Security Awareness Training for All Seafarers International Maritime Organization, 2012 This model course is intended to provide the knowledge required to enable personnel without designated security duties in connection with a Ship Security Plan (SSP) to enhance ship security in accordance with the requirements of chapter XI-2 of SOLAS 74 as amended, the ISPS Code, and section A-VI/6-1 of the STCW Code, as amended. Those who successfully complete this course should achieve the required standard of competence enabling them to contribute to the enhancement of maritime security through heightened awareness and the ability to recognize security threats and to respond appropriately.

Maritime Work Law Fundamentals: Responsible Shipowners, Reliable Seafarers Iliana Christodoulou-Varotsi, Dmitry A. Pentsov, 2007-10-31 The importance of international maritime labour law - both as a component of - ternational maritime law, and in socio-political and economic terms - has been recognised by the IMO International Maritime Law Institute for a number of years. Indeed, the Institute has annually organised a course on maritime labour law with the participation of inter alia the International Maritime Organization, the - ternational Labour Organization, the International Transport Workers' Federation, and the German Shipowners' Association. It was therefore a great pleasure when the authors invited me to introduce their forthcoming monograph on Maritime Work Law Fundamentals: Responsible S- powners Reliable Seafarers. As the title suggests, a fundamental challenge of this branch of international maritime law is to achieve a balance between the interests of the two main stakeholders. Institutionally, the effort to achieve this balance dates back a number of decades with its genesis mainly found in the work of the International Labour Organization. It has to be said that whilst this effort achieved great progress, it has led to a haphazard, plethora of legal instruments.

Port Facility Security Officer International Maritime Organization, 2011-10-03 This model course has been based on MSC/Circ 1188, 'Guidelines on training and certification for Port Facility Security Officers', and aims to provide knowledge to those who may be designated to perform the duties and responsibilities of a Port Facility Security Officer (PFSO), as defined in section A/2.1.8 (and section A/17) of the ISPS Code, and in particular the duties and responsibilities with respect to the security of a port facility, for ensuring the development (or for developing) of a Port Facility Security Assessment, for ensuring the development (or for developing) of, implementing, maintaining and updating a Port Facility Security Plan and for liaising with Ship Security Officers (SSOs) and with Company Security Officers (CSOs).

Marine Navigation and Safety of Sea Transportation Adam Weintrit, Tomasz Neumann, 2013-06-04 The TransNav 2013 Symposium held at the Gdynia Maritime University, Poland in June 2013 has brought together a wide range of participants from all over the world. The program has offered a variety of contributions, allowing to look at many aspects of the navigational safety from various different points of view. Topics presented and discussed at the Symposium were: navigation, safety at sea, sea transportation, education of navigators and simulator-based training, sea traffic engineering, ship's manoeuvrability, integrated systems, electronic charts systems, satellite, radio-navigation and anti-collision systems and many others. This book is part of a series of four volumes and provides an overview of Education and Training, Human Resources and Crew Resource Management, Policy and Economics and is addressed to scientists and professionals involved in research and development of navigation, safety of navigation and sea transportation.

Security Training for Seafarers with Designated Security Duties International Maritime Organization, 2012 This model course is intended to provide the knowledge required for seafarers with designated security duties in connection with a Ship Security Plan (SSP) to perform their duties in accordance with the requirements of chapter XI-2 of SOLAS 74 as amended, the ISPS Code, and section A-VI/6 of the STCW Code, as amended. Those who successfully complete the course should be able to demonstrate sufficient knowledge to undertake the duties assigned under the SSP.

Euclidean Geometry in Mathematical Olympiads Evan Chen, 2021-08-23 This is a challenging problem-solving book in Euclidean geometry, assuming nothing of the reader other than a good deal of courage. Topics covered included cyclic quadrilaterals, power of a point, homothety, triangle centers; along the way the reader will meet such classical gems as the nine-point circle, the Simson line, the symmedian and the mixtilinear incircle, as well as the theorems of Euler, Ceva, Menelaus, and Pascal. Another part is dedicated to the use of complex numbers and barycentric coordinates, granting the reader both a traditional and computational viewpoint of the material. The final part consists of some more advanced topics, such as inversion in the plane, the cross ratio and projective transformations, and the theory of the complete quadrilateral. The exposition is friendly and relaxed, and accompanied by over 300 beautifully drawn figures. The emphasis of this book is

placed squarely on the problems. Each chapter contains carefully chosen worked examples, which explain not only the solutions to the problems but also describe in close detail how one would invent the solution to begin with. The text contains a selection of 300 practice problems of varying difficulty from contests around the world, with extensive hints and selected solutions. This book is especially suitable for students preparing for national or international mathematical olympiads or for teachers looking for a text for an honor class.

Proficiency in Personal Survival Techniques International Maritime Organization, 2000 This course should be taken by every prospective seafarer. It covers training in personal survival techniques and is based on the provisions of table A-VI/1-1 of the STCW Code.

Maritime Security and MET Detlef Nielsen, 2005 This volume collects the papers presented at the 2005 Annual General Assembly and Conference of the International Association of Maritime Universities (IAMU), which was held in Malmö, Sweden from 24 to 26 October 2005, and hosted by the World Maritime University. Section 1 presents interim and final reports on several research projects funded by IAMU. Section 2 presents a broad range of academic papers on the theme of maritime Security and MET. These range from the challenges faced by MET institutions worldwide in incorporating the new topic of maritime security into their syllabi, to the economic costs of the new maritime security regime to the shipping industry and to ports. Other topics are also covered, including the technical means of monitoring the movements of ships, and the social implications for seafarers on board ships. Section 3 includes papers on a variety of current MET issues, such as bridge resource management, quality management in MET, careers at sea, and ship handling and marine engineering simulators.

The IMO Compendium Dušan Djukić, Vladimir Janković, Ivan Matić, Nikola Petrović, 2011-05-05 The IMO Compendium is the ultimate collection of challenging high-school-level mathematics problems and is an invaluable resource not only for high-school students preparing for mathematics competitions, but for anyone who loves and appreciates mathematics. The International Mathematical Olympiad (IMO), nearing its 50th anniversary, has become the most popular and prestigious competition for high-school students interested in mathematics. Only six students from each participating country are given the honor of participating in this competition every year. The IMO represents not only a great opportunity to tackle interesting and challenging mathematics problems, it also offers a way for high school students to measure up with students from the rest of the world. Until the first edition of this book appearing in 2006, it has been almost impossible to obtain a complete collection of the problems proposed at the IMO in book form. The IMO Compendium is the result of a collaboration between four former IMO participants from Yugoslavia, now Serbia and Montenegro, to rescue these problems from old and

scattered manuscripts, and produce the ultimate source of IMO practice problems. This book attempts to gather all the problems and solutions appearing on the IMO through 2009. This second edition contains 143 new problems, picking up where the 1959-2004 edition has left off.

Maritime Skills on Vessels & Shore - The STCW Convention's Relevance & Recommendations Dr. (Capt.) Vivek Jain, 2023-07-11 This Book is of the seafarers, by the seafarers, for the seafarers Seafarers are the core of all maritime trade and their expectations/perspectives alone should be at the centre of all solutions for maritime skills. Taking this standpoint, the editor has explored the issues of maritime skills with critical gaps following a framework of research methodology. The issue of critical gaps in maritime skills is further exacerbated due to the impact on seafarers caused by changes in - the ecosystem, status & relationship with stakeholders, technology, focus on renewable energy, anxiety levels and so forth. Furthermore, stakeholders can no longer ignore the fact that seafarers are leaving a seagoing career after working for only a few years. Therefore, the editor has also explored the need to prepare seafarers for transition into maritime shore jobs to preserve their maritime skills within the maritime industry. This exhaustive book can be used as a guide for further revisions or a revamp of the current STCW Convention. The editor thereafter divided the researched critical gaps in maritime skills into four groups (Jain's Model for Maritime Skills) - Panoptic, Social Intelligence, Upskilling & Reskilling for onboard vessels skills, and Portable Skills for future shore jobs. Panoptic and Social Skills are core skills required for both on board vessels as well for maritime shore jobs. Thereafter, the editor embarked on a voyage to discover, persuade, collaborate with a number of exceptionally experienced subject-matter experts over many months to collaboratively pursue many mini-research projects across all selected maritime skills, adopting specific methodology to plug these critical gaps. These experts were drawn - (1) from countries such as India, the Philippines, Romania, South Korea, Malaysia, UAE, the UK and Singapore, (2) from both genders, (3) from deck, engine & professionals settled ashore, (4) with current experience in the industry and/or at sea at a fundamental level, and (5) from seafaring-supplying nations, recognising/experiencing the relevant socio-economic circumstances of seafarers. From this book, seafarers will not only find ideas on how to plug gaps in their maritime skills, but also how they can transition with their existing skills to other maritime jobs, such as marine superintendents, marine managers, designated persons ashore, managers supervising new build/second-hand vessels, IT managers in the maritime domain, marine surveyors, marine experts/investigators, marine pilots in ports, maritime arbitrators, managers in shipyards and so forth. The solutions in this book will also resolve the issue of the shortage and retention of seafarers.
