up some debates on CSR, most of which are foreign to the current authors of responsible innovation, this book examines the various justifications that CSR brings in order to convince economic players, subject to powerful market forces, of their responsible commitment. But these are not enough. The book also explores the specific contribution of the concept of responsible innovation to coping with the technological, social and political breakthroughs generated by innovation, and is based on philosophical resources such as the ethics of virtue and the ethics of “care”.
