The Civilization of the Renaissance in Italy (1860) is a work of art history by Swiss historian Jacob Burckhardt. Recognized today as the founder of modern art history and as one of the key thinkers of the nineteenth century, Burckhardt changed not only the way we think about the Renaissance in relation to European and world history, but the value placed on art as a tool for understanding historical developments. The Civilization of the Renaissance in Italy begins with a section on the historical events which sparked the Renaissance, focusing especially on the frequent military conflicts which marred the era as well as on the constant political upheavals undergone by such Italian regions and cities as Rome, Venice, and Florence. Burckhardt then moves to a philosophical discussion of the development of individuality in Italian culture, arguing that the political circumstances of those living in the Republics enabled such thinkers as Dante and Petrarch to create art that corresponded with that newfound sense of individuality. The third section discusses one of the key elements of Renaissance culture: the revival of interest in the cultural products of the ancient world, especially Greece and Rome. Part four focuses on the prominence of discovery in Renaissance culture, for which Burckhardt looks to the colonial expedition of Columbus, the growth of the natural sciences, and the achievements of such poets and writers as Dante, Petrarch, and Boccaccio in discovering new ways to describe humanity and the human spirit. In the fifth section, the importance of societal customs and festivals is discussed, and in the sixth and final part, Burckhardt observes the profound shifts undergone by religion and morality in Italy at the time. The Civilization of the Renaissance in Italy is a thorough, dynamic work of art history that not only changed the study of history at universities around the world, but elevated the status of art in understanding the process of cultural change. With a beautifully designed cover and professionally typeset manuscript, this edition of Jacob Burckhardt's The Civilization of the Renaissance in Italy is a classic of European art history reimagined for modern readers.

Women in Frankish Society is a careful and thorough study of women and their roles in the Merovingian and Carolingian periods of the Middle Ages. During the 5th through 9th centuries, Frankish society transformed from a relatively primitive tribal structure to a more complex hierarchical organization. Suzanne Fonay Wemple sets out to understand the forces at work in expanding and limiting women's sphere of activity and influence during this time. Her goal is to explain the gap between the ideals and laws on one hand and the social reality on the other. What effect did the administrative structures and social stratification in Merovingian society have on equality between the sexes? Did the emergence of the nuclear family and enforcement of monogamy in the Carolingian era enhance or erode the power and status of women? Wemple examines a wealth of primary sources, such deeds, testaments, formulae, genealogy, ecclesiastical and secular court records, letters, treatises, and poems in order to reveal the enduring German, Roman, and Christian cultural legacies in the Carolingian Empire. She attends to women in secular life and matters of law, economy, marriage, and inheritance, as well as chronicling the changes to women's experiences in religious life, from the waning influence of women in the Frankish church to the rise of female asceticism and monasticism.

Bryan Stevenson was a young lawyer when he founded the Equal Justice Initiative, a legal practice dedicated to defending those most desperate and in need: the poor, the wrongly condemned, and women and children trapped in the farthest reaches of our criminal justice system. One of his first cases was that of Walter McMillian, a young man who was sentenced to die for a notorious murder he insisted he didn’t commit. The case drew Bryan into a tangle of conspiracy, political machination, and legal brinkmanship—and transformed his understanding of mercy and justice forever. *Just Mercy* is at once an unforgettable account of an idealistic, gifted young lawyer’s coming of age, a moving window into the lives of those he has defended, and an inspiring argument for compassion in the pursuit of true justice. Winner of the Carnegie Medal for Excellence in Nonfiction • Winner of the NAACP Image Award for Nonfiction • Winner of a Books for a Better Life Award • Finalist for the Los Angeles Times Book Prize • Finalist for the Kirkus Reviews Prize • An American Library Association Notable Book “Every bit as moving as *To Kill a Mockingbird*, and in some ways more so . . . a searing indictment of American criminal justice and a stirring testament to the salvation that fighting for the vulnerable sometimes yields.”—David Cole, *The New York Review of Books* “Searing, moving . . . Bryan Stevenson may, indeed, be America’s Mandela.”—Nicholas Kristof, *The New York Times* “You don’t have to read too long to start cheering for this man. . . . The message of this book . . . is that evil can be overcome, a difference can be made. *Just Mercy* will make you upset and it will make you hopeful.”—Ted Conover, *The New York Times Book Review* “Inspiring . . . a work of style, substance and clarity . . . Stevenson is not only a great lawyer, he’s also a gifted writer and storyteller.”—*The Washington Post* “As deeply moving, poignant and powerful a book as has been, and maybe ever can be, written about the death penalty.”—*The Financial Times* “Brilliant.”—*The Philadelphia Inquirer*

First full English edition of classic work on medieval warfare, updated to take recent scholarship into account.

Most of what has been written on the economy of the middle ages is deeply influenced by abstract concepts and theories. The most powerful and popular of these guiding beliefs are derived from intellectual foundations laid down in the eighteenth and nineteenth centuries by Adam Smith, Johan von Thünen, Thomas Malthus, David Ricardo, and Karl Marx. In the hands of twentieth-century historians and social scientists these venerable ideas have been moulded into three grand explanatory ideas which continue to dominate interpretations of economic development. These trumpet in turn the claims of 'commercialization', 'population and resources', or 'class power and property relations' as the prime movers of historical change. In this highly original book John Hatcher and Mark Bailey examine the structure and test the validity of these conflicting models from a variety of perspectives. In the course of their investigations they provide not only detailed reconstructions of the economic history of England in the middle ages and sustained critical commentaries on the work of leading historians, but also discussions of the philosophy and methods of history and the social sciences. The result is a short and readily intelligible introduction to medieval economic history, an up-to-date critique of established models, and a succinct treatise on historiographical method.

"This book focuses on an in-depth assessment on strategies and instructional design practices appropriate for the flipped classroom model, highlighting the benefits, shortcoming, perceptions, and academic results of the flipped classroom model"--Provided by publisher.

In addition, the book provides answers to frequently asked questions to help readers understand many of the issues and misconceptions about evolution. The book includes sample activities for teaching about evolution and the nature of science. For example, the book includes activities that investigate fossil footprints and population growth that teachers of science can use to introduce principles of evolution. Background information, materials, and step-by-step presentations are provided for each activity. In addition, this volume: Presents the evidence for evolution, including how evolution can be observed today. Explains the nature of science through a variety of examples. Describes how science differs from other human endeavors and why evolution is one of the best avenues for helping students understand this distinction.
