Al-Fatihah is the first and opening chapter in the Holy Quran, and in many ways it represents the essence of this holy book itself. In this opening sura of the Quran used in every mandatory and voluntary prayer in Islam the one and only God, Allah, summarizes in these seven oft-repeated verses the purpose and mission for humankind. Al-Fatihah The Opening of the Quran explores the foundational and critical questions addressed in the first sura of the Quran, and it provides a way for both Muslims and non-Muslims who are neither native in Arabic nor competent in reading and understanding Arabic to access this absolutely purposeful set of Quranic verses. Because the Quran cannot properly be translated, the authors have for many years diligently researched scholarly interpretations from both classical and contemporary mainstream scholars so that the concepts of Al-Fatihah can be easily discovered. The concepts of Al-Fatihah are ultimately simple, uncomplicated, and straightforward, yet in these seven verses containing only twenty-nine Arabic words, anyone interested in opening their hearts and minds to this spiritual journey can find in these words the depth of Allah's mercy and love.

An exclusive look at one of the world's most successful and controversial companies, and the

mysterious family behind it. BMW is arguably the most admired carmaker in the world. Its financial performance is the envy of its competitors, and BMW products inspire near-fanatical loyalty. While many carmakers struggle with falling sales, profits and market share, demand for BMWs continues to grow, frequently outpacing production. Now, David Kiley-Detroit Bureau Chief at USA Today and author of *Getting the Bugs Out*, which covered Volkswagen's demise and rebirth, goes inside the fabled German automaker to see how it does what it does so well. With unprecedented access to BMW executives, Kiley goes behind the walls of BMW's famed "Four Cylinders" headquarters in Munich at a time when the company is in its most aggressive, and some say riskiest, expansion in its history and when some of the company's new products, like the 7 Series sedan and Z4 roadster, are for the first time drawing as many barbs from critics as bouquets. Kiley covers intimate details of the boardroom drama surrounding the company's nearly disastrous acquisition and subsequent sale of the British Rover Group and its expansion into selling MINI and Rolls Royce cars. Besides being a world-class carmaker, BMW is also considered one of the smartest consumer marketing companies and Kiley explores the extraordinary value and management of the BMW brand mystique. He also takes a revealing look at the mysterious and ultra-private Quandt family of Bad Homburg

Germany, which owns a controlling stake in BMW: Johanna and Susanne Quandt, two of the wealthiest women in Europe and Stefan Quandt, one of the wealthiest bachelors on the continent. David Kiley (Ann Arbor, MI) is the Detroit Bureau Chief at USA Today who has covered the auto industry for 17 years. He has been featured on Nightline, CNBC, CNN, MSNBC, NPR and the Today show. He is also the author of *Getting the Bugs Out: The Rise, Fall, and Comeback of Volkswagen in America* (0-471-26304-4), also available from Wiley.

Only recently, with an encouragement from friends and family, she started to blog seriously and compiled what was written in her blog to a book. When I was only starting the therapeutic work with the Middle Eastern patients, I was looking for some kind of guidance to enable my genuine understanding of the Muslim patient cases. However, the material was scarce, haphazardly scattered, and mostly referring to the traditional therapies. That was not helpful and was even more confusing. With

time, I managed to amass my own systemized data based on regular observations, practical cases, reflections, and exchanges with the colleagues. This material helped me to approach each case individually while respecting the cultural environment of a patient. Eventually, the book was published. This is the kind of book that I have always wanted to find, and I had to write it eventually by myself. The work contains the systematized knowledge on the evolution of scientific psychology in the Islamic world, which starts with the prophetic times and continues until now. The book reveals the signifiers, which form a structure of a Muslim psyche. It also exposes the recurrent mental health complaints of the Arab patients and investigates their unconscious roots. The book is intended, first of all, for professionals who are directly related to the Muslim mental health-care system. Secondly, it is for anyone who is considering undergoing a personal analysis. And certainly, the edition is for everyone interested in the subject. This book does not intend to bring the answers. It rather continues the dialogue regarding the necessity of creating the psychological-counseling culture in the Muslim world.

Many principles of management textbooks make the assumption that students already have a stable understanding of the subject. Management Now combines the theory students need with examples within their grasp as well as providing reinforcing exercises and activities to help them retain and apply what they have learned. The emphasis is on application of material with a variety of exercises--both hypothetical and real life--for students to review and apply in their own environments. The text and ancillary materials help address the question that many students ask when taking a principles of management course: "What does management mean to me?"

" ... For enthusiasts of every age, here is a gallery of great

cars from the beginning to the present day. Each of these machines has its own claim to fame—some for fabulous styling, some for technical developments that changed the course of automotive history, some for racing prowess, and some for sheer “personality.” For each chapter there is a beautiful full-page color portrait of the car in its proper setting. The text is no mere description of the machines. With authority, enthusiasm and wit the author traces the history of each make, illuminating the characters of both cars and men with spine-tingling racing adventures and inside anecdotes. While the story of each make is complete in itself and may be read alone, the book as a whole provides a panorama of automotive history. The story of cars is, of course, also the story of men—some of the most colorful figures of the modern world—drivers such as Nuvolari, Oldfield, Fangio: engineers such as Bugatti, Ford, and Porsche. But cars are the real heroes of this book; in these words and pictures they emerge, not as mere collections of nuts and bolts and sheet metal, but as creatures with a kind of life of their own. A life that embodies the urge to freedom and adventure, the pride and love of beauty of both their creators and their users.” (New York – 1960)

Once upon a time the Babus at Nayanjore were famous landholders. They were noted for their princely extravagance. They would tear off the rough border of their Dacca muslin, because it rubbed against their delicate skin. They could spend many thousands of rupees over the wedding of a kitten. And on a certain grand occasion it is alleged that in order to turn night into day they lighted numberless lamps and showered silver threads from the sky to imitate sunlight. In the 1950s and 1960s, luxury car buyers, from government ministers to captains of industry, almost invariably bought British. These were stately, dignified, and grand vehicles, with many featuring leather interiors and wood trim. Unfortunately, that market has now largely disappeared and, with it, so have the car-makers themselves. This new book covers cars in the over-3-litre class from the biggest names in British luxury motoring

including Alvis, Daimler, and Lagonda, and high-end models from Austin, Rover, and Jaguar. It examines the features and characteristics of these classic cars, as well as explaining why they fell from prominence in the 1970s. Replete with beautiful photography throughout, this book is a loving portrait of the British luxury car, a dearly missed saloon defeated by foreign imports. One hundred years ago electric cars were the most popular automobiles in the world. In the late nineteenth century and at the start of the twentieth century, they outsold every other type of car. And yet, within a couple of decades of the start of the twentieth century, the electric car had vanished. Thousands of battery-powered cars disappeared from the streets, replaced by the internal combustion engine, and their place in the history of the automobile was quietly erased. A century later, electric cars are making a comeback. Fears over pollution and global warming have forced manufacturers to reconsider the electric concept. A History of Electric Cars presents for the first time the full story of electric cars and their hybrid cousins. It examines how and why electric cars failed the first time - and why today's car manufacturerers must learn the lessons of the past if they are to avoid repeating previous mistakes all over again. The book examines in detail: Early vehicles such as the Lohner-Porsche petrol-electric hybrid of 1901; Key figures in the history of the electric car development such as Henry Ford; Sir Clive Sinclair's plans to build a number of electric vehicles, designed to sit alongside the Sinclair C5; The return of the electric technology to vehicles as diverse as the NASA Lunar Rover,

commuting vehicles and supercars; Future developments in electric cars. For the first time the full story of electric cars and their hybrids are examined. The hidden past of the electric automobile is uncovered and its future developments are discussed. Superbly illustrated with 300 colour photographs, many of which are rare and original sketch designs. Nigel Burton has written and lectured on cars and automotive history for more than twenty years.
