

## Mrcp Paces Ethics And Communication Skills Master Pass

Clinical Communication Skills is a ground-breaking new resource for medical students. It provides a practical introduction to the subject, with acknowledgement of key theories. Pragmatic worked examples will be of immediate benefit in clinical environments. The book draws on patient and professional involvement with interview podcasts.

Cases for PACES provides a concise study aid to Part II of the MRCP examination; the Practical Assessment of Clinical Examination Skills or PACES. The new edition of this very popular study guide has been completely updated, and now includes scenarios for Station 5, introduced in October 2009. Featuring a 'case study' format that matches the style of the exam, it includes all the essential information - perfect for on-the-ward revision and study. Written by authors who remember their own PACES examination, their experience in learning and teaching PACES is condensed to provide exactly what you need to know to pass. With its informal style, Cases for PACES is also ideal for self-directed learning in groups, and will help you hone your clinical skills and boost your confidence in the run-up to the examination. For more titles to help you prepare for MRCP examinations go

A practical manual of clinical medicine, arranged systematically and concisely as a wide-ranging systems-based survey of the main points of clinical practice - perfectly geared towards study for the MRCP(UK) Part 1 examination. Neil Black, in the Foreword The MRCP exam is not only a necessary hurdle to pass for any junior doctor wishing to become a hospital physician in the UK, but also an excellent training in the theory and clinical skills needed to be a senior physician. This book is a comprehensive revision text covering all the clinical subjects of the MRCP Part 1 and 2 examination. It adheres to the MRCP official syllabus and also reflects UK clinical guidelines as well as peer-reviewed medical research papers. The information is set out in an easily accessible way, making studying for this important exam productive and enjoyable. Organised by subject area, salient points are noted and the contents give appropriate weighting to the individual topics. Boxed text, tables and figures all add to this concise guide's appeal. Whilst it covers much traditional material such as lists of causes and differential diagnoses, this is the only book written entirely according to the current evidence-base as published by NICE, SCIE and the Cochrane Collaboration. This is a one-stop manual for candidates of the MRCP Part 1 and 2 but is also highly recommended for MRCP Part 2 written candidates and undergraduates sitting their final year examinations.

A.C.E.S for P.A.C.E.S. is a book on clinical skills for doctors attempting the M.R.C.P. P.A.C.E.S examination. It is also suitable for undergraduates, postgraduates and practicing clinicians. The book analyses the M.R.C.P P.A.C.E.S examination. It then analyses the principles of clinical methods, describes techniques in detail and gives relevant findings and their causes. In More Detail: A.C.E.S for P.A.C.E.S. starts off with a short discussion of examinations in general and then discusses the M.R.C.P P.A.C.E.S. examination in detail. The next part of the book is an analysis and then a discussion of clinical skills followed by a general outline on how one should approach the development of clinical skills. A detailed discussion of the organ systems follows with a chapter dedicated to each system. Each chapter is divided into three sections. Initially there is a detailed description of clinical method. Next there is an outline of the common conditions that may occur in relation to each system. The final section of each chapter contains a description of clinical findings and the conditions in which they occur. The approach taken by this book is a description of the findings that may occur at each step of the clinical encounter. The last chapter discusses communication and ethics. This chapter begins with an analysis of the way in which candidates are assessed at examinations. It then analyses communication and ethics and describes a method of communication. An appendix is included which gives a summary of history taking and examination techniques for each system.

A guide for the MRCP PACES examination. It covers five clinical stations, including Brief Clinical Consultation, History Taking, Communication Skills and Ethics. It provides practical advice on approach to the patient, inspection of signs and examination technique, with explanations of how to interpret the elicited signs.

An Aid to the MRCP PACES Volume 3: Station 5 is a brand new, fully updated edition of the best-selling PACES revision guide to address the newest Station, covering Integrated Clinical Assessment, with content guided by the experiences of PACES candidates. The cases and scenarios have been written in accordance with the latest examining and marking schemes used for the exam providing an invaluable training and revision aid for all MRCP PACES candidates. In order to fully support candidates taking the exam, this trilogy of best-selling revision aids is now presented as: An Aid to the MRCP PACES Volume 1: Stations 1 and 3, Fourth Edition 9780470655092 An Aid to the MRCP PACES Volume 2: Stations 2 and 4, Fourth Edition 9780470655184 An Aid to the MRCP PACES Volume 3: Station 5, Fourth Edition 9781118348055

This title is written for MRCP candidates preparing for PACES exam in UK and rest of world. Clinical examinations in the OSCE style of marked stations are daunting for all students, whether undergraduates or MRCP candidates. The recent introduction of the 5-station PACES (Progressive Assessment of Clinical Examination Skills) exam inspired a great deal of apprehension, so the appearance of the first edition of Hall's PACES for MRCP was greatly welcomed by candidates and became an immediate success. This new edition builds on the book's reputation. It provides, in one colourful and attractive volume, complete coverage of all the most common medical cases that will be covered in PACES and similar exams. A one-volume text giving candidates complete preparation for the PACES exam within one portable volume 250 cases organised into the 5 stations of the PACES exam - respiratory and abdominal system, history taking, cardiovascular and nervous system, communication and ethics and skin, locomotion, eyes and endocrine systems Engaging question-and-answer approach at the end of each case - excellent preparation for the exam Boxed tips highlight vital information - helps identify what is most important to remember Produced in full colour throughout Colour coding for each station Many more illustrations added - now over 300 clinical photographs and line drawings in colour Many more cases added, bringing the number up to 250 - 50 per station History-taking and communication skills stations now revised so that they exactly mimic the requirements of the exam

Taking a patient's medical history is a vital skill often overlooked by junior doctors and medical students, leading to a worryingly high failure rate in the PACES and OSCE exams. Don't be caught out! This book has been specifically designed to give you invaluable guidance and practice for taking medical histories. It features 50 complete case studies, including referral letters, medical histories, suggested data gathering methods, points to consider, warning signs, management of uncomfortable topics and differential diagnosis. With a focus on the importance and

benefits of role-play in revision, this concise and easy to read format provides the study aid for Membership of the Royal College of Physicians (MRCP) candidates sitting their Objective Structured Clinical Examination (OSCE) and Practical Assessment of Clinical Examination Skills (PACES) examinations. It is also of great benefit to undergraduates approaching their final year examinations.

This book provides an easily portable yet comprehensive guide to the PACES examination. It includes all of the most relevant clinical information for the PACES exam supplemented by tips supplied by the highly experienced chapter authors. The main aim of the book is to consolidate candidates' theoretical knowledge and help them apply it to the clinical examination scenario. In addition the book forms an excellent pocket reference for trainees in acute medicine, accident and emergency medicine, anaesthetics and critical care and general practice.

This book provides rapid revision for MRCP candidates preparing for the commonly overlooked 'Ethics and Communication Skills' section of the Practical Assessment of Clinical Examination Skills (PACES) exam. It assists you in developing an understanding of ethical issues and enhances your ability to communicate effectively with patients, their relatives and your colleagues.

MRCP PACES Ethics and Communication Skills is concise and well presented for easy study and reference - perfect for breezing through revision.

The forerunner to this book - Ryder, Mir & Freeman's 'An Aid to the MRCP Short Cases' - rapidly established itself as a classic and has sold over 30,000 copies. The new Progressive Assessment of Clinical Examination Skills (PACES) has replaced the old short case exam and, as a result, the authors have revised, reworked and extended their highly successful text so that it continues to address the study needs of candidates. This new revision aid is now presented in two volumes: An Aid to the MRCP PACES Volume 1: Stations 1, 3 and 5 An Aid to the MRCP PACES Volume 2: Stations 2 and 4 This Volume covers Station 2 'History Taking' and Station 4 'Communication Skills'. In the 'History Taking' section at least 50 examples of each type of question and case are included, together with scenarios with simulated patients. The focus of the book is very much on the examiners' expectations so that candidates have a true picture of the areas on which they are being tested. Station 4 'Communication Skills' also covers the ethical issues in the doctor-patient relationship, such as managing organ transplantation, consenting for hospital post-mortem, etc. Also included in this Volume is the 'Experiences and Anecdotes' chapter providing real quotes from both candidates and examiners - this helps the candidate to avoid the more common pitfalls of the exam.

Cardiology is a large and critical branch of internal medicine, and as such covers a vast amount of the knowledge tested in Membership of the Royal Colleges of Physicians (MRCP) exams. This study guide contains 150 multiple choice questions (MCQs), each with various numbers of stem answers. The questions cover a wide range of both cardiology and cardiovascular pharmacology and encompass both basic anatomy and physiology of the heart, through to advanced topics such as evidence-based medicine. The questions are supplemented at the back of the book with explanatory answers to aid further revision and study.

The ninth edition of this best-selling textbook of clinical medicine builds even further on its formidable, prize-winning formula of excellence, comprehensiveness and accessibility. 'This book is stunning in its breadth and ease-of-use. It still remains the "gold standard", thorough guide to clinical medicine its forefathers were.' BMA Medical Book Awards judges. New to this edition: 2 new chapters: Global Health and Women's Health. 25 new authors. New online editor, Adam Feather, with a team of young doctors to augment the e-book which accompanies the print book with clinical tips, key learning points, drug tips, learning challenges, case studies and MCQs. Full text redesign to incorporate: New system overview diagrams for clinical chapters. New coloured headings to help identify content relating to disease, management, investigations etc. New icons to aid text navigation. 11 new members and a new co-editor, Senaka Rajapakse, of the International Advisory Board. Edited by Kumar and Clark, clinicians and educators of world-renowned expertise. Authors comprise consultants at the top of their fields, paired with younger doctors closer to the exam experience, to ensure authority and relevance. Enhanced e-book accompanies the print book, for ease of transportation and use on the move. International Advisory Board, led by Professor Janaka de Silva and Professor Senaka Rajapakse, providing guidance for global coverage from across the world. Contributions to the e-book by members of the International Advisory Board to amplify areas of clinical importance in their parts of the world

Cases for PACES is concise, ideal for quick reference, and the perfect study aid to Part II of the MRCP examination. Including all the essential information for the exam in colour-coded sections for each station, it lets you quickly understand the most common cases. Now in full colour, it features new case material, updated content on ethics and law, and revised brief clinical consultations that better reflect the current exam. Cases for PACES also includes hints and tips for preparing for the exam, and what to expect on the day. The authors have condensed their own experiences in learning and teaching PACES to provide you with exactly what you need to pass. With its informal style it is ideal for self-directed learning in groups, and will help you hone your clinical skills and boost your confidence throughout your revision.

The forerunner to this book - Ryder, Mir & Freeman's 'An Aid to the MRCP Short Cases' - rapidly established itself as a classic and has sold over 30,000 copies. The new Progressive Assessment of Clinical Examination Skills (PACES) has replaced the old short case exam and, as a result, the authors have revised, reworked and extended their highly successful text so that it continues to address the study needs of candidates. This new revision aid is now presented in two volumes: An Aid to the MRCP PACES Volume 1: Stations 1, 3 and 5 An Aid to the MRCP PACES Volume 2: Stations 2 and 4 This Volume covers Station 1 'Respiratory and Abdominal Systems', Station 3 'Cardiovascular and Neurological Systems' and Station 5 'Skin, Locomoter, Eyes and the Endocrine System'. The 200 cases have been written in accordance with the new examining and marking schemes used for the exam. They provide an invaluable training and revision aid for all candidates.

This text provides in-depth coverage of more than 180 of the most commonly-presented cases covering all five stations of the PACES exam. Station-based chapters provide an introduction to how to approach the subscription, plus tips on how to avoid common pitfalls.

Featuring a wealth of practice scenarios, MRCP PACES: 180 Clinical Cases enables trainees to test themselves on everything they need to know to pass the PACES exam.

The 3rd edition of PACES for the MRCP has been fully revised and updated throughout to retain its pole position as the textbook to accompany core medical training (CMT) and

prepare candidates for success in the Practical Assessment of Clinical Examination Skills and a future specialty career. Features Fully revised for the new Station 5 and completely updated throughout. Promotes understanding and deeper learning of modern medicine applicable to PACES and the specialist registrar. Emphasis on clinical assessment – history-taking, examination and communication skills – equipping candidates with appropriate differential diagnoses from which to develop the right diagnosis. Encourages candidates to question why a diagnosis has arisen and consider its consequences. For example, 'Heat failure' is not a diagnosis until a candidate has considered the differential diagnoses of breathlessness and decided why heart failure is most likely, and then considered its cause (not always ischaemic heart disease), its presentation (acute, chronic, left or right ventricular or both) and, most importantly, the effects of it and its treatments on a patient's life. This 3rd edition of PACES for the MRCP continues to provide fully revised, up-to-date, evidence-based coverage of investigations and treatments. Whilst the emphasis of PACES is on clinical skills, candidates who understand when, for example, a patient with rheumatoid arthritis might benefit from a biologic agent and how this will influence inflammatory disease, is better equipped for success. A one-volume text giving candidates complete preparation for the PACES exam within one portable volume 250 cases organised into the 5 stations of the PACES exam – respiratory and abdominal system, history taking, cardiovascular and nervous system, communication and ethics and skin, locomotion, eyes and endocrine systems Engaging question-and-answer approach at the end of each case – excellent preparation for the exam Boxed tips highlight vital information – helps identify what is most important to remember Produced in full colour throughout Colour coding for each station Many more illustrations added - now over 300 clinical photographs and line drawings in colour Many more cases added, bringing the number up to 250 - 50 per station History-taking and communication skills stations now revised so that they exactly mimic the requirements of the exam

This book provides medical students and interns with a broad range of commonly encountered medical cases, a highlight of the classical signs, underlying causes, differential diagnosis, and relevant questions and the expected answers. It also features actual examination scenarios and tips for avoiding possible pitfalls.

MRCP PACES is a challenging examination requiring in-depth clinical knowledge, excellent clinical skills and the ability to present each case concisely and coherently. This revision guide helps candidates achieve these aims; it is compact enough for bedside use and sufficiently comprehensive for self-study. The new edition follows the structure of the current PACES exam and has an expanded section on Station 5. As well as a wealth of up-to-date questions for practice, it includes extensive new clinical information on new therapies and details of the latest investigations and management options. Each chapter has been reviewed by senior clinicians within the specialty. • Presents all seven stations in one book • Provides practical hints and tips for success at each station • Presents much more comprehensive information in a compact and accessible format than other books • Provides evidence-based information, guidelines and questions mapping onto the latest examination format. This book teaches the candidate not only how to pass the PACES exam, leading the reader through each case and exactly what is expected of them, but also provides a succinct yet detailed clinical handbook for support on medical wards.

Each case is divided into presentations with numbered references to clinical notes, and a further section devoted to questions commonly asked by examiners. The case presentation section provides detailed guidance to examination technique relevant to specific cases.

A book of 75 cases which mimic the style and approach of the MRCP PACES exam. The book will equip the candidate attempting the MRCP PACES examination, but will also provide an overview of evidence-based medicine for competency-based training.

This new book is written by authors experienced in training candidates to pass MRCP PACES from across the UK. They have put together Pass PACES based on their own teaching experiences to fill the gap in preparation aids for this high-stakes examination. As well as covering the curriculum, this book is designed to help candidates marshal their knowledge most effectively in order to maximize candidate's performance. The book provides a pragmatic guide to the presentation of cases and gives great tips for how to achieve full marks at each station in the exam. Gives the candidate a stepwise approach in how to present the clinical cases that appear in the exam, with the aim of achieving full marks in the clinical stations. Highlights the extra knowledge and information sought by examiners in order to award full marks at the discussion phase of each station. Gives advice on time management and organization before and during the exam. Uses smart memory techniques in order to create brain images for candidates to be able to recruit knowledge under the stress of the exam. Presents unique hidden curriculum knowledge and non-technical skills tips, customised for this exam. Accompanying videos that walk candidates through key examinations for each station, and podcasts giving instructional tips and guidance.

A book of over 150 cases which mimic the style and approach of the MRCP PACES exam. The book will equip the candidate attempting to pass the MRCP examination, and will also provide an overview of evidence-based medicine for competency-based training.

This new book is a highly structured case-based text to help candidates pass the new MRCP PACES (Practical Assessment of Clinical Examination Skills) examination. Its contents correspond to the five clinical stations of the exam and the systems that each contains. Each system is covered in a structured way, providing an examination scheme followed by a series of detailed case-based clinical scenarios. The book also covers the communication and history-taking skills and ethics stations which are new to this exam. Designed to thoroughly prepare candidates for the Practical Assessment of Clinical Examination Skills (PACES). Written as a systematic text which exactly complements the format of the exam: Station 1: Respiratory System, Abdominal System Station 2: History Taking Skills Station 3: Cardiovascular System, Nervous System Station 4: Communication Skills and Ethics Station 5: Skin, Locomotor System, Eyes, Endocrine Uses a practical, user-friendly, case-based format Each system in Stations 1,3 and 5 starts with a detailed examination scheme followed by a unique Recognition-Interpretation-Discussion format for each case. This has been carefully designed to make preparing for PACES efficient and maximise marks on the day of the exam. Stations 2 and 4 both start with introductions to the history taking and communication skills tested in the exam. Cases then follow, each comprising boxed history taking or communication skills/ethics points relating to the case followed by questions and answers The book is an up to date, detailed medical text for PACES candidates, striking the balance between the need to be concise and the needs to carefully explain concepts which candidates find difficult. Suitable as a 'ward adjunct' in the months and weeks prior to PACES, and may also be used for quick reference close to the exam Recognises the needs of busy doctors preparing for the exam Suitable for medical students approaching final MB Suitable also for PLAB candidates, FRACP, etc

MRCP Paces Ethics and Communication Skills Radcliffe Publishing

This new edition of An Aid to the MRCP Paces Volume 2: Stations 2 and 4 has been fully revised and updated, and reflects feedback from PACES candidates as to which cases frequently appear in each station. The cases and scenarios have been written in accordance with the latest examining and marking schemes used for the exam providing an invaluable training and revision aid for all MRCP PACES candidates.

Emphasises shared decision making, appraisal, and dealing with difficult situations as well as the more common topics such as taking a history and breaking bad news. This work is useful for healthcare educators with an interest in communication skills training and personal and professional development.

For doctors and medical students who wish to pass examinations, and above all, to gain competency in the practice of internal medicine, they must master the skills of communication, history taking, and physical examination. However, in spite of the abundance of textbooks, very few of them offer practical information to improve these skills. Thus, this concise book offers the required up-to-date, detailed, and practical information that is needed to master communication, history taking, and physical examination. Written by an experienced university academic and a senior examiner in a number of international examination boards, this book will greatly increase the chances of candidates to pass internal medicine exams. It simply gives students and doctors the passport for such success. Also, above all, it will provide enormous help to improve patient care, which is the ultimate goal in the practice of medicine.

Medicine for MRCP provides a comprehensive review of the material that you need to pass the MRCP Parts 1 and 2 written papers. The twenty-seven chapters mapped out to the RCP syllabus, cover all areas from molecular medicine and genetics, through to medical law and ethics. Written by specialist contributors and educational experts, the content is carefully crafted to build your understanding for both papers. Each chapter begins with the basic science required for Part 1, before covering clinical medicine for Part 1, Part 2 and the PACES examinations. To ensure effective revision, material is presented in short sections with bullet lists, tables, and boxes. Over 150 drawings and photos illustrate key principles and clinical topics making them easier to retain. References to evidence-based protocols and directions to further reading allow for deeper understanding. Candidates can review their progress via the 180 end-of chapter self-assessment questions. Drawing on the authors' expertise, Medicine for MRCP is the ideal companion for the MRCP as well as a useful reference guide for practicing medical doctors.

Reflecting the latest exam developments and covering the entire syllabus, this book focuses on providing complete revision coverage for the PACES exam. It is divided into five easy-to-use chapters, each representing a station from the exam, and integrates both the clinical and non-clinical aspects of the exam. It presents a wide range of commonly asked stations with detailed information laid out in a clear, concise manner, aided by photographs and diagrams.

The MRCP examination is constantly changing, reflecting the changing pressures on doctors in training. Whilst the MRCP PACES examination has evolved with the times, the core ethos of it, to act as a benchmark for sound clinical examination, logical diagnostic ability, common sense and most importantly, the development of compassionate and ethical physicians has remained unchanged. Whilst this exam has often struck fear into the hearts of junior doctors, we believe it is an assessment of progression during a physician's training that should be relished as an opportunity to demonstrate these ageless qualities that caring practitioners should possess. This book was born out of the philosophy that all doctors sitting their MRCP PACES already have the knowledge and skill to pass the exam, but just require guidance in the correct logical approach that the Royal College is looking for. The book has, therefore, quite unlike other MRCP PACES books, avoided any attempts at being a definitive text. Rather, it has focused on the key aspects that the authors believe are required to pass the examination, in particular focus on presentation style. Whilst medicine is indeed an ocean, the most commonly examined topics have been selected to reflect the likely scenarios a candidate will face — as the old adage goes — 'common things occur commonly'. In producing this book, extensive feedback was sought from candidates revising for the examination to reflect their needs. The layout therefore involves a methodical approach with a short introduction, similar to that presented in the exam, followed by clinical findings expected to be found. An example of presentation style has then been produced to allow the candidate to rehearse and practice this essential component of the exam. Doctors preparing for the exam have limited time due to busy work schedules. Therefore, summary books are key for candidates sitting the MRCP PACES examination. Most PACES candidates fail the exam based on history and communication stations. Therefore, attention has been paid to:
