National Geographic Little Kids First Big Book of Why National Geographic Books

In this truly inspirational memoir, Anita Moorjani relates how, after fighting cancer for almost four years, her body began shutting down—overwhelmed by the malignant cells spreading throughout her system. As her organs failed, she entered into an extraordinary near-death experience where she realized her inherent worth . . . and the actual cause of her disease. Upon regaining consciousness, Anita found that her condition had improved so rapidly that she was released from the hospital within weeks—without a trace of cancer in her body! Within these pages, Anita recounts stories of her childhood in Hong Kong, her challenge to establish her career and find true love, as well as how she eventually ended up in that hospital bed where she defied all medical knowledge. As part of a traditional Hindu family residing in a largely Chinese and British society, Anita had been pushed and pulled by cultural and religious customs since she was a little girl. After years of struggling to forge her own path while trying to meet everyone else's expectations, she had the realization, as a result of her epiphany on the other side, that she had the power to heal herself . . . and that there are miracles in the Universe that she'd never even imagined. In *Dying to Be Me*, Anita freely shares all she has learned about illness, healing, fear, "being love," and the true magnificence of each and every human being! This is a book that definitely makes the case that we

are spiritual beings having a human experience . . . and that we are all One!

A lavishly photographed, fact-filled introduction to a variety of jumping, crawling and creeping insects expands from backyard favorites, including ladybugs and fireflies, to more exotic species from the world's rain forests and deserts.

A fact-filled introduction to the wild and wonderful world of weather. You'll discover how a rainbow forms; learn why some places are hot and others cold; and even play some games!

A fact-filled introduction to a variety of birds expands from backyard favorites to rainforest exotics.

Get ready to be dazzled! This lively reference book for the younger set introduces a fascinating variety of Earth's rocks, minerals, gemstones, fossils, and shells--from granite to gold, marble to malachite, and conchs to clams. Discover how rocks are formed, the three kinds of rocks, and the difference between rocks and minerals. Learn how rocks and minerals are used in art, architecture, industry, and science. Then journey to the oceans to explore seashells and the amazing animals that once inhabited them. Packed with more than 200 stunning photos, including closeups of each specimen, this colorful book showcases breathtaking natural sites such as the Giant's Causeway and human-built structures such as the Great Wall of China. Filled with fun facts and designed for interactive learning, the Little Kids First Big Book of Rocks, Minerals, and Shells is sure to become a favorite with young rock and shell collectors
