Saggio introduttivo di Mario PicchiPremesse di Goffredo Fofi e Mario PicchiEdizioni integralill richiamo della foresta, unanimemente considerato il capolavoro di Jack London, è una delle opere letterarie più lette e conosciute al mondo. London lo scrisse di getto alla fine del 1902 e riuscì a farlo pubblicare l'anno successivo sul «Saturday Evening Post». In questo breve e densissimo romanzo la descrizione del mondo degli uomini attraverso lo sguardo del cane si fonde con l'esaltante e tesa rappresentazione della ricerca di amore e libertà. Zanna Bianca, pubblicato cinque anni dopo, ripropone, a un livello più armonico e ragionato, tutti i temi cari a London: la lotta per la vita, le grandi solitudini del Nord, la legge dura e inflessibile della sopravvivenza che accomuna e lega esseri umani e animali. Tutto ciò si esprime, come negli altri racconti dedicati ai cani, in scene di indimenticabile potenza. «Buck sembrava davvero un demone dagli occhi rossi quando si raccolse per prendere lo slancio, con il pelo ritto, la bocca schiumante, un luccichio folle negli occhi iniettati di sangue. Si scagliò contro l'uomo con i suoi sessantatré chili di furia, aumentati dall'ira repressa di due giorni e due notti.» Jack Londonpseudonimo di John Griffith Chaney, nacque nel 1876 a San Francisco. Viaggiò moltissimo ed esercitò i più svariati mestieri, da mozzo a cacciatore di foche, a lustrascarpe, a commerciante. Riuscì tuttavia, da autodidatta, a crearsi una solida cultura con lo studio disordinato dei grandi autori europei. La lettura di Marx, il contatto con i vagabondi americani, la sua stessa vita spesso miserabile lo spinsero verso un socialismo istintivo. Esordì come scrittore pubblicando i suoi racconti su periodici locali. Morì, forse suicida, nel 1916.

Orlando Eijo ci offre un nuovo modo di comprendere il rapporto tra uomo e cane, e con esso la nostra stessa natura di esseri umani, sia sotto l'aspetto biologico che spirituale. Questa volta è attraverso una tenera storia che lascerà nel lettore la sensazione di una deliziosa brezza primaverile. Francisco, un uomo vedovo desideroso di dare sempre di più, è appena andato in pensione dopo aver lavorato tutta la vita. Con i figli ormai indipendenti, la sua casa solitaria diventa una prigione silenziosa che lo deprime. I figli decidono così di regalargli un cucciolo di border collie per fargli compagnia. Questo cucciolo lo porterà ad iniziare una nuova attività, il disc dog, approfondendolo al punto di incontrare il volto spirituale e profondo della relazione tra uomo e cane sin dal suo inizio quando, secondo la leggenda Sioux, fu il Grande Spirito, Wakán Tanka , che inviò i lupi come suoi angeli per aiutare l'essere umano a percorrere questo passaggio della vita. Con le profonde conversazioni di Francisco con suo figlio Jorge, psicologo, il lettore troverà l'opportunità di apprendere concetti di psicologia canina e umana in un modo chiaro e bello, non solo comprendendo i nostri comportamenti, ma approfondendo l'amore per la vita come il Grande Spirito volle insegnare con i suoi inviati a quattro zampe. Il piccolo border collie porterà grandi cambiamenti nella vita di Francisco e in quella di altri personaggi della storia, una storia che il lettore divorerà dall'inizio alla fine avidamente e senza sforzo. Recensioni Il consacrato poeta, narratore, critico, insegnante alle Università di Belgrado, Lubiana e Venezia, Octavio Prenz, scrisse da Trieste (Italia) su questa prima opera narrativa di Eijo "la sorpresa è stata più che piacevole, perché sa raccontare con una prosa fluida che suscita l'interesse del lettore e lo invita a continuare a leggere. Mi ha fatto scoprire cose che ignoravo e che arricchiscono, (Orlando Eij

India is a lumbering, elephantine State that cannot be expected to pivot around its heels, irrespective of the capability, intentions and skills of its present mahout. That may explain why it took 67 long years to resurrect prime minister-ship by electing for the first time a deserving astute down to earth eminently-suited politician who had tasted poverty and hard work and seems to be the one to relate to citizens' aspirations and needs. He possesses vision and necessary will to transform a fledgling country into a mega economy and world power. Narendra Modi, as a truly nationalistic politician, may be taller than Nehru. He became the first ever PM to visit INA Memorial in Singapore. And the first Indian in four centuries to inspect a 'Guard of Honor' from the British Army in London! However, thanks to Congress party's dirty politics, he inherited a deeply divisive polity, rusted three pillars of democracy muddled with long-nurtured anti-nationalistic media. Modi earned kudos whichever nation he visited. His maiden American trip four months after taking over was a raving success hitherto not achieved by any of his predecessors that included three trips each by Nehru and Indira and double that number by Modi's incompetent and ineffectual immediate predecessor – a puppet in the hands of his Italy-born white Catholic lady boss! During the 18 months, Modi has been showing promise by undoubtedly raising the stature of the country globally. Back home, deeply and widely pervading corruption, divisiveness, illiteracy and lack of nationalism are sinister and life-threatening ailments needing drastic cure. We are corrupt and, therefore, elect corrupt politicians. The latest is Bihar's humongous mandate on communal lines: First-time MLA sons of a convicted (for corruption) politician become ministers – the ninth class-fail deputy CM and 12th class as health minister. Till the time we become dutiful, nationalistic and sincere the status quo is not going to change. We must 'educate' our masses in general but our youngsters who are the future custodians of the country in particular but not up to the mark in many ways. The generations born after independence have to understand the true account/value of the hard-won freedom and imbibe our civilization and culture. Only then the misconceptions on created 'fictional' heroes can be rectified. Only then our younger folks can appreciate the importance of their duties to their motherland. Our politicians must become Hindustanis first and foremost, start working for the benefit of their compatriots rather their own families. They must forthwith stop eschew vote-bank politics. Only when all of us are patriotic enough we can offer a united front against biggest threat to us from terrorism incited and inflicted by Pakistan for decades; aided and abetted by so many anti-nationalistic political parties who also will have to mend their nasty ways and allow the parliament to function smoothly so that agenda on economic reforms can move forward. All of us have to contribute whole-heartedly for progress and development. Every citizen irrespective of caste/creed must exhibit an apparent firm and free will to work towards the betterment of the land. We must weed out the mindset where people live here but their loyalty lies elsewhere as dictated by the leaders of their faith. No religious law can take priority over the national law. There has to be common civil code so that everyone is treated equally. The way things stand today, we are only going down and down. This will continue unless we correct our mindset and course radically! Hindus' extreme tolerance during last millennium led to rise of intolerant Islam aided and abetted by Congress and its cronies and like-minded parties. Hindustan has been looted and marauded by foreigners and bled high and dry of its richness and natural resources. Alas! This loot continued after independence by parties in power. Modi has somehow disturbed the looters' political thought process by challenging it with their ideology and hence has been declared 'Intolerable' since they see no future if Modi continues the good work for his motherland. I do hope that our people wake unitedly to become truly democratically independent nation. Our paid, purchased and partisan media will have to become neutral, non-biased and nationalistic. If not contained, our electronic media, left liberals and pseudo-seculars wil ruin the country. The anti-nationalistic politicians must shun their derogatory practices of belittling the country in every forum and seriously consider their duty and debt to their motherland as their primary function. Otherwise, we are not far from our doomsday. Thus it is now or never for us Hindustanis to rise and stand erect steadfast!

Meet Bertie. He's an excitable little scamp. 'You will adore this gorgeous book' - MILLY JOHNSON 'Charming and touching' - KATIE FFORDE 'The perfect feel-good read!' - MANDY BAGGOT The heartwarming tale of how Bertie saves a family at Christmas is perfect for fans of A Pug Like Percy: the ideal read for curling up with in front of the fire. Bertie is alone, devastated after his beloved sister and fellow beagle Molly is adopted, leaving him behind. Can he find Molly and bring the Green family back together again...all in time for Christmas?

Hailed as Italy's The Fault in Our Stars, this Italian bestseller is now available for the first time in English. "I was born on the first day of school, and I grew up and old in just two hundred days . . ." Sixteen-year-old Leo has a way with words, but he doesn't

know it yet. He spends his time texting, polishing soccer maneuvers, and killing time with Niko and Silvia. Until a new teacher arrives and challenges him to give voice to his dreams. And so Leo is inspired to win over the red-haired beauty Beatrice. She doesn't know Leo exists, but he's convinced that his dream will come true. When Leo lands in the hospital and learns that Beatrice has been admitted too, his mission to be there for her will send him on a thrilling but heartbreaking journey. He wants to help her but doesn't know how—and his dream of love will force him to grow up fast. Having already sold over a million copies, Alessandro D'Avenia's debut novel is considered Italy's *The Fault in Our Stars*. Now available in English for the first time, this rich, funny, and heartwarming coming-of-age tale asks us to explore the meaning—and the cost—of friendship, and shows us what happens when suffering bursts into the world of teenagers and renders the world of adults speechless.

Is walking your dog a tug-of-war? At last, a simple way to teach your dog to walk on a leash without pulling your arm off!

Norwegian dog trainer, Turid Rugaas, internationally known for her ground-breaking work on canine body language and author of *On Talking Terms with Dogs: Calming Signals*, turns her attention to the common problem of dogs that pull while on a leash. In *My Dog Pulls. What Do I Do?* you will learn Turid's quick and easy method to train any age, size or breed of dog to walk calmly and quietly on a loose leash. Her approach is humane and based on a solid understanding of why dogs pull and how to work with the dog's nature and the environment to overcome the problem. City, town or country walking will become more relaxed, reducing stress for dog and owner. *My Dog Pulls* explains: Why dogs develop pulling problems. Simple steps to retraining even a vigorous puller. How to rehabilitate the puller with clear, helpful photographs. Correct use of leashes, collars and harnesses. What works, what doesn't. Troubleshooting problems that arise in training.

"An essential read for anyone interested in the stories of the animals in our home or on our plate."—BBC Focus Without our domesticated plants and animals, human civilization as we know it would not exist. We would still be living at subsistence level as hunter-gatherers if not for domestication. It is no accident that the cradle of civilization—the Middle East—is where sheep, goats, pigs, cattle, and cats commenced their fatefully intimate association with humans. Before the agricultural revolution, there were perhaps 10 million humans on earth. Now there are more than 7 billion of us. Our domesticated species have also thrived, in stark contrast to their wild ancestors. In a human-constructed environment—or man-made world—it pays to be domesticated. Domestication is an evolutionary process first and foremost. What most distinguishes domesticated animals from their wild ancestors are genetic alterations resulting in tameness, the capacity to tolerate close human proximity. But selection for tameness often results in a host of seemingly unrelated by-products, including floppy ears, skeletal alterations, reduced aggression, increased sociality, and reduced brain size. It's a package deal known as the domestication syndrome. Elements of the domestication syndrome can be found in every domesticated species—not only cats, dogs, pigs, sheep, cattle, and horses but also more recent human creations, such as domesticated camels, reindeer, and laboratory rats. That domestication results in this suite of changes in such a wide variety of mammals is a fascinating evolutionary story, one that sheds much light on the evolutionary process in general. We humans, too, show signs of the domestication syndrome, which some believe was key to our evolutionary success. By this view, human evolution parallels the evolution of dogs from wolves, in particular. A natural storyteller, Richard C. Francis weaves history, archaeology, and anthropology to create a fascinating narrative while seamlessly integrating the most cutting-edge ideas in twenty-first-century biology, from genomics to evo-devo.

Mattia Pascal endures a life of drudgery in a provincial town. Then, providentially, he discovers that he has been declared dead. Realizing he has a chance to start over, to do it right this time, he moves to a new city, adopts a new name, and a new course of life—only to find that this new existence is as insufferable as the old one. But when he returns to the world he left behind, it's too late: his job is gone, his wife has remarried. Mattia Pascal's fate is to live on as the ghost of the man he was. An explorer of identity and its mysteries, a connoisseur of black humor, Nobel Prize winner Luigi Pirandello is among the most teasing and profound of modern masters. *The Late Mattia Pascal*, here rendered into English by the outstanding translator William Weaver, offers an irresistible introduction to this great writer's work

«Questo eBook non pretende di "insegnare" ai proprietari a gestire al meglio l'amato quattrozampe» scrive Giancarlo Nazari, l'autore «ma di raccontare, attraverso la mia diretta esperienza e le mie ricerche, cosa significa vivere con i cani, educarli e farci in qualche modo educare da loro all'amicizia e all'affetto». E aggiunge: «Sono un biologo piuttosto eclettico che, da quando ha potuto permettersi una villetta con giardino, ha arricchito la famiglia di una compagnia pelosa. Credevo che avesse bisogno di un minimo di spazio verde per godersi la libertà. Errore! I miei cani magari nel prato ci stavano quando non ero presente in casa, ma appena rientravo non c'era verso di toglierseli di torno. E la cosa, lo ammetto mi piaceva non poco. Già, ma quali sono stati i miei cani? Ne ho avuti cinque (sarebbe meglio dire che sono cinque ad avermi avuto) ma in realtà i "miei" cani sono stati e sono molti di più: quelli del canile rifugio ai quali potevo offrire un po' del mio tempo per l'ora

della passeggiata settimanale, quelli che incontro nei parchi cittadini, gli inavvicinabili randagi conquistabili solo con la scatoletta lasciata nel prato e per i quali mi è stata di aiuto l'esperienza maturata osservando con il binocolo e fotografando con il teleobiettivo gli uccelli ed i mammiferi selvatici. Questo eBook non pretende di essere un manuale per "insegnare" il modo migliore per gestire l'amico peloso; lo propongo invece come stimolo per un maggiore scambio di conoscenze tra proprietari, cinofili, allevatori. Una base da cui partire affinché il rapporto con il nostro cane non si riduca a un semplice relazione di convivenza più o meno conflittuale ma per ottenere una felice combinazione nella quale entrambi i partner trovano reciproca soddisfazione».

Barking is natural and almost all dogs bark. It is one of the many ways dogs communicate with each other as well as with humans. In this book, author Turid Rugaas, well known for her work on identifying and utilizing canine "calming signals," turns her attention to understanding and managing barking behavior.

Reverend Graeme Sims's faithful pack follow his every command as if they can read his mind. But their willingness is down to an enlightened training method using his technique of dog whispering, which is based on the idea of treating the dogs as partners, not as servants, and human and dog learning to understand each other. This detailed, step-by-step instruction book shows you how to communicate properly with your dog, including guidelines on: how to choose the right breed of dog for you (or whether you're the right owner for a dog); how and when to use different commands; how to build a bond of trust; how to overcome problems with specific sections on the problem dog, the rescue dog, the nervous dog and the aggressive dog. THE DOG WHISPERER is a definitive guide to effective dog training for dog-owners and dog-lovers everywhere.

Hailed by Terry Eagleton in "The Guardian" as "definitive," this is the only complete and authoritative edition of Antonio Gramsci's deeply personal and vivid prison letters.

This is a new edition of the world's leading textbook on journalism. Translated into more than a dozen languages, David Randall's handbook is an invaluable guide to the "universals" of good journalistic practice for professional and trainee journalists worldwide. Irrespective of language or culture, good journalists share a common commitment to the search for truth, often in difficult circumstances. David Randall emphasizes that good journalism isn't just about universal objectives: it must also involve the acquisition of a range of skills that will empower journalists to operate in an industry where ownership, technology and information are constantly changing. This acclaimed handbook challenges old attitudes, procedures and techniques of journalism where they are seen as cynical and sloppy. This fully updated edition contains scores of new anecdotes and examples, drawing on the author's own experience as a national newspaper reporter and columnist.

Il richiamo della foresta • Il lupo dei mari • Zanna bianca e altre storie di cani • Il Tallone di ferro • Martin Eden • I racconti del Grande Nord e della corsa all'oro • Racconti della pattuglia guardiapescia • La sfida e altre storie di boxe • I racconti del Pacifico e dei Mari del Sud Saggio introduttivo generale di Mario Picchi Introduzioni di Goffredo Fofi, Walter Mauro, Mario Picchi Edizioni integrali Nell'opera di Jack London, di cui questa raccolta ripercorre le tappe principali, si riflettono le sue pluriformi esperienze di vita: nel capolavoro Il richiamo della foresta e in Zanna bianca, come nei racconti dedicati alla corsa all'oro nelle desolate vastità del Grande Nord americano, risuonano tutti i temi e le atmosfere a lui cari, la lotta per la sopravvivenza, la legge dura e inflessibile della natura che accomuna esseri umani e animali, la solidarietà e il coraggio. E sono storie di sogni impossibili, di indiani e cercatori d'oro, di uomini soli con se stessi nel momento della prova più difficile. Quando poi le desolate distese ghiacciate cedono il posto alle calde correnti del Pacifico, London accoglie nei suoi racconti insoliti eroi provenienti da civiltà diverse, abitanti di isole incantate, portatori di nuovi valori, che affrontano le loro prove sfidando il mare. Ma c'è un'altra violenza, oltre quella senza soggetto della natura, contro cui bisogna lottare, stavolta dentro la società civile: London incita alla rivolta contro le convenzioni e le ingiustizie, alla ricerca di un'autenticità perduta e di un ideale sociale intuito attraverso l'esperienza della propria e altrui ribellione. È il tema di Martin Eden e del Tallone di ferro. Di London Mario Picchi scrive: «Americano fino al midollo, persino nella ricerca delle sue (nobili) origini, London resta ancor oggi, con Edgar A. Poe, il più universale degli scrittori americani, che mischia nella sua opera, con ugual potenza di energia e di speranza, la sua vita vera e idealizzata insieme con lo slancio per l'avvenire». With a scientist's mind and an animal lover's compassion, world-renowned biologist Rupert Sheldrake presents a groundbreaking exploration of animal behavior that will profoundly change the way we think about animals--and ourselves. How do cats know when it's time to go to the vet, even before the cat carrier comes out? How do dogs know when their owners are returning home at unexpected times? How can horses find their way back to the stable over completely unfamiliar terrain? After five years of extensive research involving thousands of people who have pets and work with animals, Dr. Sheldrake proves conclusively what many pet owners already know: there is a strong connection between humans and animals that defies present-day scientific understanding. Sheldrake compellingly demonstrates that we and our pets are social animals linked together by invisible bonds connecting animals to each other, to their owners, and to their homes in powerful ways. His provocative ideas about these social, or morphic, fields explain the uncanny behavior often observed in pets and help provide an explanation for amazing animal behavior in the wild, such as migration and homing. Dogs That Know When Their Owners Are Coming Home not only provides fascinating insight into animal, and human, behavior, but also teaches us to question the boundaries of conventional scientific thought, and shows that the very animals who are closest to us have much to teach us about biology, nature, and consciousness. Domestic Animal Behavior for Veterinarians and Animal Scientists, Sixth Edition is a fully updated revision of this popular, classic text offering a thorough understanding of the normal behavior of domestic animals. Provides a complete understanding of the normal behavior of domestic animals Covers dogs, cats, horses, pigs, sheep, cattle, and goats Describes all key aspects of animal behavior, with images to support the concepts Revised and updated to cover the latest thinking, with enhanced coverage of behavioral genetics, animal cognition, and learning Includes access to a companion website with review questions and answers and the figures from the book in PowerPoint
