'The Education System in Malawi', an Education Country Status Report (CSR), is a detailed analysis of the current status of the education sector in Malawi, the results of which have been validated by the government of Malawi. Its main purpose is to enable decision makers to orient national policy on the basis of a factual diagnosis of the overall education sector and to provide relevant analytical information for the dialogue between the government and development partners. The analysis incorporates data and

information from multiple sources, such as school administrative surveys by the Ministry of Education, household surveys, and a tracer survey created especially for this study. This CSR, developed by a multi-ministerial national team supported by UNESCO P le de Dakar, the World Bank, and GTZ specialists, updates the previous one drawn up in 2003 and consists of eight chapters, including a chapter on higher education. The analysis provides key monitoring and evaluation inputs for the overall education sector, particularly under the framework of the implementation of the National Education Sector Plan.

By most accounts, rural Malawi has lacked dynamism in the past decade. Growth has been mostly volatile, in large part due to unstable macroeconomic fundamentals evidenced by high inflation, fiscal deficits, and interest rates. When rapid economic growth has materialized, the gains have not always reached the poorest. Poverty remains high and the rural poor face significant challenges in consistently securing enough food. Several factors contribute to stubbornly high rural poverty. They include a low-productivity and non-diversified agriculture, macroeconomic and recurrent climatic shocks, limited non-farm opportunities and low returns to such activities, especially for the poor, and poor performance from some of the prominent safety net programs. The Report proposes complementary policy actions that offer a possible path for a more dynamic and prosperous rural economy. The key pillars of this comprise macroeconomic stability, increased productivity in agriculture, faster urbanization, better functioning safety nets, and more inclusive financial markets. Some recommendations call for a reorientation of existing programs such as the Malawi Farm Input Subsidy Program (FISP) and the Malawi Social Action Fund Public Works Program (MASAF-PWP). Others

identify promising new areas of intervention, such as the introduction of digital IDs and biometric technologies to enhance the reach of mobile banking and deepen financial inclusion. Finally, and importantly, the report recommends the scaling up of investments on girls' secondary education to curb early child marriage and early child bearing among adolescents. This will empower women at home and work and bend the trajectory of fertility rates in rural areas in order to boost human development and reduce poverty.

Tomasi Manda, an intelligent boy whose rational mind rejects belief in witchcraft, does something that causes his mother and elder brother to fear that he might be bewitched. They decide to put "protective medicine" into his blood. But their problem is how to get Tomasi to accept the medicine, having once before failed to convince him to have such protection. However, when Tomasi passes his primary school examinations and is selected for a boarding secondary school away from home, the two approach him with the medicine disguised as a charm, something that would bring him good luck from the strangers among whom he will now be living. Tomasi initially rejects the offer, but when, to his surprise, he sees that this causes his mother great pain, he lets her insert into his blood "the totally useless powder." Then certain things begin to happen to Tomasi which, unable to explain them otherwise, he can't help thinking are being caused by the potion his mother has put in his blood. Eventually he becomes convinced that he now has a potent luck charm in his body, and reaches the frightening conclusion that from now on his life will be run by this charm. What is he to do?

This Microsoft Official Academic Course (MOAC) IT Professional curriculum prepares certification students for success every step of the way. This 70-413 Designing and Implementing a Server Infrastructure exam course is the first of a series of two exams Microsoft Certified Solutions Associates (MCSE) candidates are required to pass to gain the MCSE:
