Fresh out of college in the summer of 1961, Happy lands his first job as a graphic designer (okay, art assistant) at a small Connecticut advertising agency populated by a cast of endearing eccentrics. Life for Happy seems to be -- well, happy. But when he's assigned to design a newspaper ad recruiting participants for an experiment in the Yale Psychology Department, Happy can't resist responding to the ad himself. Little does he know that the experience will devastate him, forcing a reexamination of his past, his soul, and the nature of human cruelty -- chiefly, his own. Written in sharp, witty prose and peppered with absorbing ruminations on graphic design, *The Learners* again shows that Chip Kidd's writing is every bit as original, stunning, and memorable as his celebrated book jackets.

HUMANIQUENESS is a thought provoking response to contemporary scientific theories that claim to have found the missing link between humans and aquatic species that lived billions of years ago. Glauco Ortolano writes an inspirational book linking humans to a more divine heritage instead. From a poem written by Vicente Huidobro, an early 20th Century Chilean poet, Ortolano builds a fascinating paradigm to enlighten the reader on how we became the only species to have been endowed with the gift of both oral and written languages. "We are small gods, not evolved fish" affirms Ortolano. "Humaniqueness" is a must read to anyone interested in gaining a deeper understanding of what it means to be human and semi-divine. It will bring you into full realization of our unique faculties, gifts, and destiny as a species.

A one-year-old attempting to build a tower of blocks may bring the pile crashing down, yet her five-year-old sister accomplishes this task with ease. Why do young children have difficulty with problems that present no real challenge to older children? How do problem-solving skills develop? In Children Solving Problems, Stephanie Thornton surveys recent research from a broad range of perspectives in order to explore this important question. What Thornton finds may come as a surprise: successful problem-solving depends less on how smart we are--or, as the pioneering psychologist Jean Piaget claimed, how advanced our skill in logical reasoning is--and more on the factual knowledge we acquire as we learn and interpret cues from the world around us. Problem-solving skills evolve through experience and dynamic interaction with a problem. But equally important--as the Russian psychologist L. S. Vygotsky proposed--is social interaction. Successful problem-solving is a social process. Sharing problem-solving tasks--with skilled adults and with other children--is vital to a child's growth in expertise and confidence. In problem-solving, confidence can be more important than skill. In a real sense, problem-solving lies at the heart of what we mean by intelligence. The ability to identify a goal, to work out how to achieve it, and to carry out that plan is the essence of every intelligent activity. Could it be, Thornton suggests, that problem-solving processes provide the fundamental machinery for cognitive development? In Children Solving Problems she synthesizes the dramatic insights and findings of post-Piagetian research and sets the agenda for the next stage in understanding the varied phenomena of children's problem-solving.

From the bestselling author of *Fatherland* and *Pompeii*, comes the first novel of a trilogy about the struggle for power in ancient Rome. In his “most accomplished work to date” (*Los Angeles Times*), master of historical fiction Robert Harris lures readers back in time to the compelling life of Roman Senator Marcus Cicero. The re-creation of a vanished biography written by his household slave and righthand man, Tiro, *Imperium* follows Cicero’s extraordinary struggle to attain supreme power in Rome. On a cold November morning, Tiro opens the door to find a terrified, bedraggled stranger begging for help. Once a Sicilian aristocrat, the man was robbed by the corrupt Roman governor, Verres, who is now trying to convict him under false pretenses and sentence him to a violent death. The man claims that only the great senator Marcus Cicero, one of Rome’s most ambitious lawyers and spellbinding orators, can bring him justice in a crooked society manipulated by the villainous governor. But for Cicero, it is a chance to prove himself worthy of absolute power. What follows is one of the most gripping courtroom dramas in history, and the beginning of a quest for political glory by a man who fought his way to the top using only his voice—defeating the most daunting figures in Roman history.
