In every corner of this earth there are secrets. They are hidden in the dark edge of the woods, nestled in the cold stars, and staring out from a stranger's eyes. And whether they be demonic possession or an unsolved murder, the unknown has always haunted our dreams. From the hit podcast Unexplained comes a volume perfectly crafted for the curious, the cynical, and the not-easily-frightened. Richard Maclean Smith is the expert in the unknown, and humbly offers up ten tales of real-life events that continue to evade explanation. With these chilling stories comes the missing key: a connection to our own beliefs in science, superstition, and perception. What can a case of demonic possession teach us about free will? What can a cursed box show us about the act of storytelling? What can a supposed instance of reincarnation tell us about developing a concept of the self? Perhaps some things are just better left unexplained...

Explore Some Of The Most Fascinating Mysteries Of All Time Book 1: Unexplained Mysteries Of The World Humanity has come so far and explored so much. As a species, we have more or less conquered the entire Earth and all of its resources. We have built towering structures, intricate systems and settled everywhere -- from the tallest peaks to the deepest valleys. We have now entered what many like to think of as the enlightened, scientific era -- where old superstitions and fears have been abolished, and the mysteries of the past have been solved. Basically, many of us like to think we have figured it all out. However, whether we want to admit it or not, we are still surrounded by plenty of enigmas. Unexplained phenomena, such as confirmed instances of remote viewing or sightings of strange beings like Bigfoot, may sow a seed of doubt in even the surest of individuals. While some sneer at, or shy away from, the thought of investigating the mysterious, there are also those who feel curious, maybe even energized, at the thought of exploring something completely new. As Neil Armstrong once said: "Mystery creates wonder, and wonder is the basis for man's desire to understand". If you are one of those who seek to feel wonder, this book is for you. Herein you will find a varied collection of some of the most intriguing unexplained mysteries of our time. From the puzzling artifacts of a lost civilization, to psychic visions and shocking UFO landings -- by the end of this book, you will have plenty of captivating questions to ponder and investigate further. Book 2: Bigfoot & The Other Ones Bigfoot, also called Sasquatch, is thought to be a large, hairy, ape-like being that inhabits some of the dense forests and remote mountain ranges of North America. Although solid, scientific evidence of the creature is lacking, stories of sightings and encounters have been steadily accumulating throughout the years. As a result, Bigfoot has been placed in the category of so-called "cryptids" -- creatures that are thought by some to exist on Earth, but have yet to be properly documented by modern science. Others in this category include the mysterious, waterborne, dinosaur-like being popularly-known as "the Loch Ness monster", as well as the goat-eating Chupacabra of South America. Due to the sheer volume of eyewitness accounts involving Bigfoot, most people in the Western hemisphere recognize the general description of this creature. What few may realize, however, is that the Sasquatch is not unique to North America. Or, at least, stories of mysterious, bipedal hominids are not. From the mountainous regions of Nepal to the wild outback of Australia, tales of such beings have existed throughout history. In many cases, the descriptions of these creatures seem to match Bigfoot. So, then, a few questions naturally arise: Are these all part of a singular, long-lost species of great ape, or are they separate beings with different genetic lineages? How similar are they to each other, where do they live, and is there any evidence of their existence? We will explore the answers to these questions, and many more, in this book.

Everybody loves a good mystery and sometimes the questions can be more interesting than the answers. Will Pearson investigates twenty unique mysteries with their broad spectrum of strangeness. Some, like the sudden disappearance of the sailing ship Mary Celeste's passengers and crew have gained universal currency. Was the Wow! Signal a radio transmission from deep space, or was it the ambient resonating frequency of a passing comet? Cryptids like Bigfoot and the Loch Ness Monster teeter on the boundaries of probable and improbable, hoax and

reality, fact and fiction. Whether it be the intrigue of lost civilisations, like Göblekli Tepe in Turkey, sensationalist interest in The Zodiac Killer, or the elusive Shugborough Code that neither Dickens nor Darwin could crack, each unsolved mystery presents a challenge in its own way. Occasionally, it can feel as if there's a conspiracy at work - one in which scientists, journalists and 'professional explainers' want to put an end to anything and everything mysterious in life. Thankfully, not everything can be nailed down, sucked dry of its secrets and turned into a factoid. Mysteries do still exist - and continue to tease us. Sceptic or believer, the fun lies in probing them.
