

Mrcs Part A Essential Revision Notes Book 1

MRCS PART B OSCE: ANATOMY is unique in focussing solely on providing the knowledge necessary to pass one of the toughest exam components facing surgical trainees. Offering the most up-to-date coverage of anatomy practice questions and presented in a clear layout, chapters are mapped to the syllabus to deliver structured revision in all the key topics. Featuring a wealth of questions and fully descriptive answers, this book provides the essential revision text to maximise chances of exam success. 150 scenario-based anatomy questions, model answers and enhanced with concise revision notes Highly illustrated with diagrams and tables to improve understanding of complicated anatomy Includes practical advice on how to approach the exam and useful tips to achieve the highest marks Familiarizes candidates with the full range of presentations: surface anatomy, prosections and radiological imaging Edited by highly experienced anatomist, Professor Vishy Mahadevan Highly Commended at the BMA Medical Book Awards 2013

This title is directed primarily towards health care professionals outside of the United States. It is a concise revision guide to the core basic sciences for all surgical trainees preparing for the MRCS examination. Covering anatomy, physiology and pathology it concentrates on the recurring themes of these topics in the examination and emphasises the essential knowledge require by the candidate. It is designed for rapid revision prior to sitting the examination, written in an accessible style and indicating the clinical relevance of the topics.

Helps candidates pass the MRCS Part A exam. This book includes four practice papers, featuring over 120 Best of Five questions, mirroring the format of the exam.

Fully revised and updated in light of the changes to the format of the MRCS examination, this second edition of Get Through MRCS: Anatomy provides candidates with the knowledge and practice necessary for excelling at the challenging MRCS part B OSCE examination. The updated new edition of the highly-praised Get Through MRCS: Anatomy Vivas Fully revised in accordance with the changes to be focussed on the OSCE format Detailed model answers and full explanations to ensure thorough understanding of how to get the best results Plentiful illustrations and high-quality photographs in full colour throughout Written by the experienced author of the highly successful first edition, Simon Overstall has extensive knowledge of the exam, both in teaching offline courses and authoring MRCS revision texts. Get Through MRCS: Anatomy is essential reading for MRCS candidates wanting to achieve expert anatomical knowledge and to ultimately earn high results within their postgraduate examinations.

Suitable for candidates preparing for the intercollegiate MRCS exam, this title presents the essential facts in each subject area in note form with special attention given to areas that are often poorly understood.

This book is a concise revision guide to the core basic sciences - anatomy, physiology and pathology - which comprise the essential knowledge required by the trainee entering the specialty of surgery. It has been written in a style to facilitate easy learning of the essential facts, with indications of both their clinical relevance and importance. This book concentrates on those topics which tend to be recurring examination themes for initial surgical training. It will be an invaluable resource for the basic surgical trainee studying for the Intercollegiate MRCS examination, as well as proving useful for those in higher surgical training and for the surgically inclined, well-motivated student. The book covers in one volume all the essentials of the basic sciences - anatomy, physiology and pathology - to aid the candidate for the MRCS examination. In covering the applied basic science the books explains the application and clinical relevance of the three sciences The text is written in an appropriate 'bullet-point' style to allow easy reading and rapid exam preparation The contents concentrate on the recurring common themes of the examination, thus helping direct appropriate learning and focussing on the specific impoartnta areas of knowledge The book is illustrated with line drawings which are clearly annotated to aid learning. In this Second Edition, chapters have been updated and sections expanded to cover topics which are particularly relevant to examinations. The microbiology chapter has been rewritten, and the section on skin healing has also been extensively rewritten to include a section on burns, skin grafting and the anatomy of flaps. Each chapter has new OSCE scenario questions added to bring together the basic science and its clinical application in OSCE examinations.

This, along with Book 2, is the essential revision book for candidates preparing for the Intercollegiate FRCS (Urol) examination.

Offers a collection of papers that offer an understanding of the broad uses of management accounting information. These papers cover such topics as: product pricing, performance measurement, activity-based costing in different countries and adoption issues, strategic control systems, ABC implementation in a service firm, and more.

This is a fully updated edition of the hugely successful OSCEs for the MRCS Part B: A Bailey and Love Revision Guide. The content has been revised in line with recent changes to the examination, such as the introduction of microbiology and applied surgical sciences and changes from patient safety to clinical and procedural skills. Popular with trainee surgeons preparing for the oral element of the MRCS (the objective structured clinical examination, or OSCE), this revision guide will maximise the chances of success in surgical examinations.

A fully updated and illustrated handbook providing comprehensive coverage of all curriculum areas covered by the MRCOG Part 1 examination.

Specifically designed to help candidates revise for the MRCS exam, this book features 350 Single Best Answer multiple choice questions, covering the whole syllabus. Containing everything candidates need to pass the MRCS Part A SBA section of the exam, it focuses intensively on the application of basic sciences (applied surgical anatomy, physiology, and pathology) to the management of surgical patients. The high level of detail included within the questions and their explanations allows effective self-assessment of knowledge and quick identification of key areas requiring further attention. Varying approaches to Single Best Answer multiple choice questions are used, giving effective exam practice and guidance through revision and exam technique. This includes clinical case questions, 'positively-worded' questions, requiring selection of the most appropriate of relatively correct answers; 'two-step' or 'double-jump' questions, requiring several cognitive steps to arrive at the correct answer; as well as 'factual recall' questions, prompting basic recall of facts.

Provides the most up-to-date material, matching the MRCS syllabus, to aid preparation for the MRCS A examinations. The book covers every

major subject in the MRCS syllabus; works systematically through every general surgical topic likely to appear in the exam; highlights important principles of Surgery; contains important lists and vital points; is clearly laid out with illustrations to aid understanding. While medical professionals continue to practice traditional allopathic medicine, the public has turned toward nutritional and integrative medical therapies, especially for addressing the proliferation of chronic diseases. Written by leaders in the academic and scientific world, *Nutrition and Integrative Medicine: A Primer for Clinicians* presents various modalities to help restore health. This book provides users with a guide to evaluating and recommending nutritional and integrative therapies. The book offers insights on the microbiome of the human body, examines the relationship of human health to the microbiome of the food we ingest, and introduces the concept of "food as information." It provides enlightenment on anti-aging and healing modalities, mind–body medicine, and an investigation of psychological trauma as related to disease causation. Integrative therapies, including water, light, and sound therapy, are explored, and information on healing chronic disease through nutrition, the tooth–body connection, the role of toxins in disease causation, and electromagnetic field hypersensitivity, as well as its management, is presented.

Designed to help medical students through their exams. Built around the successful 'Essential Revision Notes for MRCP', this title focuses on what is essential learning for medical undergraduates and gives readers an 'all round' knowledge of medicine at this level.

Featuring a wealth of practice questions, MRCS Part A: 500 SBAs and EMQs allows trainees to test themselves on everything they need to know to pass the MRCS Part A exam.

Over recent years the MRCS viva examination has increasingly made use of radiological imaging to facilitate the discussion of anatomy relevant to surgical practice. It is rare for junior doctors to receive adequate exposure to radiology in their day-to-day surgical practice, which makes preparation for this part of the examination difficult. For many, examinations are stressful. The last thing a candidate needs is to be faced with unfamiliar radiological images. This review of surgically relevant radiological imaging aims to prevent initial uncertainties and will allow candidates to discuss relevant anatomy and score valuable points. An invaluable addition to any revision plan, this title also:

- highlights typical anatomy viva questions
- familiarizes candidates with a range of images of differing modalities (plain film, fluoroscopy, computed tomography and magnetic resonance imaging)
- introduces different planes of imaging, enabling candidates to deal with unusual coronal or sagittal views with confidence
- gives concise but detailed notes for quick consultation

This book provides subject based Single Best Answer style questions for doctors on their Foundation Year rotations and candidates taking their MRCS exam. It includes SBA questions testing factual knowledge and clinical scenarios testing application of basic facts. Detailed answers and explanations enable doctors to revise without the need to read large Anatomy books.

This title is directed primarily towards health care professionals outside of the United States. It has been written to encompass the basic anatomy, physiology and pathology required by the syllabus of the UK Royal Colleges and the Intercollegiate Surgical Curriculum Project. For this Second Edition many of the chapters have been updated, especially the chapters on immunology, basic microbiology, the endocrine and locomotor systems and the breast. An attempt has been made throughout to indicate the clinical relevance of the facts and the reason for learning them. There are several new contributors to the author team, all of whom are experts in their field and many of them are, or have been, experienced examiners at the various UK Royal Colleges. Brings together three basic sciences in one book and presents them in an integrated format. Presents the sciences at the right level for surgical trainees. Written in a straightforward and readable style. Thoroughly revised to take account of latest changes in basic surgical training, especially the chapters on immunology, basic microbiology, the endocrine and locomotor systems and the breast

The Roles of Vasopressin and Oxytocin in Memory Processing reviews research progress in a subfield of Behavioral Pharmacology concerned with vasopressin's (VP's) and oxytocin (OT's) roles in memory processing (MP). As hormones, VP is well-known for its pressor and antidiuretic action, and OT for its contribution to parturition and nursing. As neurotransmitters, they participate in a wide variety of self- and species-preserving functions expressed at psychological, physiological and behavioral levels. *Advances in Pharmacology* is available online on ScienceDirect — full-text online of volumes 48 onwards. Elsevier book series on ScienceDirect gives multiple users throughout an institution simultaneous online access to an important compliment to primary research. Digital delivery ensures users reliable, 24-hour access to the latest peer-reviewed content. The Elsevier book series are compiled and written by the most highly regarded authors in their fields and are selected from across the globe using Elsevier's extensive researcher network. For more information about the Elsevier Book Series on ScienceDirect Program, please visit: <http://www.info.sciencedirect.com/bookseries/> * Comprehensive coverage of both alternative theories and relevant research * Several key chapters reviewed by researchers whose studies and theories formed the subject matter of these chapters * Basic laboratory research focus with potential application for understanding and treating human memory disorders

MRCS A Essential Revision NotesPastest

Offers an introduction covering the MRCS exam with particular reference to OSCEs; an overview of clinical skills in history taking and physical examination; chapters covering sections of the exam with popular cases in the OSCE format at the end of each chapter; and, a layout with colour images.

The definitive guide to revision for the MRCPCH examination. 25 Chapters covering all areas the MRCPCH syllabus in note format. Concise presentation of information, with hints and tips. Vital facts presented in an attractive user-friendly format.

Diagrams, pie charts, lists, illustrations and bullet points to aid learning.

This book is a concise revision guide to the core basic sciences – anatomy, physiology and pathology – which comprise the essential knowledge required by the trainee entering the specialty of surgery. It has been written in a style to facilitate easy learning of the essential facts, with indications of both their clinical relevance and importance. This book concentrates on those topics which tend to be recurring examination themes for initial surgical training. It will be an invaluable resource for the basic surgical trainee studying for the Intercollegiate MRCS examination, as well as proving useful for those in higher surgical training and for the surgically inclined, well-motivated student. The book covers in one volume all the essentials of the basic sciences – anatomy, physiology and pathology - to aid the candidate for the MRCS examination. In covering the applied basic science the books explains the application and clinical relevance of the three sciences The text is written in an appropriate 'bullet-point' style to allow easy reading and rapid exam preparation The contents concentrate on the recurring common themes of the examination, thus helping direct appropriate learning and focussing on the specific impoartnta areas of knowledge The book is illustrated with line drawings which are clearly annotated to aid learning. In this Second Edition, chapters have been updated and sections expanded to cover topics which are particularly relevant to examinations. The microbiology chapter has been rewritten, and the section on skin healing has also been extensively rewritten to include a section on burns, skin grafting and the anatomy of flaps. Each chapter has new OSCE scenario questions added to bring together the basic science and its clinical application in OSCE examinations.

Offers a range of sample comparative journal extracts enabling Foundation Year doctors and MRCP and MRCPsych candidates to practise their critical appraisal skills. This title includes extracts that cover the whole spectrum of critical appraisal, together with exercises for the reader to work through independently to improve their technique.

This revision book is specifically designed to help candidates revise the MRCS syllabus, as defined by the Intercollegiate Surgical Curriculum Project (ISCP). The book features 250 questions divided into 96 themes.

This essential companion to Bailey & Love's Short Practice of Surgery covers the clinical conditions most commonly encountered by medical students, junior clinicians, and surgeons in training. This is clinical anatomy at its best! Structured by body region, each chapter includes plentiful clinical photographs and images supplementing the high-quality anatomical diagrams, using the best modality to demonstrate anatomical relevance. Highlighted descriptions of clinical relevance emphasise the integrated approach so central to current teaching practice, and facilitated by the wealth of both clinical and anatomical experience of the distinguished author team.

Grammar is an essential element of language learning. Yet it can be hard to teach and difficult to learn. Oxford surveyed over one thousand teachers to find out the biggest challenges facing grammar students. Elements of Success solves those challenges.

Level-appropriate charts explain grammar in a clear, simple and highly visual way so that students can readily understand and review the grammar points. The charts have easy-to-understand explanations, manageable sections, and effective use of color making them accessible. Many of the grammar charts include common student errors. Grammar activities point students back to specific sections of the charts, so they know exactly where to look for help. The content is engaging, relevant, and meaningful, capturing students' interest. All the charts, activities, information and pronunciation notes use authentic, corpus-based language based on the 2-billion word Oxford English Corpus so that students learn grammar as it is most likely to be used by a native speaker. Additional Research Says notes, For Your Information notes, and Pronunciation notes throughout Elements of Success provide students with interesting, useful information. Extensive practice activities ensure students retain their learning, reducing time spent re-teaching the same grammar points. Students are given multiple ways to use the grammar so that they can not only remember it, but are able to apply it. All the grammar practice activities can be adapted to the unique needs of the students and of the classroom. Think about It, Write about It and Talk about It activities are flexible, open-ended activities which integrate listening, speaking, reading, and writing skills, and engaging topic-based activities put grammar in context. Four-skills practice and critical thinking empower students to use language creatively and develop comprehensive language abilities. Elements of Success also allows students to practise anytime, anywhere through Elements Online Practice Plus. This easy-to-use site, designed specifically for English Language learners, provides students with all new practice activities and interactive games. Automatic feedback not only gives the right answers but explains why the answers are correct. The integrated discussion board and email tools allow students to communicate with one another. The Online Practice site includes the grammar charts, audio downloads of all the student book audio, and progress reports to show what students have mastered and what they still need help with. The comprehensive teacher's resources for Elements of Success include an easy-to-use learning management system which allows teachers to monitor their students' performance and communicate with their students online. Teachers can download all the resources, including student book answer keys, teaching notes, class audio, and audio scripts. Tests are available in a variety of formats to suit every classroom's unique needs. Teachers can assign automatically-scored online tests or download print-and-go tests or customizable tests. Elements iTools Online enriches students' learning experience and reduces teachers' lesson planning time. Student book on screen engages students with "heads up" instruction, and pop-up photos illustrate grammar points in context and support instruction. On-screen expansion activities promote classroom engagement. Also included are general teaching notes to guide instruction, audio at point of use, extra audio, additional grammar presentations, and links taking you directly to Online Practice.

This clear and concise revision guide has been written to aid surgical trainees in their effective preparation for the new format MRCS Part B examination. It covers material on all five broad content areas of the OCSE format and includes a detailed section on effective communication skills. Chapters are structured in a logical manner with examples from the examination. Text is provided in short bullet points and simplified diagrams. Important references regarding trials and national guidelines have been added for further preparation. This time-saving MRCS Part B revision guide is written by d.

MRCS Part A: 550 SBAs and EMQs, Second Edition continues the tradition of the best-selling first edition by offering a wealth of practice questions covering applied basic sciences and principles of surgery for candidates preparing for the MRCS Part A written exam. With 40% new content, including the addition of trauma and orthopaedic questions to provide complete coverage of surgical specialties, this book remains an essential revision tool designed to maximise chances of exam success. Key points 550 SBAs and theme-based EMQs test knowledge of applied basic sciences and general surgical principles, respectively, reflecting the formats encountered in the exam Chapters organised by anatomy, physiology, pathology, principles of surgery and general surgery, to help you focus on areas of weakness Provides in-depth answers, with illustrations, to help consolidate knowledge and understand key concepts Gives practical advice on how to approach revision and useful tips to improve exam technique Revised and updated version of: Small animal thoracic surgery / E. Christopher Orton; illustrated by Thomas O. McCracken; contributing author, James S. Gaynor. 1995.

MRCS Applied Basic Science and Clinical Topics offers a complete and up-to-date guide to specialty training in surgery, covering all the core topics examined in the MRCS Part A and B exams. Presented in a clear layout, chapters are mapped to the syllabus to deliver structured revision in all the systems. Featuring concise and easy-to-digest notes, this book provides clinical knowledge, practical skills and the essential revision tool to maximise chances of exam success. Key Points Presents topics in an accessible double-page format for rapid access to information Covers the full knowledge-base examined by the Royal College of Surgeons Highly illustrated with clinical photographs, imaging and diagrams to aid visual memory of topics Equips candidates with the necessary basic science and clinical knowledge to succeed in the MRCS exams Complements MRCS Part A: 500 SBAs and EMQs and MRCS Part B OSCE: Anatomy Highly Commended at the BMA Medical Book Awards 2013

Creativity is an integral element of any primary classroom. It has been never more important for teachers to involve children in their own learning and provide a curriculum that motivates and engages. Being a creative teacher involves generating new ideas, reflecting upon and evaluating different teaching approaches, and establishing an environment that supports creativity in your pupils. Creativity in the Primary Classroom explores how to develop as a creative teacher and how to foster creativity in your classes. Drawing from key literature and detailed real-life examples, Juliet Desailly puts into practice her extensive experience

planning, advising and developing creative approaches to teaching and curriculum planning. This book examines what creativity in a primary classroom can look like, and is supported throughout by practical activities for use across curriculum subjects and reflective tasks encouraging critical engagement with key conceptual issues. This is essential reading for students on primary initial teacher education courses including undergraduate (BEd, BA with QTS), postgraduate (PGCE, SCITT), and employment-based routes into teaching, and also for practicing teachers wishing to enhance their own teaching. Juliet Desailly, formerly PGCE Tutor in Primary Education at the Institute of Education, London, is a freelance Educational Consultant. 'This book deepens and broadens our understandings of creativity as applied to primary education. It provides a balance of practical frameworks and approaches with wise guidance. Many schools and individual teachers will find Juliet Desailly's work invaluable as they embrace the greater pedagogical and curricular freedoms promised by government.' - Jonathan Barnes, Senior lecturer in Primary Education at Canterbury Christ Church University.

FRCOphth Part 1: 400 SBAs and CRQs offers a wealth of practice questions for candidates preparing to sit the FRCOphth Part 1 exam. With so few revision resources available, this book will be an invaluable tool for candidates requiring comprehensive practice material for successful exam preparation. Organised into 3 complete exam papers, all the questions feature corresponding answers that reinforce key concepts and enable candidates to gain a thorough understanding of the subject. Topics in exam papers 1 and 2 are arranged in line with the FRCOphth syllabus, while exam paper 3 is presented as an unstructured mock exam to replicate the experience of sitting the exam. Covering the full breadth of the syllabus, FRCOphth Part 1 400 SBAs and CRQs provides the definitive revision guide to maximise chances of exam success. 360 SBAs and 40 CRQs (Constructed Response Questions) arranged as three exam papers, providing a large number of questions for exam revision Chapters 1 and 2 are exam papers, structured according to the FRCOphth syllabus to allow organised, progressive revision Chapter 3 is structured as a standard mock exam allowing candidates to practice under exam conditions Answers feature detailed explanations to consolidate knowledge

Adventures builds students' confidence through the use of clear grammar presentations, varied practice exercises, and guided skills work. The highly motivating topics have been carefully chosen to appeal to teenagers. The clear syllabus offers an analytical approach to grammar, as well as extensive and varied practice. Strong emphasis is placed on skills development and study skills. There is a systematic approach to vocabulary building. The variety of challenging and enjoyable activities motivate students to participate fully in class. The optional 'World of English' sections exploit functional and everyday language, cross-cultural topics, and authentic pop songs.

MRCP PART 1: 400 BOFs offers a wealth of practice questions covering a wide range of topics for trainees preparing for the MRCP Part 1 exam. Presented in a clear layout, chapters are mapped to the syllabus to deliver structured revision in each clinical specialty. Featuring fully descriptive answers and extensive referencing, this book provides the essential revision tool to maximise chances of exam success. Key Points 400 Best of Five questions reflect the breadth of topics encountered in the actual exam Practical advice on how to approach revision and useful tips to improve exam technique Answers feature concise case-based descriptions to consolidate knowledge Answers illustrated to improve understanding of key concepts Complements MRCP Part 2: 450 BOFs and MRCP PACES: 250 Clinical Scenarios – the complete MRCP revision package

The new edition of this work is the only book that MCEM candidates will need to pass the MCEM Part A exam

Success in any exam requires careful preparation, background reading and, importantly, prior self-assessment. Containing 1000 Single Best Answer (SBA) questions for the MRCS Part A, this book offers surgical trainees a wealth of exam practice, written and edited by expert authors with recent experience of the MRCS syllabus. Get Through MRCS Part A:

Helps candidates pass the new MRCS Part A exam. This book contains 4 complete practice papers, each featuring over 120 best of five questions, mirroring the format of the exam. It features questions which reflect the balance of topics covered in the actual exam. It includes explanations to every question to aid revision within the MRCS syllabus.

SBAs and EMQs for the MRCS Part A is an invaluable guide to sitting and passing the examination, which tests the candidates in their knowledge of the basic sciences as applied to surgical practice. Based on the highly successful Insider Medical MRCS Examination Clinical Course, this book facilitates the pathway for a novice clinician to pass this ch

A volume of 500 answer questions in Physiology divided in to 9 sections (namely general, cardiovascular, respiratory, renal, neurophysiology, gastrointestinal, endocrine and reproductive). It covers the subject of physiology.
