Monete romane Adriano Savio,2001

Academia and Trade Stefan Krmnicek,Hadrien Rambach,2023-03-10 This first part of a 2-volume collection comprises a collection of essays in English by leading scholars on the 19th-century Academia and Trade presenting the latest developments in international scholarship on the numismatic world in the long 19th century. In the 19th century, developments in the study and collection of coins set the cornerstone for modern numismatics. This volume comprises a collection of essays in English by international leading scholars that highlight significant figures of the 19th-century research and the state of the numismatic trade in their time. Centering around collectors and scholars of ancient, medieval, and modern numismatics, and on non-Western coinage and medals against the backdrop of the political, cultural, economic, and social changes of the era, this book presents the latest scholarship on numismatics' contribution to the cultural history of the 19th century. This volume is essential for students and scholars alike interested in 19th -century history and the history of coins.

The Art of Persuasion Jane DeRose Evans,1992 Explores the use of images in the political and social contests for power in Republican Rome

From Safin to Roman: Cultural Change and Hybridization in Central Adriatic Italy Oliva Menozzi,2024-06-06 The Central Adriatic Apennines (roughly modern Abruzzo) was occupied in antiquity by Italic populations variously termed 'Sabelli', 'Sabellics' or 'Sabellians'. The region in general has received little scholarly attention internationally compared with Tyrrhenian Italy, although the last three decades have been very rich in excavations and finds.

Augustan Culture Karl Galinsky, 1998-02-15 Weaving analysis and narrative throughout an illustrated text, the author provides an account of the major ideas of the Augustan age, and offers an interpretation of the creative tensions and contradictions that made for its vitality and influence.

Fonologia Romanza Pier Enea Guarnerio, 1918

Roman Republican Coinage Michael Hewson Crawford, 1974 The first comprehensive study in over 100 years, cataloging the issues of each coin in the period 280-31 BC and describing and dating them as accurately as the evidence permits.

Debasement Kevin Butcher, 2020-04-30 The debasement of coinage, particularly of silver, was a common feature of pre-modern monetary systems. Most coinages were issued by state authorities and the condition of a coinage is often seen (rightly or wrongly) as an indicator of the broader fiscal health of the state that produced it. While in some cases the motives behind the debasements or reductions in standards are clear, in many cases the intentions of the issuing authorities are uncertain. Various explanations have been advanced: fiscal motives (such as a desire to profit or a to cover a deficit caused by the failure to balance expenditure and revenues); monetary motives (such as changing demand for coined money or a desire to maintain monetary stability in the face of changing values of raw materials or labour costs); pressure from groups within society that would profit from debasement; misconduct at the mint; or the decline of existing monetary standards due to circulation and wear of the coinage in circulation. Certain explanations have tended to gain favour with monetary historians of specific periods, partly reflecting the compartmentalization of scholarship. Thus the study of Roman debasements emphasizes fiscal deficits, whereas medievalists are often more prepared to consider monetary factors as contributing to debasements. To some extent these different approaches are a reflection of discrepancies in the amount of documentary evidence available for the respective periods, but the divide also underlines fundamentally different approaches to the function of coinage: Romanists have preferred to see coins as a medium for state payments; whereas medievalists have often emphasized exchange as an important function of currency. The volume is inter-disciplinary in scope. Apart from bringing together monetary historians of different periods, it also contains contributions from archaeometallurgists who have experience with the chemical and physical composition of coins and technical aspects of production of base alloys

Catalogue of Late Roman Coins in the Dumbarton Oaks Collection and in the Whittemore Collection

Dumbarton Oaks, Philip Grierson, Melinda Mays, 1992 This is the first fully illustrated catalogue of a major collection of late Roman and early Byzantine imperial coins. It follows the general layout of the Byzantine volumes in the Dumbarton Oaks series, with a substantial introduction dealing with the history of the coinage, including iconography, mints, and monetary system. In this volume, however, all the coins are illustrated in the plates.

Spink & Son's Monthly Numismatic Circular, 1904

The Roman Monetary System Constantina Katsari, 2011-02-24 The Roman monetary system was highly complex. It involved official Roman coins in both silver and bronze, which some provinces produced while others imported them from mints in Rome and elsewhere, as well as, in the East, a range of civic coinages. This is a comprehensive study of the workings of the system in the Eastern provinces from the Augustan period to the third century AD, when the Roman Empire suffered a monetary and economic crisis. The Eastern provinces exemplify the full complexity of the system, but comparisons are made with evidence from the Western provinces as well as with appropriate case studies from other historical times and places. The book will be essential for all Roman historians and numismatists and of interest to a broader range of historians of economics and finance.
