The Marrakesh Treaty to Facilitate Access to Published Works for Persons Who Are Blind, Visually Impaired, or Otherwise Print Disabled is a watershed development in the fields of intellectual property and human rights. As the first international legal instrument to establish mandatory exceptions to copyright, the Marrakesh Treaty uses the legal and policy tools of copyright to advance human rights. The World Blind Union Guide to the Marrakesh Treaty offers a comprehensive framework for interpreting the Treaty in ways that enhance the ability of print-disabled individuals to create, read, and share books and cultural materials in accessible formats. The Guide also provides specific recommendations to government officials, policymakers, and disability rights organizations involved with implementing the Treaty's provisions in national law.

Much of the data available today is unstructured and text-heavy, making it challenging for analysts to apply their usual data wrangling and visualization tools. With this practical book, you'll explore text-mining techniques with `tidytext`, a package that authors Julia Silge and David Robinson developed using the tidy principles behind R packages like `ggraph` and `dplyr`. You'll learn how `tidytext` and other tidy tools in R can make text analysis easier and more effective. The authors demonstrate how treating text as data frames enables you to manipulate, summarize, and visualize characteristics of text. You'll also learn how to integrate natural language processing (NLP) into effective workflows. Practical code examples and data explorations will help you generate real insights from literature, news, and social media. Learn how to apply the tidy text format to NLP Use sentiment analysis to mine the emotional content of text Identify a document's most important terms with frequency measurements Explore relationships and connections between words with the `ggraph` and `widyr` packages Convert back and forth between R's tidy and non-tidy text formats Use topic modeling to classify document collections into natural groups Examine case studies that compare Twitter archives, dig into NASA metadata, and analyze thousands of Usenet messages

'This monograph was begun during my residence as Rogers Memorial Fellow at Harvard University, and is based mainly upon a study of the sources, i.e., national, State, and colonial statutes, Congressional documents, reports of societies, personal narratives, etc. The collection of laws available for this research was, I think, nearly complete; on the other hand, facts and statistics bearing on the economic side of the study have been difficult to find, and my conclusions are consequently liable to modification from this source. The question of the suppression of the slave-trade is so intimately connected with the questions as to its rise, the system of American slavery, and the whole colonial policy of the eighteenth century, that it is difficult to isolate it, and at the same time to avoid superficiality on the one hand, and unscientific narrowness of view on the other. While I could not hope entirely to overcome such a difficulty, I nevertheless trust that I have succeeded in rendering this monograph a small contribution to the scientific study of slavery and the American Negro.' William Edward Burghardt "W. E. B." Du Bois (1868 – 1963) was an American sociologist, historian, civil rights activist, Pan-Africanist, author, writer and editor. Born in Great Barrington, Massachusetts, Du Bois grew up in a relatively tolerant and integrated community. After completing graduate work at the University of Berlin and Harvard, where he was the first African American to earn a doctorate, he became a professor of history, sociology and economics at Atlanta University. Du Bois was one of the co-founders of the National Association for the Advancement of Colored People in 1909.

This is a general reference work on all aspects of intellectual property, including international treaties and conventions, analyses of all fields of intellectual property, its administration, enforcement and teaching, technological and legal developments, and WIPO's work in its Member States. It covers issues including electronic commerce, biotechnology, traditional knowledge and management of copyright and related rights and WIPO's vision and approaches to meet new challenges with a widening circle of partners. Two expert writers, Sujata Burman and Rosa Bertoli, have joined forces with architectural photographer Taran Wilkhu to create an unashamedly confident guide to the must-see buildings in London, spanning all the architectural styles: from Art Deco to postmodern, brutalist to futuristic. Over 50 buildings are included alongside four maps with guided city walks.

Aquaponics is the integration of aquaculture and soilless culture in a closed production system. This manual details aquaponics for small-scale production--predominantly for home use. It is divided into nine chapters and seven annexes, with each chapter dedicated to an individual module of aquaponics. The target audience for this manual is agriculture extension agents, regional fisheries officers, non-governmental organizations, community organizers, government ministers, companies and singles worldwide. The intention is to bring a general understanding of aquaponics to people who previously may have only known about one aspect.

Edible insects have always been a part of human diets, but in some societies there remains a degree of disdain and disgust for their consumption. Insects offer a significant opportunity to merge traditional knowledge and modern science to improve human food security worldwide. This publication describes the contribution of insects to food security and examines future prospects for raising insects at a commercial scale to improve food and feed production, diversify diets, and support livelihoods in both developing and developed countries. Edible insects are a promising alternative to the conventional production of meat, either for direct human consumption or for indirect use as feedstock. This publication will boost awareness of the many valuable roles that insects play in sustaining nature and human life, and it will stimulate debate on the expansion of the use of insects as food and feed.

I have been in this business for over 8 years with great experiences in the Mini Importation Business (China, USA, UK, Turkey, Vietnam, Malaysia to Africa Countries, and Drop Shipping to UK, USA, etc) and have successfully imported thousands of products from China to my destination country with ease and at very cheap costs. Especially from 1688.com.1688.com is the biggest and most popular Chinese wholesale platform where retailers in China buy products directly from the manufacturers and resell at a higher price on other platforms such as Alibaba, Aliexpress, Gearbest, etc. So if you thought you always get the best price for items purchased on Alibaba or Aliexpress, you are wrong because these platforms sell products at prices up to 4X or more compared to the price of the same item if purchased directly from 1688.com. But the problem is that 1688.com website is written in Chinese language and meant for the Chinese based retailers. So most people rely on using Google translate and Chinese-based suppliers to order products from the platform. With this step-by-step guide, you will learn how to purchase products directly from sellers on 1688.com who are usually the manufacturers of the products and ship it directly to your location without hassle and cheaply. It Covers The Following: 1. Sourcing for products from 1688 at very cheap price 2. Steps to buy products directly from manufacturers on 1688 without the use of suppliers 3. Contacting the product manufacturer/supplier 4. Paying for your items 5. shipping your goods 6. Resources

Get the complete guide now and learn the secrets of importing products easily from 1688.com by yourself which most people don't know about. The purpose of the Guide is to support national plant protection organizations (NPPOs) who wish to establish and maintain pest free areas (PFA) including places and/or production sites (PFPP and PFPS) as well as areas of low pest prevalence (ALPP). To facilitate an understanding of the processes to establish and maintain PFAs and ALPPs, a diagram in the form of a decision tree was constructed that identifies and outlines five general phases of programme development as follows: initiation, feasibility, establishment, maintenance, and market access phases. The guide is then divided into corresponding sections that describe what the key elements of each phase are, why these elements are important, what some of the common challenges and pitfalls are, and factors that may influence the success of the different phases such as budget stability, public outreach, availability of good survey and control tools, and open engagement with stakeholders and trading partners. By providing a deeper understanding of the factors that should be considered when establishing a PFA, PFPP, PFPS or ALPP the guide aims to overcome the challenges and maximize the impact of these efforts to the benefit of all parties. The guide concludes by providing a number of case studies from around the world that highlight successful PFA and ALPP programmes and how they deal with particular key issues. This guide contains current experience and the most advanced phytosanitary procedures in the implementation of PFA and ALPP, however, it is subjected to revision and updates as new developments are made available.

This report is structured in five parts: national framework for traditional and complementary medicine (T&CM); product regulation; practices and practitioners; the challenges faced by countries; and, finally, the country profiles. Apart from the section on practices and practitioners, the report is consistent with the format of the report of the first global survey in order to provide a useful comparison. The section on practices and practitioners, which covers providers, education and health insurance, is a new section incorporated to reflect the emerging trends in T&CM and to gather new information regarding these topics at a national level. All new information received has been incorporated into individual country profiles and data graphs. The report captures the three phases of progress made by Member States; that is, before and after the first WHO Traditional Medicine Strategy (1999-2005), from the first global survey to the second global survey (2005-2012) and from the second survey to the most recent timeline (2012-2018).

Gone is the time when a day out with kids meant bland food and weird, squashy play pens. The capital now boasts a multitude of stylish spots that have little Londoners fully in mind - you just need to know where to find them. Luckily, we do. From the most innovative outdoor playgrounds to the best place for a proper coffee while they slurp a babyccino, this handy little guide is full of shops, places, activities and cafes that we love visiting just as much as our under-five companions.

A companion document to the fifth edition of the Balance of Payments Manual, the Balance of Payments Compilation Guide shows how the conceptual framework described in the Manual may be implemented in practice. The primary purpose of the Guide is to provide practical guidance for using sources and methods to compile statistics on the balance of payments and the international investment position. The Guide is designed to assist balance of payments compilers and statisticians in understanding the relative strengths and weaknesses of various approaches. The material reflects the emergence of new data sources and adaptations in the application of statistical methodologies to changing circumstances. Discussed in the Guide are all of the tasks that a BOP compiler normally performs. Appendices contain a set of model BOP questionnaires and a set of model BOP publication tables. Relationships between the balance of payments statistics and relevant aspects of national accounts are covered as well.

This publication is the world's most extensive, hands-on and neutral source of information on international trade of coffee. It covers trade issues relevant to coffee growers, traders, exporters, transportation companies, certifiers, associations, authorities and others in coffee-producing countries. This third edition marks the 20th anniversary of this popular guide. It includes new material on climate change, the role of women in the coffee sector and comparison of sustainability schemes.

This guide has been prepared by the IUCN Environmental Law Programme and the Foundation for International Environmental Law and Development (FIELD), in cooperation with the World Resources Institute (WRI). The main goal of the guide is to facilitate the understanding of the obligations of Parties to the Protocol, by providing an information base on the content and origin of the Protocol provisions, accessible to the non-specialist and useful for those who will be involved in the development and implementation of national safety frameworks.

This publication is intended to contribute to prevention and control of the morbidity and mortality associated with dengue and to serve as an authoritative reference source for health workers and researchers. These guidelines are not intended to replace national guidelines but to assist in the development of national or regional guidelines. They are expected to remain valid for five years (until 2014), although developments in research could change their validity.--Publisher's description

This edition of Importing Into the United States contains material pursuant to the Trade Act of 2002 and the Customs Modernization Act, commonly referred to as the Mod Act. Importing Into the United States provides wide-ranging information about the importing process and import requirements. We have made every effort to include essential requirements, but it is not possible for a book this size to cover all import laws and regulations. Also, this publication does not supersede or modify any provision of those laws and regulations. Legislative and administrative changes are always under consideration and can occur at any time. Quota limitations on commodities are also subject to change. Therefore, reliance solely on the information in this book may not meet the "reasonable care" standard required of importers.

They began their existence as everyday objects, but in the hands of award-winning historian Laurel Thatcher Ulrich, fourteen domestic items from preindustrial America--ranging from a linen tablecloth to an unfinished sock--relinquish their stories and offer profound insights into our history. In an age when even meals are rarely made from scratch, homespun easily acquires the glow of nostalgia. The objects Ulrich investigates unravel those simplified illusions, revealing important clues to the culture and people who made them. Ulrich uses an Indian basket to explore the uneasy coexistence of native and colonial Americans. A piece of silk embroidery reveals racial and class distinctions, and two old spinning wheels illuminate the connections between colonial cloth-making and war. Pulling these divergent threads together, Ulrich demonstrates how early Americans made, used, sold, and saved textiles in order to assert their identities, shape relationships, and create history.
