Europe's Automotive Industry on the Move Oliver Heneric,Georg Licht,Wolfgang Sofka,2006-03-30 The automotive industry is a major pillar of the modern global economy and one of Europe's key industries. There can hardly be any doubt about the important role of this sector as an engine for employment, growth and innovation in Europe, and there are crucial challenges and opportunities ahead. The authors shed light on a broad range of issues - globalisation and restructuring, trade and foreign direct investment, innovation, regulation, and industry policy - and put a special focus on the new member states. While change may be inevitable, progress is not. This book shall serve as a map to all stakeholders: business executives and policy makers, investors and scholars.

The Complete Book of the World Rally Championship Henry Hope-Frost,John Davenport,2004 For 30 years some of the most talented and bravest drivers have battled across the continents of the world to claim what is arguably motorsport's toughest prize: the World Rally Championship. Now a multi-million dollar, global technology battle and terrestrial television phenomenon played out over the frozen wastes of Finland, the dusty plains of Australia and the sun-kissed mountain roads of Corsica, the WRC has reached its 30th birthday. This book celebrates that important milestone and paints an exhaustively detailed picture of the people and personalities who have shaped this great sport. The Complete Book of the World Rally Champions provides a biographical account of the 65 men who have won at least one World Championship Rally since 1973.

The biographies are compiled by the sport's leading writers and historians and complemented by stunning photography. The book includes a detailed and accurate statistical career record of each driver, plus highlights of all the significant cars.

Automotive FDI in Emerging Europe A. J. Jacobs, 2017-06-19 This book examines the dramatic increase in automotive assembly plants in the former Socialist Central European (CE) nations of Czechia, East Germany, Hungary, Poland, and Slovakia from 1989 onwards. Enticed by relatively lower-wage labour and significant government incentives, the world's largest automakers have launched more than 20 passenger car assembly complexes in CE nations, with production accelerating dramatically since 2001. As a result, the annual passenger car production in Western Europe declined by more than 20% between 2001 and 2015, and alternatively in the CEE it increased by nearly 170% during this period. Drawing on case studies of 25 current and former foreign-run assembly plants, the author presents a rare historical account of automotive foreign assembly plants in the CE following this dramatic geographic shift. This book will expand the knowledge of policy-makers in Europe in relation to their pursuits of FDI and will be of great interest to scholars and students of business, economic history, political science, and development.
