Further Language Learning in Linguistic and Cultural Diverse Contexts deals with the interdisciplinary area of multilingual and intercultural education and the increasing interest in sociolinguistic and sociocultural aspects of further language learning. It presents the individual, family, scholastic, and extra-scholastic circumstances that promote or limit language learning and its outcomes among young learners of a further language. The intertwined, dynamic interrelationship between intercultural and language learning at primary school is shown by means of the European border region South Tyrol that is characteristic for its linguistic and cultural diversity and serves to demonstrate authentic benefits, challenges, and difficulties in hyper complex and super-diverse contexts. The book analyzes experiences and perceptions as reported by primary school teachers, children, and parents, considering the impact of many factors on further language learning, including school organization, extra curricular activities, and self-initiated encounter pedagogy. Further Language Learning in Linguistic and Cultural Diverse Contexts will be vital reading for academics, researchers, and post-graduate students in the fields of education, language learning, sociolinguistics, interculturalism, and super-diversity.

This edited book uses the concept of diversity in child foreign language education as a major organizing principle. Since a foreign language, most typically English, is taught globally to an increasing number of children, the variability in the process and varied learning outcomes are inescapable phenomena. This book has been constructed on the premise that heterogeneity, first, concerns young language learners, who due to the disparity in the pace of development need appropriately tailored educational solutions, and, second, it refers to a diversity of contexts in which learning takes place. The contexts can be defined on a macroscale (e.g. different countries), mesoscale (e.g. different institutions), and

microscale (e.g. specific learner groups). The book consists of four thematic strands. In Part One the learner-internal causes of heterogeneity of young language learners are clarified. Part Two presents a sample of classroom studies in which learner variables, such as gender, learner preferences, and special needs are taken into account. Part Three looks at teaching materials and how they meet learners' needs. Finally, Part Four highlights diversity issues that teachers should be prepared to face.

Volume 2 of 2. The Student Anthology features paired reading selections with exclusive National Geographic content. Built-in instructional support and activities are also included.

GREEN is a part of a ground-breaking new series, the National Geographic Learning Reader Series. This series brings learning to life by featuring compelling images, media and text from National Geographic. Through this engaging content, students develop a clearer understanding of the world around them. Published in a variety of subject areas, the National Geographic Learning Reader Series connects key topics to authentic examples and can be used in conjunction with most standard texts or online materials available for your courses. Access to a media-enhanced eBook is included with each reader. The twelve articles in this single-themed reader are inspired by our changing relationship with the earth, based on an understanding that the planet's resources are finite and that our future depends on preserving them. While the term green signifies a level of awareness about environmental concerns, it is used here in the broadest sense, to draw students' attention to the state of the planet and to promote discourse on how to address the needs of the human population as well as the ecosystems that sustain life in our world. To what extent we see ourselves as members of a global community and to rethink how we will meet the growing needs of our population in the future are the two central questions this collection asks readers to consider critically.
