recently sat the exams, this book will show you how to predict and prepare for the stations you will face. As it leads you through the cases and the examiners' mark sheets, it teaches you how to pick up every point, with extra tips on how to impress and where to go to add to your practice and experience. For overseas doctors, this book also provides essential preparation for the clinical component of the PLAB exam. Key features: * Handy, pocket-sized book * Exam focused, with key tips on how to prepare and excel on exam day * Chapters on practical skills, communication, chronic disease management, discharge planning, psychiatric histories, focused history and management, and examination * Packed with real OSCE scenarios and model mark sheets OSCEs for Medical and Surgical Finals is an essential book for all medical students and PLAB candidates.

Over recent years the MRCS viva examination has increasingly made use of radiological imaging to facilitate the discussion of anatomy relevant to surgical practice. It is rare for junior doctors to receive adequate exposure to radiology in their day-to-day surgical practice, which makes preparation for this part of the examination difficult. For many, examinations are stressful. The last thing a candidate needs is to be faced with unfamiliar radiological images. This review of surgically relevant radiological imaging aims to prevent initial uncertainties and will allow candidates to discuss relevant anatomy and score valuable points. An invaluable addition to any revision plan, this title also:

- highlights typical anatomy viva questions
- familiarizes candidates with a range of images of differing modalities (plain film, fluoroscopy, computed tomography and magnetic resonance imaging)
- introduces different planes of imaging, enabling candidates to deal with unusual coronal or sagittal views with confidence
- gives concise but detailed notes for quick consultation
