In *African Motors*, Joshua Grace examines how Tanzanian drivers, mechanics, and passengers reconstituted the automobile into a uniquely African form between the late 1800s and the early 2000s. Drawing on hundreds of oral histories, extensive archival research, and his ethnographic fieldwork as an apprentice in Dar es Salaam's network of garages, Grace counters the pervasive narratives that Africa is incompatible with technology and that the African use of cars is merely an appropriation of technology created elsewhere. Although automobiles were invented in Europe and introduced as part of colonial rule, Grace shows how Tanzanians transformed them, increasingly associating their own car use with *maendeleo*, the Kiswahili word for progress or development. Focusing on the formation of masculinities based in automotive cultures, Grace also outlines the process through which African men remade themselves and their communities by adapting technological objects and systems for local purposes. Ultimately, *African Motors* is an African-centered story of development featuring everyday examples of Africans forging both individual and collective cultures of social and technological wellbeing through movement, making, and repair.

Dings and dents, creases and tears, trim, seams - all areas of repair are covered in this thorough and well illustrated guide. Frame problems, inner and outer panels, hidden damage, bumpers, grilles and lights are included, along with tips on the tools, materials and terms used in the trade. ...considering the wealth of information contained, it turns out to be an absolute bargain. *Skinned Knuckles*.

Annotation This book is a linguistic research study of trade names, especially names of firms (in the production and services sector), shops, eating/drinking houses and accommodation locations. It identifies and analyses the onomastic behaviour characteristic of the field of trades in contemporary Romanian public space, in addition to delineating a representative naming pattern for every subcategory of commercial onomastics investigated, according to three coordinates: (1) lexical and grammatical structure, (2) semantics (pointing out different levels of meaning), and (3) language preference. Methodologically, this book relies on the theoretical configuration provided by onomastics, functional, cognitive and generative grammar, semiotics (in the interpretation of trade names as iconic, indexical and symbolic signs), and pragmatics (observing that trade names underlie speech acts). Moreover, the study also refers to psycholinguistics, underlining the cognitive and affective mechanisms that are involved in the creation and use of trade names. The way in which commercial designations behave in society (especially how they contribute to the characterisation of a community both linguistically and culturally) is analysed using the tools of sociolinguistics. From the same point of view, the current context of trade names is also described, with reference to the influence

of the English language and the American sociocultural mindset (as instruments of globalisation) on the Romanian language and culture, and particularly on the unprecedented development of commercial onomastics. The methodology employed in this book furthermore includes theoretical precepts specific to linguistic polyphony, emphasising the similarity between trade names and unconventional anthroponyms (particularly nicknames and virtual names). Postcolonial studies, and post-communist studies, as a branch of this field of research, also play a role here. Finally, the reference to translation studies is made in order to be able to define trade names as cultural mediators in contemporary Romanian public space.

Name and Naming: Synchronic and Diachronic Perspectives aims to analyse names and the act of naming from an intercultural perspective, both synchronically and diachronically. The volume is divided into four main parts (Theory of Names, Anthroponomastics, Toponomastics, Names in Society), which are, in turn, organised into thematic chapters and subchapters. The book sets to offer a bird's-eye view of names and naming; this synthesis is made possible, on the one hand, by the blending of synchronic and diachronic viewpoints in the investigation of language facts and, on the other, by the fruitful conjunction of modern and classic theories. The originality and the novelty of the subject lies in the multi-disciplinary approach, in which the field of onomastics merges with that of sociolinguistics, psycholinguistics, pragmatics, history, literature, stylistics, religion, etc. The thematic diversity also derives from the meeting, within the pages of this book, of specialists (35 linguists and literati) from 11 countries on three continents.

An original book about consciousness which draws on interviews with former captives, thought experiment stories and treatments in the arts.

Many of us view language as a tool, a means by which to communicate our thoughts and emotions. But is there more to language than just "talk"? Can learning languages actually change the way you think? In *The Language Imperative*, best-selling author and linguistic scholar Suzette Haden Elgin examines the power of language to shape our lives. She confronts some of the most pressing issues parents and educators face today: Is it a good or bad idea for Americans to have command of more than one language? Should learning languages be a luxury for only the rich? Or should it be a goal of the public educational system as well? Based on solid science and filled with personal insights, *The Language Imperative* is required reading for anyone interested in how words shape our lives, both as individuals and as a nation.
