As the twentieth century ended, Canada was completing its sixth term on the UN Security Council. A decade later, Ottawa's attempt to return to the council was dramatically rejected by its global peers, leaving Canadians – and international observers – shocked and disappointed. Canada on the United Nations Security Council tells the story of that defeat and what it means for future campaigns, describing and analyzing Canada's attempts since 1946, both successful and unsuccessful, to gain a seat as a non-permanent member. Impeccably researched and clearly written, this is the definitive history of the Canadian experience on the world's most powerful stage.

Noblit and Hare propose a method - meta-ethnography - for synthesizing from qualitative, interpretive studies. They show that ethnographies themselves are interpretive acts, and demonstrate that by translating metaphors and key concepts between ethnographic studies, it is possible to develop a broader interpretive synthesis.

"The Guide, in Part I, begins with a brief description of generalized CEA and how it relates to the two questions raised above. It then considers issues relating to study design, estimating costs, assessing health effects, discounting, uncertainty and sensitivity analysis, and reporting results. Detailed discussions of selected technical issues and applications are provided in a series of background papers, originally published in journals, but included in this book for easy reference in Part II." The ultimate "dictionary" for lovers of Provence: Peter Mayle's personal selection of the foods, customs and words he finds most fascinating, curious, delicious, or just plain fun. Though organized from A to Z, this is hardly a conventional work of reference. In more than 170 entries, Peter Mayle—bestselling author of *A Year in Provence*—writes about subjects as wide-ranging as architecture and zingue-zingue-zoun (in the local patois, a word meant to describe the sound of a violin). And, of course, he writes about food and drink: vin rosé, truffles, olives, melons, bouillabaisse, the cheese that killed a Roman emperor, even a cure for indigestion. *Provence A-Z* is a delight for Peter Mayle's ever-growing audience and the perfect complement to any guidebook on Provence, or, for that matter, France.

Clausewitz observed of Russia that "it was a country which could be subdued only by its own weakness and by the effects of internal dissension. In order to strike these vulnerable spots of its body politic, Russia would have to be agitated at the very center." In reading this study, the military student will realize how dearly the Germans had to pay for ignoring Clausewitz's advice.

The purpose of this study is to describe German planning and operations in the first part of the campaign against Russia. The narrative starts with Hitler's initial plans for an invasion of Russia and ends at the time of Germany's maximum territorial gains during the battle for Stalingrad. The material for this study was obtained from Germany military records now in the custody of The Adjutant General, Department of the Army. Monographs by former German general officers who had an active part in the planning and operations provided additional information. The authors of these monographs, prepared for the Historical Division, United States Army, Europe, include Generaloberst Franz Halder, Chief of Staff of the German Army from 1938-1942; Generaloberst Gotthard Heinrici, a former corps, army, and group commander on the Russian front; and several others. The study was written by George E. Blau of the Special Studies Division, Office of the Chief of Military History. In his presentation, the author made every effort to give an objective account of Germany's initial efforts to conquer Soviet Russia in World War II.

What would it mean for Christian counseling and pastoral care to take seriously the idea that God intervenes in the world? What would it look like for therapists and pastors to see themselves as opening the door to a miraculous divine encounter? How would counseling change if the intervention of God was not merely a theoretical idea but a lived experience? Building on Gary Collins's classic work, *The Rebuilding of Psychology*, the essays in this volume explore what a God-centered model of Christian counseling or pastoral care would look like. The contributors share the conviction that God is able to bring about lasting psycho-spiritual change here and now. Some of the topics discussed in the book include: Inner healing Prayer ministry Deliverance Christian holism Contemplative prayer Cognitive-behavioral therapy Emotion-focused therapy Group therapy Forgiveness Visualization and EMDR Addiction Life coaching This book seeks to encourage and aid counselors, pastors, church staff, clinical practitioners, academics and students in developing this kind of God-encountering, Christ-centered ministry of miraculous change.

Following the terrorist attacks of September 11, 2001, the Central Intelligence Agency embarked on a highly classified program of secret detention and extraordinary rendition of terrorist suspects. The program was designed to place detainee interrogations beyond the reach of law. Suspected terrorists were seized and secretly flown across national borders to be interrogated by foreign governments that used torture, or by the CIA itself in clandestine 'black sites' using torture techniques. This report is the most comprehensive account yet assembled of the human rights abuses associated with secret detention and extraordinary rendition operations. It details for the first time the number of known victims, and lists the foreign governments that participated in these operations. It shows that responsibility for the abuses lies not only with the United States but with dozens of foreign governments that were complicit. More than 10 years after the 2001 attacks, this report makes it unequivocally clear that the time has come for the United States and its partners to definitively repudiate these illegal practices and secure accountability for the associated human rights abuses.

The Republic of Korea's industrial policy has directed that nation's economy through nearly three decades of spectacular growth. But the authors of this paper maintain that this policy is showing signs of being outmoded. The time has come, the authors argue, for the Korean government to stop managing the economy's structural development and to redefine the responsibilities of business and government. Under this proposed compact, the allocation of resources would shift from the government to the private industrial and financial sectors. The transformation of the government bureaucracy from an ad hoc policy role to one of a transparent and predictable regulator is a key to the success of this undertaking. These new directions would present the government with enormous challenges. Greater competitive discipline and regulatory oversight would be required. While dealing with the complexities of the transition, the government would have to maintain macroeconomic stability and the momentum of savings and investment. For comparison, the study examines the industrial economies of France, Germany, Japan, and the United States, which underwent similar shifts.

The Harlem Renaissance was an unprecedented period of vitality in the American Arts. Defined as the years between 1910 and 1927, it was the time when Harlem came alive with theater, drama, sports, dance and politics. Looking at events as diverse as the prizefight between Jack Johnson and Jim 'White Hope' Jeffries, the choreography of Aida Walker and Ethel Waters, the writing of Zora Neale Hurston and the musicals of the period, Krasner paints a vibrant portrait of those years. This was the time when the residents of northern Manhattan were leading their downtown counterparts at the vanguard of artistic ferment while at the same time playing a pivotal role in the evolution of Black nationalism. This is a thrilling piece of work by an author who has been working towards this major opus for years now. It will become a classic that will stay on the American history and theater shelves for years to come.

Public relations as described in this volume is, among other things, society's solution to problems of maladjustment that plague an overcomplex world. All of us, individuals or organizations, depend for survival and growth on adjustment to our publics. Publicist Edward L. Bernays offers here the kind of advice individuals and a variety of organizations sought from him on a professional basis during more than four decades. With such knowledge, every intelligent person can carry on his or her activities more effectively. This book provides know-why as well know-how. Bernays explains the underlying philosophy of public relations and the PR methods and practices to be applied in specific cases. He presents broad approaches and solutions as they were successfully carried out in his long professional career. Public relations is not publicity, press agency, promotion, advertising, or a bag of tricks, but a continuing process of social integration. It is a field of adjusting private and public interest. Everyone engaged in any public activity, and every student of human behavior and society, will find in this book a challenge and opportunity to further both the public interest and their own interest.
