The commentaries of Martin Heidegger on the lyric poems of German Romantic poet Friedrich Hölderlin are an extraordinary encounter between poetry and the penetrating thought of a powerful philosophical mind. The writings included here reveal much about Heidegger's innermost thoughts on poetry, language, and how we think. This is the first English translation of this important work.

Ready, Set, Go features activities for building Straw Towers, Cars Powered by Gravity, and Faster Cars Powered by Gravity. The concepts of forces, energy, and the laws of motion are learned without formal instruction. Kids learn the method of science: have an idea, build a model, test it, measure the results, make changes, and re-test. At the end of the cycle of experiments they share ideas. This is how science is done! Transform students into inventors who take responsibility for their learning. They will become curious, creative, and collaborate with others. Using their hands as well as their minds, they create working models that solve specified problems. Instead of memorization and boredom, students learn through active discovery. This approach frees teachers to coach learning and focus where help is needed. Ready, Set, Go is three activities in 90 minutes length each. Curricula meets elementary grade STEM standards. Each activity includes lesson plans, student instructions, a student inventor log, activity protocols, and differentiation suggestions. The Creative Activity Set comes with a Teacher Resource including instructional
