Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.

South Asian languages are rich in linguistic diversity and number. This book explores the similarities and differences of about forty languages from the four different language families (Austro-Asiatic, Dravidian, Indo-Aryan (Indo-European) and Tibeto-Burman (Sino-Tibetan)). It focuses on the syntactic typology of these languages and the high degree of syntactic convergence, with special reference to the notion of 'India as a linguistic area'. Several areas of current theoretical interest such as anaphora, control theory, case and agreement, relative clauses and the significance of thematic roles in grammar are discussed. The analysis presented has significant implications for current theories of syntax, verbal semantics, first and second language acquisition, structural language typology and historical linguistics. The book will be of interest to linguists working on the description of South Asian languages, as well as syntacticians wishing to discover more about the common structure of languages within this region.

Engendering Performance Indian Women Performers in Search of an Identity SAGE Publishing India

Spread over fifteen of the country's twenty-eight states, India's Maoist movement is now one of the world's biggest and most sophisticated extreme-left movements. Hardly a week passes without people dying in strikes and counter-

strikes by the Maoists—interchangeably known as the Naxalites—and the police and paramilitary forces. In this brilliant and sobering examination of the 'Other India', Sudeep Chakravarti combines reportage, political analysis and individual case histories as he takes us to the heart of Maoist zones in the country—areas of extreme destitution, bad governance and perpetual war.

This book contains a selection of papers presented at APME '99 (Third International Symposium on Advanced Polymers via Macromolecular Engineering --- Colonial Williamsburg, VA, USA, July/August 1999). The book focuses on the synthesis of targeted polymers with specific properties using macromolecular architecture. Various controlled polymerization

One film out of every five made anywhere on earth comes from India. From its beginnings under colonial rule through to the heights of Bollywood , Indian Cinema has challenged social injustices such as caste, the oppression of Indian women, religious intolerance, rural poverty, and the pressures of life in the burgeoning cities. And yet, the Indian movie industry makes only about five percent of Hollywood's annual revenue. In this Very Short Introduction Ashish Rajadhyaksha delves into the political, social, and economic factors which, over time, have shaped Indian Cinema into a fascinating counterculture. Covering everything from silent cinema through to the digital era, Rajadhyaksha examines how the industry reflects the complexity and variety of Indian society through the dramatic changes of the 20th century, and into the beginnings of the 21st.

ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable Study with reference to Calcutta.

This book is a comprehensive critical history of women artistes in Indian theatre and dance of the colonial and post-colonial periods. Its underlying premise is that one cannot evaluate such performances in the Indian context without looking at dance and theatre together, unlike the course taken by traditional scholarship. The author weaves together issues of sexuality and colonialism, and culture and society to provide a holistic account of women performers in India. The distinguishing features of this book are: a close reading of archival materials, field surveys and extensive interviews that provide new information and insights. The book is divided into two sections, on the Actress and on the Danseuse, and displays how the two evolved in different ways. In doing this, it explores the theme of identity and body politics, while simultaneously balancing a historical narrative with emphasis on crucial individual topics. The book adopts a pluralistic approach combining history, economics, cultural studies, popular culture, anthropology, ethnography and feminist criticism. Archival photographs—some of which have never been published before—make it a collector's item.

Syama Prasad Mookerjee was the founder of the Bharatiya Jana Sangh, the

predecessor of the Bharatiya Janata Party (BJP). He is undoubtedly one of the most iconic and controversial leaders in India's recent history. In spite of his significant political and ideological differences with Jawaharlal Nehru, Dr Mookerjee was inducted to the first cabinet of independent India. However, following the Delhi Pact between the Prime Ministers of India and Pakistan, Dr Mookerjee resigned from the cabinet. His role during the Great Bengal Famine of 1943 and the Great Calcutta Killings and Noakhali Carnage of 1946 was historic. His premature death in custody--in Kashmir--remains one of the unsolved mysteries of India's political history. Dr Mookerjee was an educationist, politician and patriot who often opposed the official narratives of his time but fought consistently for India's independence and pre-eminent position in the world. His life has remained largely unexplored till now. This biography aims to rectify that omission by examining his life in detail and shedding light on the turbulent and contentious events of his times.

This is the official report of the International Court of Justice to the General Assembly on its seventy-third session dated 1 August 2019-31 July 2020.

A new novel featuring Gotrek & Felix, two of Warhammer's most popular characters. Gotrek and Felix: unsung heroes of the Empire, or nothing more than common thieves and murderers? The truth perhaps lies somewhere in between, and depends entirely upon whom you ask... Legend tells of the City of the Damned – a dark and forbidding place destroyed in a previous age by the wrath of Sigmar. Long have its fallen towers remained undisturbed by the people of Ostermark, but now an ancient evil stirs in the depths, gathering its strength once more. Gotrek and Felix are swept up in the crusade of Baron Götz von Kiel to cleanse the city, and as the ruins are torn from the passage of time itself, the Slayer's doom appears to be approaching more quickly than either of them would like.

Through discussion of a dazzling array of artists in India and the diaspora, this book delineates a new language of dance on the global stage. Myriad movement vocabularies intersect the dancers' creative landscape, while cutting-edge creative choreography parodies gender and cultural stereotypes, and represents social issues.

The Book Of Friends: Friends From The Lost World And Other Stories is a collection of stories of Naser Banaqeeb. There are stories that may take you back into time that you would love to relive or turn it to your advantage.

The topic of Islamization of contemporary knowledge and education of the Muslims was debated at the First World Conference on Muslim Education in Mecca in 1977, but no serious attempt has been made to trace the history of the ideas and to study and evaluate some these matters in practice.

It is a stealthy silence that is challenged in an inspiring volume on sexuality in contemporary Indian culture. This anthology is a timely intervention that not only attempts to locate sex as a tangible truth in an Indian context but also inspires a hundred questions regarding hidden contours.

An historical reinterpretation of the role of science, technology and medicine in the making of colonial India.

'Calcutta Mosaic' explores the history of the diverse immigrant communities of this great city. Autobiographical reminiscences of a woman political leader from West Bengal, India. This text looks at the city of Calcutta, examining aspects pertaining to its past. Minimal access techniques are revolutionizing surgery. They offer significant advantages for patients and the health service alike. This guide covers all of the key surgical areas where minimal access is of benefit. Clear guidance is given on the techniques, and the current advantages, disadvantages and safety aspects are emphasized.

Regenerative medicine demands new concepts and fabrication tools to improve our common knowledge about cell-cell and cell-environment interactions. In this work, Michele Bianchi shows that different kinds of signals, such as chemical, topographical, and electrical signals, can be arranged in a highly-controlled way. Furthermore, Michele uses scale lengths ranging from several micrometers to a few nanometers, through the employment of unconventional fabrication techniques. For each signal, Michele chose properly designed materials and fabrication methods. The external signals are capable of controlling cell adhesion and growth, opening the way for a systematic investigation of the environmental features affecting cell behaviour.

Based on oral history, fiction, fascinating intellectual gossip, and records of the Coffee Board of India, this study is a multi-sited ethnography of the Indian Coffee House, possibly the world's first coffee house chain. It offers a critical analysis of adda (informal meetings) of the educated middle class in Allahabad, Calcutta and Delhi. The coffee house became the new socio-intellectual nerve centre, replacing the neighbourhood tea shops, and creating an entirely different social space. This book will have line drawings and cartoons as well as archival photographs.

SCIENCE AND EMPIRES: FROM THE INTERNATIONAL COLLOQUIUM TO THE BOOK Patrick PETITJEAN, Catherine JAMI and Anne Marie MOULIN The International Colloquium "Science and Empires - Historical Studies about Scientific Development and European Expansion" is the product of an International Colloquium, "Sciences and Empires - A Comparative History of Scientific Exchanges: European Expansion and Scientific Development in Asian, African, American and Oceanian Countries". Organized by the REHSEIS group (Research on Epistemology and History of Exact Sciences and Scientific Institutions) of CNRS (National Center for Scientific Research), the colloquium was held from 3 to 6 April 1990 in the UNESCO building in Paris. This colloquium was an idea of Professor Roshdi Rashed who initiated this field of studies in France some years ago, and proposed "Sciences and Empires" as one of the main research programmes for the The project to organize such a colloquium was a bit REHSEIS group. of a gamble. Its subject, reflected in the title "Sciences and Empires", is not a currently-accepted sub-discipline of the history of science; rather, it refers to a set of questions which found autonomy only recently. The terminology was strongly debated by the participants and, as is frequently

suggested in this book, awaits fuller clarification.

First Published in 1999. Routledge is an imprint of Taylor & Francis, an informa company.

In the popular imagination, Calcutta is a packed and pestilential sprawl, made notorious by the Black Hole and the works of Mother Teresa. Kipling called it a City of Dreadful Night, and a century later V.S. Naipaul, Gunter Grass and Louis Malle revived its hellish image. This is the place where the West first truly encountered the East. Founded in the 1690s by East India Company merchants beside the Hugli River, Calcutta grew into India's capital during the Raj and the second city of the British Empire. Named the City of Palaces for its neoclassical mansions, Calcutta was the city of Clive, Hastings, Macaulay and Curzon. It was also home to extraordinary Bengalis such as Rabindranath Tagore, the first Asian Nobel laureate, and Satyajit Ray, among the geniuses of world cinema. Above all, Calcutta (renamed Kolkata in 2001) is a city of extremes, where exquisite refinement rubs shoulders with coarse commercialism and political violence. Krishna Dutta explores these multiple paradoxes, giving personal insight into Calcutta's unique history and modern identity as reflected in its architecture, literature, cinema and music. CITY OF ARTISTS: Modern India's cultural capital; home city of

The chapters in this volume of "Insights from Animal Reproduction" address several, particular hot topics in the field of reproduction. The book begins with a comprehensive overview of the cryopreservation of sheep-produced embryos. The following chapter revises the assisted reproductive techniques available for South American wild mammals. Chapter 3 presents the technical procedures necessary to produce transgenic goats. Chapter 4 provides a comprehensive revision of the major molecular determinants of litter size in prolific species. Chapter 5 examines the germ cell determinant transmission, segregation, and function using the zebrafish as a model for germ cell specification in the embryo. Chapter 6 summarizes the current understanding of the molecular and cellular mechanisms regulating the early stages of folliculogenesis. Chapter 7 examines the sperm motility regulatory proteins as a tool to enhance sperm quality in cryopreservation processes. Chapter 8 discusses contemporary knowledge on the effects of extremely low frequency magnetic fields (ELF-MF) on male reproductive function in rodents. Chapter 9 highlights the importance of the cytogenetic evaluation in searching for causes of infertility of phenotypically normal animals, as well as individuals with an abnormal sex development. The last chapter provides evidence that other uterine diseases may be hidden behind the clinical diagnosis of pyometra that in some case may have a poor outcome.
