An introduction to marketing concepts, strategies and practices with a balance of depth of coverage and ease of learning. Principles of Marketing keeps pace with a rapidly changing field, focussing on the ways brands create and capture consumer value. Practical content and linkage are at the heart of this edition. Real local and international examples bring ideas to life and new feature 'linking the concepts' helps students test and consolidate understanding as they go. The latest edition enhances understanding with a unique learning design including revised, integrative concept maps at the start of each chapter, end-of-chapter features summarising ideas and themes, a mix of mini and major case studies to illuminate concepts, and critical thinking exercises for applying skills.

At the time this book is being written, economists and the media are predicting the next development in Bitcoin's meteoric rise, and waiting with bated breath for its fall. Some say investing in Bitcoin is better than investing in the stock market, while others say that Bitcoin is worth about as much as Monopoly money—that is, less than nothing. The truth is that the cryptocurrency market is a market that is still young. This book will not give you conclusive advice or predictions—nobody can see the future. What it will do is explain cryptocurrency concepts in a way that's easy to understand, and tell you how to earn money in a low-risk way.

Peyton Stratford is her family's unofficial keeper of all things secret, from the petty and mundane to the potentially life-changing. But Peyton is keeping a secret of her own. And it's a doozy. Pastor Brice Northam is used to hearing secrets. After all, it's part of his job description. But he's about to hear one that's going to challenge him almost as much as his feelings for the person confessing. Peyton needs some serious help from Brice, but how much does she dare tell him? And what, exactly, is Brice hiding from Peyton—and himself? Clearly they both have some serious soul-searching to do. But maybe, just maybe, the answer to secrets isn't silence. Or more secrets. Maybe it's love. * *

* Note: While the Secret Keeper series does feature some characters who are Christian (the hero is a pastor, so that's a dead giveaway), it is not a Christian romance in the traditional sense, and some characters find themselves in adult situations and using strong language. Not that the pastor approves! But he's fallen in love with a complex, modern woman whose life is anything but predictable. If you think you could too, then dive in. Bring your sense of humor and your compassion, and then hold on for the emotional ride of your life!

Easy Keyboard and Piano Pieces is the perfect companion for those starting out to learn the keyboard or piano. The book uses simple, popular and familiar tunes which helps the player feel more comfortable as they learn the easy-to-play pieces. All notes have their letters printed above them in a large easy-to-read font, to help those who are yet to learn how to read music. Also included are some blank music sheets, so you can have fun creating your own compositions.

The Integrated Manufacturing System (IMS), Group Technology, Numerical Control, and Computer Aided Design (CAD) were four outstanding innovations that were one-time milestones of scientific industrial management. This book describes the expectations and disappointments of the common pitfalls of these ingenious ideas, which leads to understanding of their gradual disappearing, and proposes a way to restore these methods for long term utility and value. The first three innovations dominated the industry till the mid-1970s. Surprisingly, the reason for them being replaced is the same: research of the "routine" was misleading regardless of its ingenuity. In the fourth case, CAD does not support CAPP (Computer Aided Process Planning) and thus Numerical Control could no longer support developments of a system such as a flexible and automated factory. However, they incorporate many features in a specific resource instead within a manufacturing system. CAD technology and machining centers remain remarkable as a specific (unique) manufacturing resource. This work proposes ways to revive these innovations for the future. Innovation is a driver for the development of new products and production methods. It should be an integral part of a system and not pursued for its own sake. This volume shows, explains, and remedies this by treating these interesting examples.

"Wait. No. Hold on, what is this? Why is CHIP writing my book? Sorry, I know this is unprofessional to do in public, but no one at Image is answering my emails. Someone please call me!! WHAT IS HAPPENING?!"

Goose has gone on holiday and Duck is looking after her pond. But Duck is a bit too enthusiastic... "No splashing! No fishing! No racing!" he quacks. Soon Duck becomes very bossy and puts up signs everywhere! Diving is forbidden! (Because Duck says so) No swimming! (By order of Duck in charge of the pond!) But all his friends start leaving... will bossy Duck learn his lesson before it's too late? A fun-filled tale about what happens when someone gets a little too self-important!

The pictures in television commercials, magazine advertisements and other forms of advertising often convey meanings that cannot be expressed as well, or at all, through words or music. Visual Persuasion is an exploration of the uniquely visual aspects of advertising. Because of the implicit nature of visual argumentation and the relative lack of social accountability which images enjoy in comparison with words, pictures can be

used to make advertising claims that would be unacceptable if spelled out verbally. Taking this as a starting point, Paul Messaris analyzes a variety of commercial, political and social issue advertisements. He also discusses the role of images in cross-cultural advertising.

This book is created by kids between the ages of 6-10 years. It's very fun to read. There are many exciting parts in the book, like adventures to space, interesting jobs and more! When you read this book, you will feel like you are in the book! This book is written by the Circle kids from the Ugail Foundation which deliver a creative STEM (science, technology, engineering and mathematics) curriculum, enriching kids across the country with the knowledge of coding, robotics, the English language, communication and problem solving. This book is mostly focused on our ideas about the year 2040. Enjoy! (Description by Ali Shayaan Sadiq, aged 8).

For the past three decades, we have been steadily creating an extreme time-crunch economy that has affected jobs, portfolios, businesses and lives. But the time-crunch economy is turning into the leisure economy and it will mean wrenching adjustments for our lives and institutions. Everyone from consumers, investors, businesses, and policy-makers will need to understand the changes afoot. This book posits profound economic changes in North America due to both the retirement of the baby boomers and the attitudes of ascendant generations X and Y. Looking at trends in demographics, economics and generational change, this book looks at how to stay ahead of the leisure economy and predicts who will be the winners and losers in the seismic shift ahead.

Toyota's world-renowned success proves that just-in-time (JIT) makes other manufacturing practices obsolete. This simple but powerful book is based on the seminars given by Taiichi Ohno and other senior production staff to introduce Toyota's own supplier companies to JIT. It teaches the philosophy and implementation of what many call the most efficient production system in the world. Provides a clear structure for an introductory JIT training program. Explains every aspect of the JIT system, including how to set it up and how to refine it once it's in place. Shows how to use a simple visual system to control the production process. Every day more American companies are learning that JIT works outside Japan. Now you can get started with this step-by-step book which guides you through the implementation process. Every engineer, manager, supervisor, and worker should read this book to get the clearest, simplest, and most complete introduction to JIT available in English. Results at American companies after reading this book: Lead-time on one product was reduced from 12 weeks to 4 days. Setup time on a large blanking press was reduced from eight hours to one minute and four seconds. Work-in-process has been reduced 50 percent plant-wide. Factory floor space was opened up 30 to 40 percent in every one of their plants.

Seminar paper from the year 2007 in the subject Politics - International Politics - Topic: Development Politics, grade: keine, graduate institute, Masterstudies (Institut Universitaire d'études du développement (Genf)), course: Coopération internationale au développement, 18 entries in the bibliography, language: English, abstract: The speech of former president of the United States, Harry S Truman in 1949, for the foundation of the NATO, has often also been seen as the beginning of the whole development aid engagement. In his clear words, "In addition, we will provide military advice and equipment to free nations which will cooperate with us in the maintenance of peace and security. Fourth, we must embark on a bold new program for making the benefits of our scientific advances and industrial progress available for the improvement and growth of underdeveloped areas." Although die international system changed dramatically, old enemies vanished, whereas new ones arose, the issue of security is still, and since September 9/11 will be an even more essential topic within the discussion of development. It is to emanate that this close linkage between development and security has always had an impact on the behavior of the donor community, and is now once again in the focus of a debate concerning new approaches such as the security sector reform (SSR) and a broadening of the ODA definition due to the rising demand of peace and security in the development business.

World maritime trade lost momentum in 2018, with volumes expanding at 2.7 per cent, below the historical averages of 3.0 per cent and 4.1 per cent recorded in 2017. Total volumes are estimated to have reached 11 billion tons, an all-time high, according to UNCTAD records. UNCTAD is projecting 2.6 per cent growth in 2019 and an annual

average growth rate of 3.4 per cent for the period 2019-2024. However, the outlook remains challenging, given the heightened uncertainty regarding trade policy and wide-ranging downside risks clouding the horizon. In 2018, world merchandise trade growth decelerated at an unexpected rate, and tariffs on trade between China and the United States of America escalated amid mounting trade tensions and a proliferation of national trade-restrictive measures. Apart from trade policy crosscurrents, geopolitics and sanctions, environmental concerns, fuel economics and tensions involving the Strait of Hormuz - a strategic maritime chokepoint - were in the headlines. Other forces at work continued to slowly reshape the maritime transport landscape. A new normal, contrasting with the historical perspective, appears to be taking hold. This trend is characterized by overall moderate growth in the global economy and trade, a supply chain restructuring in favour of more regionalized trade flows, a continued rebalancing of the Chinese economy, a larger role of technology and services in value chains and logistics, intensified and more frequent natural disasters and climate-related disruptions, and an accelerated environmental sustainability agenda with an increased awareness of the impact of global warming. A transition to the new normal calls for an improved understanding of the main issues at stake, better planning, and flexible and forward-looking-policies that can effectively anticipate change and enable appropriate response measures that take into account the heterogenous nature of developing countries as a group and their varied local conditions and needs..

Describes the American revolution and gives brief biographical sketches of important leaders of the time.

The book presents a mixed research method adopted to assess and present the Toyota Way practices within construction firms in general and for firms in China specifically. The results of an extensive structured questionnaire survey based on the Toyota Way-styled attributes identified were developed and data collected from building professionals working in construction firms is presented. The quantitative data presented in the book explains the status quo of the Toyota Way-styled practices implemented in the construction industry, as well as the extent to which these attributes were perceived for lean construction management. The book highlights all the actionable attributes derived from the Toyota Way model appreciated by the building professionals, but alerts the readers that some attributes felled short of implementation. Further findings from in-depth interviews and case studies are also presented in the book to provide to readers an understanding how these Toyota Way practices can be implemented in real-life projects. Collectively, all the empirical findings presented in this book can serve to enhance understanding of Toyota Way practices in the lean construction management context. The readers are then guided through to understand the gaps between actual practice and Toyota Way-styled practices, and the measures that they may undertake to circumvent the challenges for implementation. The book also presents to readers the SWOT analysis that addresses the strengths, weaknesses, opportunities and threats towards the implementation of the Toyota Way in the construction industry. The book prescribes the Toyota Way model for use in construction firms to strategically implement lean construction management. The checklist presented in the book enables readers to draw lessons that may be used additionally as a holistic assessment tool for measuring the maturity of firms with respect to their Toyota Way implementation. Consequent to this, management would

then be in a better position to develop plans for Toyota Way implementation by focusing on weak areas, strengthening them, and thus increasing the likelihood of success in the implementation of the Toyota Way. In a nutshell, this book provides a comprehensive and valuable resource for firms not only in the construction industry but also businesses outside of the construction sector to better understand the Toyota Way and how this understanding can translate to implementation of lean construction/business management to enhance profitability and survivability in an increasingly competitive global market place.

The most stimulating installment yet in the acclaimed Looking Closer series! This enthralling collection of essays assembles some of the most intriguing critical commentary published in professional and general interest design magazines from 1997 to 2000. Over thirty contributors, including Rick Poynor, Kathy McCoy, Lorraine Wild, Veronique Vienne, Jessica Helfand, and others discuss such important contemporary themes as the rise and fall of the dot.coms and its influence on salary expectations, the ongoing controversy over the First Things First Manifesto, the call for greater responsibility in the design profession, and the antibranding protests that ignited demonstrations during recent World Trade Organization meetings. From current events to design principles, and aesthetics to ethics, graphic designers everywhere will savor this anthology of fresh perspective. Allworth Press, an imprint of Skyhorse Publishing, publishes a broad range of books on the visual and performing arts, with emphasis on the business of art. Our titles cover subjects such as graphic design, theater, branding, fine art, photography, interior design, writing, acting, film, how to start careers, business and legal forms, business practices, and more. While we don't aspire to publish a New York Times bestseller or a national bestseller, we are deeply committed to quality books that help creative professionals succeed and thrive. We often publish in areas overlooked by other publishers and welcome the author whose expertise can help our audience of readers.

The first book in The Long Road Home trilogy, a unique and gripping Amish romance set in the South at the turn of the century. It was the early 1900s when Obadiah (Oba) and Merriweather's (May's) parents died tragically, leaving them orphans at ten and eleven years old. When none of their nearby relations volunteer to take them in, they are set on a train to

Arkansas to go live on their Amish aunt and uncle's cotton farm. Once there, it didn't take long to discover they would be treated cruelly, no matter what they did. May, always anxious to be a godly young lady, took on more and more responsibility, trying desperately to keep the peace and convince her older brother not to run away. But when they became teenagers and Oba received one especially cruel beating, he disappeared, leaving May to shoulder even more responsibility while navigating the dangerous and lonely world she'd been placed in. When she encounters Clinton, a young black man, on the road one day, she sees a kindness in his eyes that she's been thirsting for. He is immediately drawn to her, too, but quickly reminds her that he is black and she is white. In that time and place, there is no chance of starting a friendship. But still, they find themselves meeting discretely, spending more time together than is proper, finding joy and solace in each other's company. When things go from bad to unbearable at the farm, May realizes she must escape from her aunt and uncle. If only she knew where Oba had gone! Can she turn to Clinton for help? Where is God when she needs Him most?

A true tale of the shame of a nation's founding when mostly inept personnel were chosen to accompany petty-crime-convicts to an un-inspected destination, to found a settlement. Tradesmen in every skill required had been overlooked; street gamin, pickpockets and loose women (near all illiterate) were depended on to make bricks, erect houses and feed a thousand others when warlike Aborigines made access to forest impossible.

The series Structure and Bonding publishes critical reviews on topics of research concerned with chemical structure and bonding. The scope of the series spans the entire Periodic Table and addresses structure and bonding issues associated with all of the elements. It also focuses attention on new and developing areas of modern structural and theoretical chemistry

such as nanostructures, molecular electronics, designed molecular solids, surfaces, metal clusters and supramolecular structures. Physical and spectroscopic techniques used to determine, examine and model structures fall within the purview of Structure and Bonding to the extent that the focus is on the scientific results obtained and not on specialist information concerning the techniques themselves. Issues associated with the development of bonding models and generalizations that illuminate the reactivity pathways and rates of chemical processes are also relevant. The individual volumes in the series are thematic. The goal of each volume is to give the reader, whether at a university or in industry, a comprehensive overview of an area where new insights are emerging that are of interest to a larger scientific audience. Thus each review within the volume critically surveys one aspect of that topic and places it within the context of the volume as a whole. The most significant developments of the last 5 to 10 years should be presented using selected examples to illustrate the principles discussed. A description of the physical basis of the experimental techniques that have been used to provide the primary data may also be appropriate, if it has not been covered in detail elsewhere. The coverage need not be exhaustive in data, but should rather be conceptual, concentrating on the new principles being developed that will allow the reader, who is not a specialist in the area covered, to understand the data presented. Discussion of possible future research directions in the area is welcomed. Review articles for the individual volumes are invited by the volume editors. Readership: research scientists at universities or in industry, graduate students

Special offer For all customers who have a standing order to the print version of Structure and Bonding, we offer free access to the electronic volumes of the Series published in the current year via SpringerLink.
