

National Geographic Readers Red Pandas

Table of Contents Introduction What is a red panda? How do red pandas act? Where do red pandas live? What kinds of red pandas are there? The history of red pandas and humans The genetic debate Red pandas as pets Conclusion Introduction The red panda is probably one of the cutest creatures around, easily tying with the giant panda. But why are they both called pandas if they look so incredibly different? And what makes the red panda different from, say, a raccoon? Red pandas are unique animals all their own. They live in Asia, towards the East, and they have been a more recent favorite animal of many children and adults. Unlike its name-sibling the giant panda, the red panda receives less attention than many endangered animals. However, it is also one of the more common zoo animals, since red pandas do so well in zoos. What makes the red panda an animal worth knowing? There are a lot of answers to that question, and we will cover them in this book.

Photographs and text introduce readers to giant and red pandas, discussing how they look, what they eat, and where they live, looking at the lives of baby pandas, and explaining why pandas need to be protected.

A silly book about a cheeky baby red panda.

Provides information about red pandas, including their diet, life cycle, physical characteristics, behaviors, and habitat.
