From the internationally bestselling creator of *Wreck This Journal*, a book that celebrates mistake- and mess-making like never before... Your whole life, you've been taught to avoid making a mess: try to keep everything under control, color inside the lines, make it perfect, and at all costs, avoid contact with things that stain. This book asks you to do the opposite of what you have been taught. Think of it as your own personal rumpus room. A place to let loose, to trash, to spew, to do the things you are not allowed to do in the "real world." There are only three rules you will find in this book: 1. Do not try to make something beautiful. 2. Do not think too much. (There is no "wrong.") 3. Continue under all circumstances. It's time to make a mess.

Estelle R. Jorgensen's latest work is an exploratory look into the ways we practice and represent music education through the metaphors and models that appear in everyday life. These metaphors and models serve as entry points into a deeper understanding of music education that moves beyond literal ways of thinking and doing and allows for a more creative embodiment of musical thought. Seeing the reader as a partner in the creation of meaning, Jorgensen intends for this book to be experienced by, rather than dictated to, the reader. Jorgensen's hope is that the intersections of art and philosophy, and metaphor and model can provide a richer and more imaginative view of music education.

A New York Review Books Original Hav is like no place on earth. Rumored to be the site of Troy, captured during the crusades and recaptured by Saladin, visited by Tolstoy, Hitler, Grace Kelly, and Princess Diana, this Mediterranean city-state is home to several architectural marvels and an annual rooftop race that is a feat of athleticism and insanity. As Jan Morris guides us through the corridors and quarters of Hav, we hear the mingling of Italian, Russian, and Arabic in its markets, delight in its famous snow raspberries, and meet the denizens of its casinos and cafés. When Morris published *Last Letters from Hav* in 1985, it was short-listed for the Booker Prize. Here it is joined by *Hav of the Myrmidons*, a sequel that brings the story up-to-date. Twenty-first-century Hav is nearly unrecognizable. Sanitized and monetized, it is ruled by a group of fanatics who have rewritten its history to reflect their own blinkered view of the past. Morris's only novel is dazzlingly sui-generis, part erudite travel memoir, part speculative fiction, part cautionary political tale. It transports the reader to an extraordinary place that never was, but could well be.

The unique social history of the early modern period in England marked a crucial moment in the cultural conception and representation of masculinity. This volume explores the various strategies used by 17th- and 18th-century writers to portray the masculine identity. Included are chapters on such authors as Thomas Carew, Andrew Marvell, Francis Beaumont and John Fletcher, John Dryden, Daniel Defoe, and Samuel Richardson. Together, the expert contributors offer a broad perspective on the social and political dynamics of early modern masculinity. Though incorporating a variety of critical approaches, the contributors all examine the inherent anxiety and problems associated with masculinity and its representation. The chapters demonstrate how significant literary texts of the period worked to provide not only idealized images of the masculine but also contesting ones. Thus the volume shows that the literary representation of masculinity in the early modern period was a dynamic and evolving process.

1903. Thomas Nelson Page, author of short stories, novels, essays, and poetry, is best known for his role as literary spokesman for the glories of the Old South. Gordon Keith begins: Gordon Keith was the son of a gentleman. And this fact, like the cat the honest miller left to his youngest son, was his only patrimony. As in that case also, it stood to the possessor in the place of a good many other things. It helped him over many rough places. He carried it with him as a devoted Romanist wears a sacred scapular next to the heart. See other titles by this author available from Kessinger Publishing.

Too often monetary economics has been taught as a collection of facts about institutions for students to memorize. By teaching from first principles instead, this advanced undergraduate textbook builds on a simple, clear monetary model and applies this framework consistently to a wide variety of monetary questions. Starting with the case in which trade is mutually beneficial, the book demonstrates that money makes people better off, and that government money competes against other means of payments, including other types of government money. After developing each of these topics, the book tackles the issue of money competing against other stores of value, examining issues associated with trade, finance, and modern banking. The book then moves from simple economies to modern economies, addressing the role banks play in making more trades possible, concluding with the information problems plaguing modern banking, which result in financial crises.

What about plants? Don't animals eat other animals? There are no perfect vegans, so why bother? If you're vegan, how many times have you been asked these, and other similarly challenging, questions from non-vegans? Using humor and reason, Sherry F. Colb takes these questions at face value and also delves deeply into the motivations behind them, coming up with answers that are not only intelligent but insightful about human nature. Through examples, case studies, and clear-eyed logic, she provides arguments for everything from why veganism is compatible with the world's major religions to why vegetarianism is not enough. In the end, she shows how it is possible for vegans and non-vegans to engage in a mutually beneficial conversation without descending into counterproductive name-calling, and to work together to create a more hospitable world for human animals and non-human animals alike. "A rare fusion of passion and logic, idealism and pragmatism, style and substance, and--in its measured confrontation of the most challenging questions vegans face--a revolutionary guide for advocates seeking to engage the ethics of eating animals through authentic dialogue rather than bombastic rhetoric. Colb's literary touch is something to behold. She writes in a way that will appeal to non-vegans and vegans alike, building bridges across an all too turbulent divide. This is food writing at its best and food writing as it should be: honest, inclusive, inspirational, and, more than you might imagine, timely."--James McWilliams, Professor of History, Texas State University, San Marcos, and author of Just Food and The Politics of the Pasture "With compassion, humor, and eloquence, Sherry Colb provides a clear and engaging account of what motivates vegans to eat and live the way we do. A must-read for anyone who has ever wondered (or been asked) 'Why do vegans think it is okay to kill plants but not animals?' or 'Why avoid dairy and eggs?'"--Rory Freedman, New York Times bestselling co-author of Skinny Bitch and author of Beg "Sherry Colb provides thoughtful, articulate, intelligent answers to the commonly asked questions faced by every vegan. Intertwining information, reason, and her own personal experience, Colb offers an invaluable aid both for those answering the questions and for those posing them.

The perfect companion "--Colleen Patrick-Goudreau, bestselling author and creator of The 30-Day Vegan Challenge "A powerful, compelling, and thoroughly engaging defense of veganism from an absolutely terrific legal scholar."--Gary L. Francione, Board of Governors Professor of Law and Katzenbach Distinguished Scholar of Law and Philosophy, Rutgers University, author of Introduction to Animal Rights: Your Child or the Dog? "With crystal clear logic and an empathic voice, Sherry Colb has written a must-read source for anyone curious, skeptical, or downright antagonistic towards vegan living. This book is destined to be a classic of the emerging vegan oeuvre."--Jonathan Balcombe, Ph.D., author of The Exultant Ark "Full of thoughtful analyses of some of the most common, perplexing, and often challenging reactions to vegans and veganism. Any vegan or vegetarian who has wished they'd had a more informed response to a question or challenge about their ideology--and anyone who wants to better understand some of the fundamental concepts of veganism--will benefit from reading Sherry Colb's in-depth exploration of the issues."--Melanie Joy, Ph.D., author of Why We Love Dogs, Eat Pigs, and Wear Cows
