Visit www.natgeoed.org/commoncore for more information.

Who could resist celebrating sea turtles? They may seem like lazy ocean reptiles drifting with the oceans' currents, but they are actually long-distance swimmers that spend their entire lives searching for food and a mate. What's more, they come with their own built-in GPS, returning

to the exact beach where they were born to lay their own eggs. Kids will learn all about these tranquil and mysterious animals through brilliant photography and illustrations, plus the trusted and distinctive content you love from NG Kids!

In this book, early fluent readers will learn how and why kangaroos live together in groups called mobs. Vibrant, full-color photos and carefully leveled text will engage young readers as they learn more about the animal's habitat, diet, behaviors, appearance, and social structure. A Take a Look! infographic aids understanding, sidebars present interesting, supplementary information, and an activity offers readers an opportunity to extend discovery. Children can learn more about kangaroo mobs using our safe search engine that provides relevant, age-appropriate websites. Kangaroo Mobs also features reading tips for teachers and parents, a table of contents, a glossary, and an index. Kangaroo Mobs is part of Jump!'s Better Together: Animal Groups series.

Dive into the world's oceans to explore the adventurous lives of one of the oldest living animals. Descended from enormous prehistoric creatures, sea turtles are fascinating. Hatched from eggs smaller than a baseball, some can grow to weigh over a thousand pounds. Once adults, they can live to be around 100 years old. And when it's time to nest, they migrate more than 1,000 miles. With colorful, clear illustrations and straightforward text, Gail Gibbons introduces the eight kinds of sea turtles living in the ocean today. Learn the similarities and differences with labeled diagrams and experience the hatching of the tiny turtle babies with detailed illustrations. This updated edition now includes the most up-to-date information about these beloved reptiles, as reviewed by an expert vetter in the field of herpetology. Sea Turtles also gives young readers an accessible overview of how the lives of these large reptiles have become threatened and discusses the conservation efforts currently taking place. Ideal for aspiring oceanographers, this brightly-illustrated book is a perfect introduction to the subject.

Describes different types of ants and their behavior.

This photo-illustrated book for early readers tells the story of a sea turtle laying her eggs, how they hatch, find their way to the sea, and grow up.

Presents the life of sea turtles, including where they travel, how they build nests, and what they eat.

What's that buzzing around? It's a busy bee! With beautiful, engaging, and authentic photos, and accessible text, kids will learn all about these incredible insects in this level 2 reader.

Provides facts about wolves, including their habitat, packs, and feeding habits.

He's quick. He's silent. He has five rows of deadly teeth. Chomp! Meet the shark—the fish who ruled the deep before dinosaurs roamed the Earth! This fish has soft cartilage so he can glide, twist, and turn before his prey can say "gulp!" He can smell a single drop of blood in 25 million drops of ocean. He can feel electricity given off by his prey. He will lose and

replace more than 10,000 teeth in his lifetime. Cool photos bring kids into the shark's world. Fun facts go deep into the shark's scary science.

A common snapping turtle lurks in muddy water. She is waiting for prey to swim by! These slow-moving reptiles are at the top of the freshwater food chain. Curious kids will love this journey in the ponds!

An introduction for young readers on the basics of how to care for a pet turtle.

"Take a dip with turtles in this exciting reader. Packed with beautiful and engaging photos, kids will learn all about these fantastic reptiles. This Level 1 reader is carefully leveled for an early independent reading or read aloud experience, perfect to encourage the scientists and explorers of tomorrow!"--Provided by publisher.

A lavishly illustrated guide to the world's turtles that covers every family and genus Turtles of the World reveals the extraordinary diversity of these amazing reptiles. Characterized by the bony shell that acts as a shield to protect the softer body within, turtles are survivors from the time of the dinosaurs and are even more ancient in evolutionary terms than snakes and crocodilians. Of more than 350 species known today, some are highly endangered. In this beautiful guide, turtle families, subfamilies, and genera are illustrated with hundreds of color photographs. Each genus profile includes a population distribution map, a table of information, and commentary that includes notable characteristics and discussion of related species. More than 250 beautiful color photos Each profile features a distribution map, table of information, and commentary Broad coverage includes every family and genus

Provides information about these playful mammals, including their aquatic habitats, diet, physical characteristics, and behaviors.

A pair of eyes lurks just above the water's surface. Is it a crocodile or an alligator? Packed with beautiful and engaging photos, kids will learn all about these two reptiles—and find out what makes them different. This level 2 reader provides both accessible and wide-ranging text to encourage the scientists and explorers of tomorrow!

Introduces coral reefs, including how they are made, where they are in the world, and why the world's coral reefs are in danger.

Water is all around us; we drink it every day. In this level 3 reader, kids will learn about the water cycle, discovering how rain and snow flow into our lakes, rivers, and oceans, and later evaporate into the sky again. Vivid photography and accessible text make this book an ideal introduction to the science of water.
