In today's world, it is more acceptable to be depressed than to be lonely-yet loneliness appears to be the inevitable byproduct of our frenetic contemporary lifestyle. According to the 2004 General Social Survey, one out of four Americans talked to no one about something of importance to them during the last six months. Another remarkable fact emerged from the 2000 U.S. Census: more people are living alone today than at any point in the country's history—fully 25 percent of households consist of one person only. In this crucial look at one of America's few remaining taboo subjects—loneliness—Drs. Jacqueline Olds and Richard S. Schwartz set out to understand the cultural imperatives, psychological dynamics, and physical mechanisms underlying social isolation. In *The Lonely American*, cutting-edge research on the physiological and cognitive effects of social exclusion and emerging work in the neurobiology of attachment uncover startling, sobering ripple effects of loneliness in areas as varied as physical health, children's emotional problems, substance abuse, and even global warming. Surprising new studies tell a grim truth about social isolation: being disconnected diminishes happiness, health, and longevity; increases aggression; and correlates with increasing rates of violent crime. Loneliness doesn't apply simply to single people, either—today's busy parents "cocoon" themselves by devoting most of their non-work hours to children, leaving little time for friends, and other forms of social contact, and unhealthily relying on the marriage to fulfill all social needs. As a core population of socially isolated individuals and families continues to balloon in size, it is more important than ever to understand the effects of a culture that idealizes busyness and self-reliance. It's time to bring loneliness—a very real and little-discussed social epidemic with frightening consequences—out into the open, and find a way to navigate the tension between freedom and connection in our lives.

As new media mature, the changes they bring to writing in college are many and suggest implications not only for the tools of writing, but also for the contexts, personae, and conventions of writing. An especially visible change has been the increase of visual elements—from typographic flexibility to the easy use and manipulation of color and images. Another would be in the scenes of writing—web sites, presentation "slides," email, online conferencing and coursework, even help files, all reflect non-traditional venues that new media have brought to writing. By one logic, we must reconsider traditional views even of what counts as writing; a database, for example, could be a new form of written work. The authors of *Writing New Media* bring these ideas and the changes they imply for writing instruction to the audience of rhetoric/composition scholars. Their aim is to expand the college writing teacher's understanding of new media and to help teachers prepare students to write effectively with new media beyond the classroom. Each chapter in the volume includes a lengthy discussion of rhetorical and technological background, and then follows with classroom-tested assignments from the authors' own teaching.

Review by Cliff Barackman producer of Finding Bigfoot. "Finally, a concise and well-written field guide has been published to help the Bigfoot field investigator document various types of evidence in an appropriate way. Dr. Jeff Meldrum has put together a field guide on heavy-duty, waterproof card stock that literally fits in your back pocket or backpack, adding little weight to those ounce-sensitive backpackers with an interest in collecting data from the backcountry. Seemingly thinking of everything, Dr. Meldrum has even included a ruler along the top margin of the Guide so the researcher will always have a scale item for any photos taken in the woods. The Sasquatch Field Guide not only helps researchers with identifying possible spoor left by bigfoots, but it also helps him or her reduce the possibility of misidentifying signs of other

animals for those of sasquatches. Also included in the Field Guide are easy-to-understand directions on how to gather and store data in the field in preparation for future analysis. The Guide uses colors and diagrams making it easy to read and understand which could be the difference between successfully gathering data and blowing it when under the pressure of dealing with the real thing out in the field. Sections in the Sasquatch Field Guide include information on visual identification, footprint identification, track casting, gathering footprint metrics, hair samples, scat samples, tree breaks, nests, cultural signs, stacked rocks, habitat and distribution, diet, vocalizations, possible origins, and taphonomy. This hefty brochure-style guide is densely-packed with valuable information that all field researchers should be intimately acquainted with."

In the summer of 1998 two of baseball leading sluggers, Mark McGwire and Sammy Sosa, embarked on a race to break Babe Ruth's single season home run record. The nation was transfixed as Sosa went on to hit 66 home runs, and McGwire 70. Three years later, San Francisco Giants All-Star Barry Bonds surpassed McGwire by 3 home runs in the midst of what was perhaps the greatest offensive display in baseball history. Over the next three seasons, as Bonds regularly launched mammoth shots into the San Francisco Bay, baseball players across the country were hitting home runs at unprecedented rates. For years there had been rumors that perhaps some of these players owed their success to steroids. But crowd pleasing homers were big business, and sportswriters, fans, and officials alike simply turned a blind eye. Then, in December of 2004, after more than a year of investigation, San Francisco Chronicle reporters Mark Fainaru-Wada and Lance Williams broke the story that in a federal investigation of a nutritional supplement company called BALCO, Yankees slugger Jason Giambi had admitted taking steroids. Barry Bonds was also implicated. Immediately the issue of steroids became front page news. The revelations led to Congressional hearings on baseball's drug problems and continued to drive the effort to purge the U.S. Olympic movement of drug cheats. Now Fainaru-Wada and Williams expose for the first time the secrets of the BALCO investigation that has turned the sports world upside down. *Game of Shadows: Barry Bonds, BALCO, and the Steroid Scandal That Rocked Professional* by award-winning investigative journalists Mark Fainaru-Wada and Lance Williams, is a riveting narrative about the biggest doping scandal in the history of sports, and how baseball's home run king, Barry Bonds of the San Francisco Giants, came to use steroids. Drawing on more than two years of reporting, including interviews with hundreds of people, and exclusive access to secret grand jury testimony, confidential documents, audio recordings, and more, the authors provide, for the first time, a definitive account of the shocking steroids scandal that made headlines across the country. The book traces the career of Victor Conte, founder of the BALCO laboratory, an egomaniacal former rock musician and self-proclaimed nutritionist, who set out to corrupt sports by providing athletes with "designer" steroids that would be undetectable on "state-of-the-art" doping tests. Conte gave the undetectable drugs to 28 of the world's greatest athletes—Olympians, NFL players and baseball stars, Bonds chief among them. A separate narrative thread details the steroids use of Bonds, an immensely talented, moody player who turned to performance-enhancing drugs after Mark McGwire of the St. Louis Cardinals set a new home run record in 1998. Through his personal trainer, Bonds gained access to BALCO drugs. All of the great athletes who visited BALCO benefited tremendously—Bonds broke McGwire's record—but many had their careers disrupted after federal investigators raided BALCO and indicted Conte. The authors trace the course of the probe, and the baffling decision of federal prosecutors to protect the elite athletes who were involved. Highlights of *Game of Shadows* include: Barry Bonds A look at how Bonds was driven to use performance-enhancing drugs in part by jealousy over Mark McGwire's record-breaking 1998 season. It was shortly thereafter that Bonds—who had never used anything more performance enhancing than a protein shake from the health food store—first began using steroids. How Bonds's weight trainer, steroid dealer Greg Anderson, arranged to meet Victor

Conte before the 2001 baseball season with...

From the Preface: The title for this collection was the title of a course in literary criticism that I gave for many years at Bennington College. And much of the material presented here was used in that course. The title should serve well to convey the gist of these various pieces. For all of them are explicitly concerned with the attempt to define and track down the implications of the term "symbolic action," and to show how the marvels of literature and language look when considered from that point of view.

"From the co-creators and co-hosts of the Peabody- and Pulitzer-nominated podcast comes this illuminating view of prison life, as told by presently and formerly incarcerated people. The United States locks up more people per capita than any other nation in the world--600,000 each year and 2.3 million in total. The acclaimed podcast Ear Hustle, named after the prison term for eavesdropping, gives voice to that ever-growing prison population. Co-created for the Radiotopia podcast network from PRX by visual artist Nigel Poor and inmate Earlonne Woods, who was serving thirty-one years to life before his sentence was commuted in 2018, Ear Hustle was launched in the basement media lab of California's San Quentin State Prison. As the first podcast created and produced entirely within prison, it has since been globally lauded for the rare access and perspective it contributes to the conversation about incarceration. Now, in their first book, Poor and Woods present unheard stories that delve deeper into the experiences of incarceration and share their personal paths to San Quentin as well as how they came to be co-creators. This unprecedented narrative, enhanced by forty original black-and-white illustrations, reveals the spectrum of humanity of those in prison and navigating post-incarceration. Bringing to the page the same insight, balance, and charismatic rapport that has distinguished their podcast, Poor and Woods illuminate the full--and often surprising--realities of prison life. With characteristic candor and humor, their portrayals include unexpected moments of self-discovery, unlikely alliances, and many ingenious work-arounds. One personal narrative at a time, framed by Poor's and Wood's distinct perspectives, This Is Ear Hustle tells the real lived experience of the criminal justice system"--

The experience of colonization and the challenges of a post-colonial world have produced an explosion of new writing in English. This diverse and powerful body of literature has established a specific practice of post-colonial writing in cultures as various as India, Australia, the West Indies and Canada, and has challenged both the traditional canon and dominant ideas of literature and culture. *The Empire Writes Back* was the first major theoretical account of a wide range of post-colonial texts and their relation to the larger issues of post-colonial culture, and remains one of the most significant works published in this field. The authors, three leading figures in post-colonial studies, open up debates about the interrelationships of post-colonial literatures, investigate the powerful forces acting on language in the post-colonial text, and show how these texts constitute a radical critique of Eurocentric notions of literature and language. This book is brilliant not only for its incisive analysis, but for its accessibility for readers new to the field. Now with an additional chapter and an updated bibliography, *The Empire Writes Back* is essential for contemporary post-

colonial studies.

Engaging debates over the nature of subjectivity in early modern England, this fascinating and original study examines sixteenth- and seventeenth-century conceptions of memory and forgetting, and their importance to the drama and culture of the time. Garrett A. Sullivan, Jr discusses memory and forgetting as categories in terms of which a variety of behaviours - from seeking salvation to pursuing vengeance to succumbing to desire - are conceptualized. Drawing upon a range of literary and non-literary discourses,

represented by treatises on the passions, sermons, anti-theatrical tracts, epic poems and more, Shakespeare, Marlowe and Webster stage 'self-recollection' and, more commonly, 'self-forgetting', the latter providing a powerful model for dramatic subjectivity. Focusing on works such as Macbeth, Hamlet, Dr Faustus and The Duchess of Malfi, Sullivan reveals memory and forgetting to be dynamic cultural forces central to early modern understandings of embodiment, selfhood and social practice. 'Things Fall Apart' tells the story of Okonkwo, an important man in the Igbo tribe in the days when white men were first on the scene. Okonkwo becomes exiled from his tribe, as a result of his pride and his fears, with tragic consequences.
